18th and 19th Century Porcelain Analysis Howell G. M. Edwards,2020-07-13 This book addresses the contributions made by analytical chemistry to the characterisation of 18th and early 19th Century English and Welsh porcelains commencing with the earliest reports of Sir Arthur Church and of Herbert Eccles and Bernard Rackham using chemical digestion techniques and concluding with the most recent instrumental experiments which together span more than a hundred years of study From the earliest experiments which required necessarily the sacrifice of significant portions of each specimen which may already have been damaged to the latest experiments which needed only microsampling or the non destructive interrogation of valuable perfect specimens a comprehensive survey is undertaken of more than twenty manufactories of quality porcelains The correlation is made between the quantitative elemental oxide determinations of the scanning electron microscopic diffraction and X-ray fluorescence data and the qualitative molecular spectroscopic Raman data to demonstrate their complementarity and use in the holistic forensic assessment of the origin of the fired porcelains this will form the groundwork for the adoption of analytical techniques for the attribution of unknown or questionable porcelains to their potential source factories The book will also examine the perception of what constitutes a porcelain and its definitions and examines the assignment of porcelains to types which currently employs the definitions of hard paste soft paste hybrid magnesian and bone china from the conclusions derived from the analytical data and a consideration of the raw materials employed in their manufacturing processes During the discussion of this analytical evidence several themes and protocols have been established for its utilisation in the potential identification of porcelains and several case studies undertaken for this purpose are cited The book will be of interest to analytical scientists to museum ceramics curators and to ceramics historians *Catalog of the Avery Memorial Architectural Library of Columbia University. 2d ed., enl* Avery Library,1972

Glenn, 2009-07-01 When the French actress Sarah Bernhardt made her first American tour in 1880 the term feminism had not yet entered our national vocabulary But over the course of the next half century a rising generation of daring actresses and comics brought a new kind of woman to center stage Exploring and exploiting modern fantasies and fears about female roles and gender identity these performers eschewed theatrical convention and traditional notions of womanly modesty They created powerful images of themselves as ambitious independent and sexually expressive New Women *Female Spectacle* reveals the theater to have been a powerful new source of cultural authority and visibility for women Ironically theater also provided an arena in which producers and audiences projected the uncertainties and hostilities that accompanied changing gender relations From Bernhardt s modern methods of self promotion to Emma Goldman s political theatrics from the female mimics and Salome dancers to the upwardly striving chorus girl Glenn shows us how and why theater mattered to women and argues for its pivotal role in the emergence of modern feminism
