dimensionalists about whether the temporal profile of ordinary objects mirrors their spatial profile Are ordinary objects extended in time in the same way in which they are extended in space Do they have temporal as well as spatial parts Four dimensionalists say yes three dimensionalists say no Sattig develops an original three dimensionalist picture of the material world and argues that this picture is preferable to its four dimensionalists rivals if ordinary thought and talk are taken seriously Among the issues that Sattig discusses are the metaphysics of persistence change composition location coincidence and relativity the ontology of past present and future and the semantics of predication tense temporal modifiers and sortal terms
