New Greenland:

Phasing Out the Colonial Status of Greenland, 1945-54 Jens Elo Rytter, 2010 With the Constitution of 1953 the colonial status of Greenland came to an end and Greenlanders were granted equal rights as citizens within the Danish realm. In 1954 this new arrangement was supported by the UN General Assembly. The decision to change Greenland's status was conditioned both by internal and external circumstances. In the UN context Danes increasingly felt the strain of being a colonial power and they feared the possibility of future UN interference in Greenlandic affairs. **Greenland's Stolen Indigenous Children** Helene Thiesen, 2022-11-10 In this book author Helene Thiesen recounts her experience of being removed from her family in Greenland as a young Inuk child to be re-educated in Denmark and an orphanage in Greenland. The practice of forcible assimilation of Indigenous children into colonial societies through education has echoes in North America and Australasia and the painful legacy of these practices remains under-acknowledged. In this poignant book Helene recounts in detail the process of being taken from her family in 1951, aged seven, along with twenty-one other children in the attempt to re-make them into model Danish citizens in a social experiment led by the Danish government and Save the Children Denmark. When the children returned to Greenland a year and a half later they were sent to live in a Danish Red Cross orphanage where they were forbidden to speak their native languages and were compelled to adopt Danish language, culture and customs. With a detailed introductory analysis from Dr Stephen James Minton who also provides the translation, Helene's account serves as a compelling and powerful testimony of a devastating colonial experiment. Richly illustrated with forty photos to help to situate the reader, this book provides an invaluable case study for researchers and students in the fields of Indigenous Studies, Critical Pedagogy and Education, Psychology, European History and Cultural Studies. **The Greenland Entomofauna** Jens Böcher, N.P. Kristensen (†), Thomas Pape, Lars Vilhelmsen, 2015-05-26 In *The Greenland Entomofauna* an international team of 64 taxonomic specialists provide for the first time a richly illustrated guide to the identification of the 1200 species of Hexapods, Insects, Arachnids and Myriapods so far known to occur in the country. While the composition, origin and adaptations of the Greenland fauna has always been a challenge to biogeographers and ecologists, ecophysiologicalists, the provision of a tool for detailed identification of its constituent species is now particularly timely since global climate change will expectedly have a particularly noticeable impact on biota at high latitudes. This obviously renders the feasibility of monitoring distributional range shifts of the principal components of this biota a matter of some urgency.
