New Instruments For Environmental Policy:

New Instruments for Environmental Policy in the EU Jonathan Golub, 1998-06-04 New Instruments for Environmental Policy in the EU provides a comprehensive analysis of the debate over new forms of environmental regulation in the European Union. The conclusions draw attention to critical aspects of instrument design as well as the difficulty of accommodating national policy diversity without contravening EU and international law. **Environmental Policy in Search of New Instruments** B. Dente, 2013-03-09 Environmental policy is undergoing a dramatic transformation. The problems connected with global change, the need for preventative action and the growing importance of non-source pollution call for new courses of action and new institutional arrangements. In this situation, it is fairly obvious that both the traditional command and control policy instruments and the more modern financial and economic instruments are increasingly under stress. This volume deliberately aims to break new ground in providing the conceptual tools necessary for the next generation of environmental policies. In doing so, it covers a wide interdisciplinary range from public policy analysis to international law and draws upon much international experience well reflected by the mixed composition of the contributors. On the basis of a shared theoretical framework, the book explores the potential of new policy instruments such as policy evaluation or mediation, proposes alternative institutional arrangements for dealing with the issues, classifies existing instruments and illuminates the process through which old and new tools can be set into operation. **New Instruments of Environmental Governance?** Andrew Jordan, Rüdiger Wurzel, Anthony R. Zito, 2003 These papers offer a fresh perspective on the evolving tool box of environmental policy such as eco taxes, tradable permits, voluntary agreements and eco labels. **New Instruments of Environmental Governance?** Andrew Jordan, Rüdiger K.W. Wurzel, Anthony R. Zito, 2004-11-23 The use of so-called new environmental policy instruments such as eco taxes, tradable permits, voluntary agreements and eco labels has prompted widespread claims that these devices have replaced regulation. These papers offer a fresh perspective on the evolving tool box of environmental policy. **New Instruments for Environmental Policy in the EU.** Jan Willem Biekart, 1998 Market-Based Instruments for Environmental Management Mikael Skou Andersen, Rolf-Ulrich Sprenger, 2000-01-01 This volume brings together contributions from political scientists and environmental economists and will prove invaluable for academics, practitioners and policymakers interested in the experiences of countries where market-based instruments are well established. **BOOK JACKET** *Global Competition and EU Environmental Policy* Jonathan Golub, 1998-03-19 *Global Competition and EU Environmental Policy* is the first book to examine the relationship between economic competitiveness and environmental protection in European Union policy. A wide range of international case studies addresses key agreements and policies, including those dealing with ozone layer protection, pesticide exports, shipping, climate. **New Environmental Policy Instruments in the European Union** Ian Bailey, 2017-07-05 The use of legislation by EU governments to define environmental standards for industry has been criticised for its poor track record in arresting the

decline in the quality of Europe's environment Environmental economists in particular have proposed that legislation should be supplemented or replaced by New Environmental Policy Instruments NEPIs such as eco taxes environmental charges tradable permits and voluntary agreements This book focuses on practical experiences with NEPIs in the EU and tests their application using the case study of the Packaging and Packaging Waste Directive It traces the ways in which member states have adapted NEPIs to suit their preferred styles of environmental policy then assesses their performance and how NEPIs have both assisted and hindered the EU environmental programme It suggests options for ensuring that the environmental programme does not become fragmented by the use of NEPIs and discusses the implications of EU enlargement

Environmental Policy in the European Union Andrew Jordan, 2012 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy Comprising five comprehensive parts it includes in depth case studies of contemporary policy issues such as climate change genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement environmental policy integration and sustainability The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors *Handbook of Research on Environmental Taxation* Janet E. Milne, Mikael Skou Andersen, 2012-01-01 Ingeniously organized in a life cycle format the Handbook covers environmental taxation concepts design acceptance implementation and impact The universal themes discussed in each area will appeal to a broad range of readers Larry Kreiser Cleveland State University US This book is a smart and useful reader's guide providing analytical tools for a full comprehension of environmental taxes with an interdisciplinary approach that looks at all the different phases of environmental taxation from the design to the implementation the political acceptance and the impact on the economy The authors' effort is very successful in endowing academicians policy makers and the general public with an excellent proof of the effectiveness of environmental taxes and green tax reforms Alberto Majocchi University of Pavia Italy Putting the words environment next to taxation might not always be the flavour of the month but no modern society can ignore the value of the natural environment and the need to maintain its good quality and no competitive economy can prosper without the necessary tax revenues to function Environmental taxation offers the prospect of moving towards a more resource efficient economy where preference is given to tax more what we burn less what we earn I welcome this contribution to the literature Commissioner Connie Hedegaard European Commission The Milne and Andersen volume provides a splendid treatment of environmental taxation that encompasses the basic conceptual issues problems of tax design and implementation and several insightful case studies that show how environmental taxes actually work in practice It is the best overall treatment of environmental taxation available comprehensive rigorous and readable Wallace Oates University of Maryland US The Handbook of Research on Environmental

Taxation captures the state of the art of research on environmental taxation. Written by 36 specialists in environmental taxation from 16 countries, it takes an interdisciplinary and international approach focusing on issues that are universal to using taxation to achieve environmental goals. The Handbook explores the conceptual foundations of environmental taxation, essential elements for designing environmental tax measures, factors that influence the acceptance of environmental taxation, the variety of ways to implement environmental taxes, their environmental and economic impact, and finally the larger question of the role of taxation among other policy approaches to environmental protection. Intermixing theory with case studies, the Handbook offers readers lessons that can be applied around the world. It identifies key bodies of research for people who are already working in the field or entering the field and highlights issues that call for more research in the future. With systematic analysis of key issues in environmental taxation, this book will appeal to researchers, governments, think tanks, NGOs, and academics in law, economics, political science, and public finance, as well as students specializing in environmental taxation and other market-based instruments.
