New England Textiles in the Nineteenth Century Paul F. McGouldrick, 1968 **The Cambridge Economic History of Europe: Volume 7, The Industrial Economies: Capital, Labour and Enterprise, Part 2, The United States, Japan and Russia** Peter Mathias, M. M. Quantitative Economic History Joshua L. Rosenbloom, 2008-03-26 The essays in this book use the analytical tools and theoretical framework of economics to interpret quantitative historical evidence offering new ways to approach historical issues and suggesting entirely new types of evidence outside conventional archives Rosenbloom has gathered together seven essays from leading quantitative economic historian *The New Industrial Geography* Trevor Barnes, Meric S Gertler, 2002-01-04 Drawing on the theoretical resources of institutional economics The New Industrial Geography opens new perspectives in economic geography In its focus on historical and geographical context institutional embeddedness and tacit rules and formal regulations institutional economics is shown to be the perfect basis for understanding the profound

economic and geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development
