Our Own Devices The Past And Future Of Body Technology:

Our Own Devices Edward Tenner, 2003 Looks at how the inventions we have created to help protect and ease our lives dramatically affect the human body and human life examining the sometimes suprising ways in which technology has **Our Own Devices** Edward Tenner, 2004-06-08 This delightful and instructive history of invention transformed the world shows why National Public Radio dubbed Tenner the philosopher of everyday technology Looking at how our inventions have impacted our world in ways we never intended or imagined he shows that the things we create have a tendency to bounce back and change us The reclining chair originally designed for brief healthful relaxation has become the very symbol of obesity The helmet invented for military purposes has made possible new sports like mountain biking and rollerblading The typewriter created to make business run more smoothly has resulted in wide spread vision problems which in turn have made people more reliant on another invention eyeglasses As he sheds light on the many ways inventions surprise and renew us Tenner considers where technology will take us in the future and what we can expect from the devices that we no longer Discoveries and Inventions in Literature for Youth Joy L. Lowe, Kathryn I. seem able to live without Matthew, 2004-03-03 A compilation of books and other resources that are appropriate for students in kindergarten through The Illusory Boundary Martin Reuss, Stephen H. Cutcliffe, 2010-09-20 The view of nature and technology twelfth grade inhabiting totally different even opposite spheres persists across time and cultures Most people would consider an English countryside or a Louisiana bayou to be natural though each is to an extent the product of technology Pollution widely thought to be a purely man made phenomenon results partly from natural processes All around us things from the natural world are brought into the human world At what point do we consider them part of culture rather than nature And does such a distinction illuminate our world or obscure its workings This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology Rejecting this dichotomy the contributors show how the history of each can be united in a constantly shifting panorama where definitions of nature and technology alter and overlap In addition to recognizing the artificial divide between these two concepts the essays in this book demonstrate how such thinking may affect societies ability to survive and prosper The answers and ideas are as numerous as the landscapes they consider for there is no single path toward a more harmonious vision of technology and nature Technologies that work in one place may not in another Nature that is preserved in one community might become the raw material of technological progress somewhere else Add to this the fact that the natural world and technology are not passive players but are profoundly involved in cultural construction Understanding such dynamics not only reveals a new historical complexity it prepares us for coping with many of the most difficult and pressing social issues facing us today Contributors Peter Coates Craig E Colten Stephen H Cutcliffe Hugh S Gorman Betsy Mendelsohn Joy Parr Peter C Perdue Sara B Pritchard Martin Reuss William D Rowley Edmund Russell Joel A Tarr Ann Vileisis James C Williams Thomas Zeller 'Extra-Ordinary'

Being and Becoming Ramsey Elkholy,2016-05 For the Orang Rimba of Sumatra and tropical foragers in general life in the forest engenders a kind of connectedness that is contingent not only on harmonious relations between people but also between people and the non human environment including those supernatural agencies of the forest that people depend on for their spiritual and emotional wellbeing Exploring this world anthropologist Ramsey Elkholy treats embodied action and perception as the basis of shared experience and shows how various forms of embodied experience constitute the very foundations of human culture In a unique methodological contribution Elkholy adopts a set of body centered approaches that reflect and capture the day to day moment to moment ways in which people engage with the world Being and Becoming is an important contribution to phenomenological anthropology hunter gatherer studies and to Southeast Asian ethnography more generally

Now I Sit Me Down Witold Rybczynski,2025-06-25 Have you ever wondered where rocking chairs came from or why cheap plastic chairs are suddenly everywhere In Now I Sit Me Down the distinguished architect and writer Witold Rybczynski chronicles the history of the chair from the folding stools of pharaonic Egypt to the ubiquitous stackable monobloc chairs of today He tells the stories of the inventor of the bentwood chair Michael Thonet and of the creators of the first molded plywood chair Charles and Ray Eames He reveals the history of chairs to be a social history of who we are We learn

how the ancient Chinese switched from sitting on the floor to sitting in a chair and how the iconic chair of Middle America the Barcalounger traces its roots back to the Bauhaus Rybczynski weaves a rich tapestry that draws on art and design history personal experience and historical accounts And he pairs these stories with his own delightful hand drawn illustrations colonial rockers and English cabrioles languorous chaise longues and no nonsense ergonomic task chairs they re all here The famous Danish furniture designer Hans Wegner once remarked A chair is only finished when someone sits in it As Rybczynski tells it the way we choose to sit and what we choose to sit on speak volumes about our values our tastes and the things we **Against Technology** Steven E. Jones, 2013-01-11 This book addresses the question of what it might mean today to be a Luddite that is to take a stand against technology Steven Jones here explains the history of the Luddites British textile works who from around 1811 proclaimed themselves followers of Ned Ludd and smashed machinery they saw as threatening their trade Against Technology is not a history of the Luddites but a history of an idea how the activities of a group of British workers in Yorkshire and Nottinghamshire came to stand for a global anti technology philosophy and how an anonymous collective movement came to be identified with an individualistic personal conviction Angry textile workers in the early nineteenth century became romantic symbols of a desire for a simple life certainly not the original goal of the actions for which they became famous Against Technology is in other words a book about representations about the image and the myth of the Luddites and how that myth was transformed over time into modern neo Luddism Media, Technology, and Literature in the Nineteenth Century Dr Colette Colligan, Dr Margaret Linley, 2013-05-28 Operating at the intersection where new technology meets literature this collection discovers the relationship among image sound and touch in the long nineteenth century The chapters speak to the special mixed media properties of literature while exploring the important interconnections of science technology and art at the historical moment when media was being theorized debated and scrutinized Each chapter focuses on a specific visual acoustic or haptic dimension of media while also calling attention to the relationships among the three Famous works such as Wordsworth s I wandered lonely as a cloud and Shelley s Frankenstein are discussed alongside a range of lesser known literary scientific and pornographic writings Topics include the development of a print culture for the visually impaired the relationship between photography and narrative the kaleidoscope and modern urban experience Christmas gift books poetry painting and music as remediated forms the interface among the piano telegraph and typewriter Ernst Heinrich Weber's model of rationalized tactility and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth century information networks Full of surprising insights and connections the collection offers new impetus for stimulating historical conversations and debates about nineteenth century media while also contributing fresh perspectives on new media and re mediation today Theses on the Metaphors of Digital-Textual History Martin Paul Eve, 2024-07-16 Digital spaces are saturated with metaphor we have pages sites mice and windows Yet in the world of digital textuality these metaphors no longer function as we might expect

