Redefining German Health Care Michael E. Porter,Clemens Guth,2012-01-25 The German health care system is on a collision course with budget realities Costs are high and rising and quality problems are becoming ever more apparent Decades of reforms have produced little change to these troubling trends Why has Germany failed to solve these cost and quality problems The reason is that Germany has not set value for patients as the overarching goal defined as the patient health outcomes achieved per euro expended This book lays out an action agenda to move Germany to a high value system care must be reorganized around patients and their medical conditions providers must compete around the outcomes they achieve health plans must take an active role in improving subscriber health and payment must shift to models that reward excellent providers Also private insurance must be integrated in the risk pooling system These steps are practical and achievable as numerous examples in

the book demonstrate Moving to a value based health care system is the only way for Germany to continue to ensure access to excellent health care for everyone *Value Driven Healthcare and Geriatric Medicine* James S. Powers,2018-05-04 Value driven healthcare is the lasting legacy of the Affordable Care Act which had three goals to improve access to healthcare by increasing healthcare insurance coverage to improve the patient s experience and quality of care and to slow the rate of increase in healthcare costs Regardless of changes to the financing of healthcare or changes in policy value based purchasing for healthcare is to remain a constant feature of the healthcare horizon Value based purchasing is a demand side strategy to reward quality in health care delivery Value based purchasing involves cost considerations and includes the actions of employers the public sector health plans and individual consumers in making healthcare decisions Effective health care services and high performing health care providers are incentivized to provide quality outcomes and to control cost Value based purchasing drives quality metrics which are publicly reported and serve as important levers for changes in healthcare delivery Geriatric patients consume a disproportionate share of healthcare resources so CMS directs Medicare and drives geriatric healthcare models All other insurers generally model CMS Medicare guidelines Innovative geriatric care models which demonstrate improved outcomes and cost moderation are scaled and lessons learned used to create new healthcare models The best data for broader value driven healthcare comes from the geriatric models which currently have the best data available This book traces the origins of value based purchasing and current geriatric care models and synthesizes their implications for today s changing health system It also discusses healthcare accountability and risk sharing The audience includes geriatric healthcare professionals but also a wider audience interested in broader healthcare models and value driven healthcare from a policy economic and ethical perspective These include primary care physicians specialists who work with aging patients hospital administrators healthcare educators healthcare organizations and all medical professionals working with aging patients and patients affected by healthcare reform *Pocket Primary Care* Curtis R. Haas,2004-08-19 This handbook is designed to provide authoritative information to the psychologist working in primary care settings and to those seeking to learn about clinical issues in such settings Scholarly and at the same time practical this volume offers both the clinician and the researcher a wide ranging look at the contexts in which psychological services become of paramount importance to the health of the patient The handbook will cover the

prevalent psychological conditions in the primary care setting depression anxiety somatization eating disorders and alcoholism illnesses in which psychological disorders play a major role such as heart disease diabetes cancer pain management headache asthma low back pain sleep disorders among others and issues of concern to psychologists treating children ADHD disciplinary problems etc treating women abuse infertility menopause sexual dysfunction treating men workaholism alcoholism sexual dysfunction and treating the older patient death and dying cognitive impairment late life depression Other important topics include psychological side effects of common medications resistance to treatment spiritual concerns in the treatment of patients cultural differences in healing suicide AIDS prevention of disease and many others Leonard Haas is a noted authority in the area of primary care psychology and has recruited expert contributors for the 41 chapters and two appendices that make up this definitive handbook for a growing and important subspecialty in clinical psychology The work may also be used in graduate courses in health psychology *The Medical School's Mission and the Population's Health* Kerr L. White, Julia E. Connelly, 2012-12-06 Medical schools exist as part of a complex educational and health care system with affiliations to universities teaching hospitals outpatient clinics students and communities Those of us who serve as trustees and volunteers on boards and committees of medical schools carry obvious responsibilities for the performance of the institution with regard to those affiliations including those that relate to the community By what criteria and by what standards do we as trustees assess that performance For trustees of medical schools I suggest that the most important criteria are those concerned with the purpose for which the school was originally established and those that relate to the community that supports it and is served by it For a medical school performance criteria should be defined in a statement of purpose the mission of the school This mission statement should provide trustees with direction on such vital matters as the following What does the medical school seek to accomplish Whom does it serve Where is it going What is the relationship to the geographic region or other community that it may seek to serve Such questions are stated more easily than they are answered but they should be asked For trustees who are responsible for the education of students the management of faculty and the stewardship of funds they are a matter of serious concern Burden of diarrhoeal diseases Amir Abdoli, Ali Taghipour, D.
