New Garden Heritage Of New Zealand:

Chinese Market Gardening in Australia and New Zealand Joanna Boileau, 2017-07-27 This book offers a fresh perspective on the Chinese diaspora. It is about the mobilisation of knowledge across time and space exploring the history of Chinese market gardening in Australia and New Zealand. It enlarges our understanding of processes of technological change and human mobility highlighting the mobility of migrants as an essential element in the mobility and adaptation of technologies. Truly multidisciplinary Chinese Market Gardening in Australia and New Zealand incorporates elements of economic, agricultural, social, cultural and environmental history along with archaeology to document how Chinese market gardeners from subtropical southern China adapted their horticultural techniques and technologies to novel environments and the demands of European consumers. It shows that they made a significant contribution to the economies of Australia and New Zealand developing flexible strategies to cope with the vagaries of climate and changing business and social environments which were often hostile towards Asian immigrants. Chinese Market Gardening in Australia and New Zealand will appeal to students and scholars in the fields of the Chinese diaspora, in particular the history of the Chinese in Australasia, the history of technology, horticultural and garden history and environmental history as well as Asian studies more generally.

Design and Heritage Grace Lees-Maffei, Rebecca Houze, 2021-12-29 Design and Heritage provides the first extended study of heritage from the point of view of design history. Exploring the material objects and spaces that contribute to our experience of heritage, the volume also examines the processes and practices that shape them. Bringing together 18 case studies written by authors from the United States, the United Kingdom, Canada, Brazil, Norway, India, South Africa, Australia and New Zealand, the book questions how design functions to produce heritage. Including provocative case studies of objects that reinterpret visual symbols of cultural identity and buildings and monuments that evoke feelings of national pride and historical memory as well as landscapes embedded with trauma, contributors consider how we can work to develop adequate shared conceptual models of heritage and apply them to design and its histories. Exploring the distinction between tangible and intangible heritages, the chapters consider what these categories mean for design history and heritage. Finally, the book questions whether it might be possible to promote a truly equitable understanding of heritage that illuminates the social, cultural and economic roles of design. Design and Heritage demonstrates that design historical methods of inquiry contribute significantly to critical heritage studies. Academics, researchers and students engaged in the study of heritage, design history, material culture, folklore, art history, architectural history and social and cultural history will find much to interest them within the pages of the book.