Martin Paul Eve calls attention to the digital textual metaphors that condition our experience of digital space and traces their history as they interact with physical cultures Eve posits that digital textual metaphors move through three life phases Initially they are descriptive Then they encounter a moment of fracture or rupture Finally they go on to have a prescriptive life of their own that conditions future possibilities for our text environments even when the metaphors have become untethered from their original intent Why is whitespace white Was the digital page always a foregone conclusion Over a series of theses Eve addresses these and other questions in order to understand the moments when digital textual metaphors break and to show us how it is that our textual softwares become locked into paradigms that no longer make sense Contributing to book history literary studies new media studies and material textual studies Theses on the Metaphors of Digital Textual History provides generative insights into the metaphors that define our digital worlds a Cyborg Chris Hables Gray, Heidi Figueroa-Sarriera, Steven Mentor, 2020-10-07 Building off the highly successful The Cyborg Handbook this new collection of essays interviews and creative pieces brings together a set of compelling personal accounts about what it means to live as a cyborg in the twenty first century Human integration with complex technologies goes back to clothes cooking and language but has accelerated incredibly in the last few centuries with interest spreading among scientists coders people with sophisticated implants theorists and artists This collection includes some of the most articulate of these voices from over 25 countries including Donna Haraway Stelarc Natasha Vita More Steve Mann Amber Case Michael Chorost Moon Ribas Kevin Warwick Sandy Stone Dion Farquhar Angeliki Malakasioti Elif Ayiter Heesang Lee Angel Gordo and others Addressing topics including race gender sexuality class conflict capitalism climate change disability and beyond this collection also explores the differences between robots androids cyborgs hybrids post trans and techno humans offering readers a critical vocabulary for understanding and discussing the cyborgification of culture and everyday life Compelling interdisciplinary and international the book is a perfect primer for students researchers and teachers of cyberculture media and cultural theory and science fiction studies as well as anyone interested in the intersections between human and machine

Pierre Musso and the Network Society José Luís Garcia, 2017-01-31 This book is devoted to discussion of the views of Pierre Musso and starts with a central chapter written by Musso entitled Network Ideology from Saint Simonianism to the Internet Pierre Musso is a French philosopher and is one of the most original thinkers in the history of the network society His thought develops a critique of information and communication technologies through their imaginary and social representations and of the information society based on the network metaphor The main question on which Musso has focused his attention is how the network metaphor is one of the most powerful ways of understanding the complex societies in which we live Showing characteristic attention to detail and drawing on the history of ideas political philosophy and sociology Musso traces the genealogy of the network imaginary and points out that it did not emerge with the Internet He shows how its modern roots can be found in Henri de Saint Simon and his disciples engineers and entrepreneurs such as

Michel de Chevalier and Barth lemy Prosper Enfantin who developed channel networks railroads and the telegraphic network in France in the nineteenth century In addition to the central piece written by Musso the book includes a general introduction and six commentaries from experts on information technologies and networks It displays a wide range of perspectives from a diverse set of authors in terms of nationalities and universities as well as disciplinary backgrounds

Extimate Technology Ciano Aydin,2021-01-21 This book investigates how we should form ourselves in a world saturated with technologies that are profoundly intruding in the very fabric of our selfhood New and emerging technologies such as smart technological environments imaging technologies and smart drugs are increasingly shaping who and what we are and influencing who we ought to be How should we adequately understand evaluate and appreciate this development Tackling this question requires going beyond the persistent and stubborn inside outside dualism and recognizing that what we consider our inside self is to a great extent shaped by our outside world Inspired by various philosophers especially Nietzsche Peirce and Lacan this book shows how the values goals and ideals that humans encounter in their environments not only shape their identities but also enable them to critically relate to their present state The author argues against understanding technological self formation in terms of making ourselves better stronger and smarter Rather we should conceive it in terms of technological sublimation which redefines the very notion of human enhancement In this respect the author introduces an alternative more suitable theory namely Technological Sublimation Theory TST Extimate Technology will be of interest to scholars and advanced students working in philosophy of technology philosophy of the self phenomenology pragmatism and history of philosophy The Open Access version of this book available at http www taylorfrancis com books 9781003139409 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license
