**Race and Epistemologies of Ignorance** Shannon Sullivan, Nancy Tuana, 2012-02-01 Offering a wide variety of philosophical approaches to the neglected philosophical problem of ignorance this groundbreaking collection builds on Charles Mills's claim that racism involves an inverted epistemology an epistemology of ignorance Contributors explore how different forms of ignorance linked to race are produced and sustained and what role they play in promoting racism and white privilege They argue that the ignorance that underpins racism is not a simple gap in knowledge the accidental result of an epistemological oversight In the case of racial oppression ignorance often is actively produced for purposes of domination and exploitation But as these essays demonstrate ignorance is not simply a tool of oppression wielded by the powerful It can also be a strategy for survival an important tool for people of color to wield against white privilege and white supremacy The book concludes that understanding ignorance and the politics of such ignorance should be a key element of epistemological and social political analyses for it has the potential to reveal the role of power in the construction of what is known and provide a lens for the political values at work in knowledge practices

Ethnographic Inquiry and Lived Experience Wing-Chung Ho, 2019-01-15 Ho addresses two fundamental theoretical questions about how best to practice ethnographic inquiries to obtain qualitative experience near and shareable accounts of human living The first question is regarding the epistemology of

ethnography Ho posits that writing is epistemologically prior to the researcher's fieldwork experience in the production of ethnographic knowledge This stance is developed using the theories of hermeneutics put forward by Paul Ricoeur and Hans Georg Gadamer who both consider that once a text is produced its meaning is dissociated from the intention of the author The second question is what is the putative object that the ethnographer writes about Ho argues that lived experience *Erlebnis* offers such an ethnographic object Since the lived experience that an ethnographer experiences during fieldwork cannot be studied directly further theorizations of lived experience are necessary Ho underscores both the non discursivity and transcendence of lived experience in the lifeworld and the way power is clandestinely imbued in everyday life in shaping subjectivity and practice This theorization brings together Alfred Schutz's lifeworld theory and Michel Foucault's power knowledge nexus The result is a general theory of experience that is pertinent for ethnographic inquiries By addressing these two fundamental questions and offering novel angles from which to answer them this book offers refreshed epistemological guidelines for conducting ethnographic research for scientific reasoning More importantly this book also provides a crucial knowledge base for comprehending the current epistemological debates inherent in the production of ethnographic knowledge and furthering discussions in the field
