Conceptual Shifts and Contextualized Practices in Education for Glocal Interaction Ali Fuad Selvi, Nathanael

Rudolph, 2017-11-03 This book employs the realm of English Language Teaching ELT as a discursive point of departure to explore how individuals groups entities and institutions apprehend embrace deal with manipulate problematize and resist glocal flows of people ideas information goods and technology It apprehends and attends to tensions arising from the fluidly local global construction and negotiation of borders of identity and interaction within a diverse array of contexts and English education therein These tensions whether conceptual or pedagogical may arise in and through governmental and institutional policymaking teacher training or curriculum and materials development and in the learning experience both within and beyond the classroom as teachers and students engage with course content and each other

Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda, Angola Celeste Sambeny, 2016-06-22 Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda Angola presents a detailed study of students and lecturers at higher teacher training institutions where English is taught as a medium of instruction and specialisation As such the book will help raise the awareness of educators teachers and supervisors of the need to be more supportive to students and will highlight the importance of increased responsibility on the part of the students regarding their studies especially during the process of writing their research reports Practical experience has shown that in most classrooms students are typically asked to produce texts for one single audience namely the teacher or the lecturer who already knows what constitutes an acceptable response However in many classrooms teachers and lecturers tend to believe that literacy can be defined as the ability to encode and decode texts the ability to decipher the main idea of a reading passage or to write a text that obeys the general conventions of language usage such as syntax organisation and idea development The central argument of this book however is that at higher levels of the educational system in Angola academic and research literacy practices are at best questionable and at worst harmful An extensive re evaluation of assumptions regarding student capability and what it means to be a literate in the twenty first century information society is of critical importance Such a re examination allows for extensive reflection on current practices and a powerful critique of traditional academic and research literacy methods and suggests ways in which practices of quality teaching and learning may be implemented
