Sociology of the Business Family Heiko Kleve, Tobias Koellner, 2023-09-19 The entrepreneurial family has hardly been a topic of family sociology so far. Precisely because more than two thirds of all companies are family run it is surprising that sociology has not yet discovered the entrepreneurial family as a field of research. With this book it is made the content of systematic family sociological reflections. A central point of departure for theorizing and research on entrepreneurial families is that this form of family has to deal with special social challenges because it structurally combines mixes and couples two social spheres that are generally pulled apart in the course of the modernization of society namely families as part of the private life world and companies as the formal organization of the economic system. This book is a translation of an original German edition. The translation was done with the help of artificial intelligence machine translation by the service DeepL.com. A subsequent human revision was also carried out by the authors and a native speaker.

The Politics of Military Force Frank A Stengel, 2020-12-08 The Politics of Military Force examines the dynamics of discursive change that made participation in military operations possible against the background of German antimilitarist culture Once considered a strict taboo so called out of area operations have now become widely considered by German policymakers to be without alternative The book argues that an understanding of how certain policies are made possible in this case military operations abroad and force transformation one needs to focus on processes of discursive change that result in different policy options appearing rational appropriate feasible or even self evident Drawing on Essex School discourse theory the book develops a theoretical framework to understand how discursive change works and elaborates on how discursive change makes once unthinkable policy options not only acceptable but even without alternative Based on a detailed discourse analysis of more than 25 years of German parliamentary debates The Politics of Military Force provides an explanation for 1 the emergence of a new hegemonic discourse in German security policy after the end of the Cold War discursive change 2 the rearticulation of German antimilitarism in the process ideational change norm erosion and 3 the resulting making possible of military operations and force transformation policy change In doing so the book also demonstrates the added value of a poststructuralist approach compared to the naive realism and linear conceptions of norm change so prominent in the study of German foreign policy and International Relations more generally

System-Theoretical Urban Development Manfred Rolfes, Jan Lorenz Wilhelm, 2024-02-26 In their book the authors introduce the topic of urban development from a systems theoretical perspective and provide explanatory approaches tips and methodological instructions for dealing with urban complexity Knowing full well that this sometimes amounts to squaring the circle the authors draw on applied systemic approaches and systematically couple these with epistemological currents that can be assigned to Luhmann s systems theory The social understanding of this theory of social systems represents a very good starting point for understanding urban development and urban complexity From this perspective urban development can be seen as a process in which organisations and individuals with their own expectations and perspectives are involved in which contradictions and conflicts seem inevitable and the future cannot be clearly predicted Decisions in cities and

municipalities are therefore always associated with risks irritations and unexpected consequences With the Potsdam lodestar approach Rolfes and Wilhelm present a multidimensional approach to managing urban development processes The approach distinguishes five process dimensions which are presented chapter by chapter and linked with recommendations The individual chapters are structured along guiding questions and feature appealing visualizations and numerous bonus materials

De Gruyter Handbook of Business Families Michael Carney, Marleen Dieleman, 2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The De Gruyter Handbook of Business Families brings together work from leading academics who explore emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business

Rüsen, Heiko Kleve, Arist von Schlippe, 2021-10-15 This book deals with dynastic business families Such families are characterized by a circle of owners comprising more than 50 family members which typically face specific issues and challenges for which there has been little research knowledge and practical approaches until now The book presents results and findings from a special research project on big family management where 7 representatives of dynastic families from Germany were studied over a 3 year period The result was the identification of six topic areas that management in these business families has to deal with At the same time the study observes that dynastic business families hardly follow the logic of classic families anymore but can rather be understood as networks with common family backgrounds The study also reveals that a large number of business families are heading for large shareholder groups due to changed inheritance practices The contents outlined here provide an orientation framework for the growing business family *Die Erfindung der modernen Demokratie* Joachim Raschke, 2020-05-13 Zum ersten Mal wird hier die ganz unwahrscheinliche Entstehung moderner Demokratie aus der Perspektive der Handelnden erzählt und analysiert Nicht als Masterplan den es nicht gab sondern als innovatives Stützwerk in vielen Ländern oft mit anderen als demokratischen Intentionen Die Rede von einem Mutterland der Demokratie ist irreführend Erst später wuchs zusammen was für uns selbstverständlich zur Demokratie gehört Die krummen Wege schlossen auch Alternativen Irrwege und Sackgassen mit ein Diese spannende Erfindungsgeschichte hilft in der heutigen Demokratiekrise die unabdingbaren Bausteine moderner Demokratie besser zu verstehen und stark zu machen Praktischer ansetzen können so auch Reformen und eine Demokratisierung der Demokratie Das Spannungsverhältnis zwischen sozialer Ungleichheit und dem Anspruch auf politische Gleichheit ist eine Schlüsselfrage der modernen Demokratie Der Inhalt Von der antiken zur modernen Demokratie Innovationen Pfade Demokratie als System Zeittafel und Fallstudien der Innovationen Die Vergangenheit auf dem Prüfstand Konsequenzen in der Demokratiekrise Der Autor Prof Dr Joachim Raschke ist Politikwissenschaftler und Mitgesellschafter der Agentur für Politische Strategie APOS **Corporate Universities and E-Learning** Wolfgang Kraemer, Michael Müller, 2013-07-02 Der Einsatz der neuen Medien und des
