New European Community Decisionmaking And Institutional Change:

The New European Community Robert O Keohane, 1991-09-16 The New European Community is the first systematic book length discussion of the major political institutions of the European Community EC after the transformation of the 1987 Single European Act itself a surprise and a mystery whose effects are unraveled here Professors Keohane and Hoffmann open the volume by placing the evolution of the new European Community into broad theoretical perspective Their expert contributors including highly regarded international scholars a judge of the European Court of Justice and a long term British politician present engaging overviews of the process at work in major EC events and institutions The centerpiece of the volume Peter Ludlow s chapter on the European Commission lays out all of the systems and actors in the emerging EC and shows their direct connection with problems of Community development and integration Filled with examples illustrations anecdotes and valuable data The New European Community will be indispensable for all students and scholars of international relations and European studies as well as for those in business and government who want to understand the European Community before and beyond 1992

Federalism and the European Union Michael Burgess, 2002-09-11 A revisionist interpretation of the post war evolution of European integration and the European Union EU this book reappraises and reassesses conventional explanations of European integration It adopts a federalist approach which supplements state based arguments with federal political ideas influences and strategies By exploring the philosophical and historical origins of federal ideas and tracing their influence throughout the whole of the EU s evolution the book makes a significant contribution to the scholarly debate about the nature and development of the EU The book looks at federal ideas stretching back to the sixteenth century and demonstrates their fundamental continuity to contemporary European integration It situates these ideas in the broad context of post war western Europe and underlines their practical relevance in the activities of Jean Monnet and Altiero Spinelli Post war empirical developments are explored

from a federalist perspective revealing an enduring persistence of federal ideas which have been either ignored or overlooked in conventional interpretations The book challenges traditional conceptions of the post war and contemporary evolution of the EU to reassert and reinstate federalism in theory and practice at the very core of European integration

Informal Decision Making in the European Community under the Luxembourg Compromise Philip Bajan, 2025-10-16 This book analyses the informal decision making process in the EU against the background of a gradually emerging European legal order Based on extensive multi archival research in the UK France Germany the Benelux countries and in Community institutions the book explores the resistance against majority rule under the so called Luxembourg Compromise of 1966 a European soft law that allowed Member States to invoke vital national interests and to veto legislation This gentlemen s agreement was never sanctioned or codified However as a rule of the game it had a significant impact on the operations of the EU for several decades and became an integral part of the EU s consensus approach Its underlying rationale is still alive in the present day EU Presenting a deeply revisionist account of European law and politics the book demonstrates how the Luxembourg arrangement served as a compromise between the Treaty text and political reality as a counterweight to technocratic ideas and as a bridge between irreconcilable divides over European unification It includes case studies from 1965 2000 such as the Eurosclerosis of the 1970s British exceptionalism as an EU member the European revival of the mid 1980s and intergovernmentalism on the verge of negotiating the Maastricht Treaty Highly original in its interdisciplinary comprehensive and archivally rooted method the book interrogates the most important and controversial debates about the past present and future of the European Union

Decision-Making in the European Union John Peterson, Elizabeth Bomberg, 1999-05-25 Based on exhaustive research this book explains how the European Union makes decisions in seven major policy sectors Written in a clear user friendly style it brings the EU alive for a student and non specialist audience The book s central themes are that informal norms often matter more than formal rules agency often matters more than structure and abrupt change often punctuates deadlock It offers a theoretically based introduction to the lively humorous and fascinating politics of a unique experiment in modern governance

Rethinking International Organisation Barbara Emadi-Coffin, 2003-08-27 The function of the state as a symbol of identity has become increasingly important as major powers of the pre Cold War era have given way to self determination The conventional role of the state has however simultaneously been challenged by the process of globalisation which transcends such national boundaries Barbara Emadi Coffin seeks to explain this contradiction through a radical new theory There are now 37 000 multinational corporations in the world many of which are increasingly seen as being among the new centres of political and economic power Barbara Emadi Coffin analyses the increasing interaction of multinational corporations international organizations and transnational interest groups such as Greenpeace and Amnesty International in processes of the global political economy Using examples of the free trade zones in Korea the UK and the People s Republic of China the author demonstrates these interactions In so doing

she challenges prevailing notions surrounding International Organization theory

European Integration After Amsterdam Karlheinz Neunreither, Antje Wiener, 2000 European integration is at a turning point with implications for all member states and their citizens The Amsterdam treaty marks a shift towards constitutional issues Integration has involved a continually evolving process of constitution making A group of leading scholars argue that the shift towards constitutional issues is rooted not only in the issues on the European level but also in shifting models of political and economic organisation in the member states Paradoxically however this push towards integration is accompanied by a number of institutional changes and political decisions which challenge the picture of on going integration and indicate a shift towards a new pluralism in the Euro polity The contributors address questions such as what are the likely effects of the Amsterdam treaty changes in comparison with Maastricht how will these changes effect the complex balance among the governing institutions of the EU and what will be the implications for the lingering quest for democracy

The Institutions and Dynamics of the European Community, 1973-83 Johnny Laursen, 2015-03-26 Based on fresh archival research and interviews this book offers a new look at the history of this distinct era of European integration Chapters from leading scholars include subjects ranging from European law to EC expansion and from the European Currency System to the application of Greece to join the Community Overall the book provides a fresh interpretation of the period as one not simply of crisis and stagnation

The Integration of the European Community and Third States in Europe Andrew Evans, 1996 This book examines the legal frameworks for integration provided by the EC Treaty the Free Trade Agreement between Sweden and the EC concluded in 1972 the European Agreement between Poland and the Community and the European Economic Areas EEA The book not only compares the operation of four types of legal framework for integration but also with the assistance of comparisons explores underlying problems in the integration of the European Community and Third States in Europe In the case of many countries of the former Soviet Union notably Russia membership of the Union does not appear to offer a feasible basis for their participation in the European integration process and so the construction of a mutually acceptable legal framework for close relations between such countries and the Community arguably constitutes one of the most serious and pressing problems to be tackled by Union Integration Law The book is written for teachers and students of advanced courses in EU Law as well as for policy makers officials and practitioners in the private sector whose work concerns relations between the Community and Third states

European Myths Sam-Sang Jo, 2007 The history of the European Community European Union s EC EU development is a narrative of crises generated and resolved To date the resolution of crises in community affairs has furthered European integration The characteristic pattern of integration is dialectical two steps forward and one step back with crises both accounting for the steps backward and forward This book examines why the crises were constructively resolved rather than the often explored how of the resolutions This work contends that European myths which emerged from Europe s cataclysmic experiences in World War I and II cement the member states within the EC EU and lead to greater

social economic and political integration with the EC EU During the periodic crises the European myths have eliminated every choice except the choice to move European integration forward Professor Sam Sang Jo s analysis argues that once the European myths weaken the tensions among EU member states are likely to escalate
