Nahin,2002-11-13 Acclaimed biography of the pioneer of modern electrical theory featuring a new preface

by author He was a man who often was incapable of conducting himself properly in the most elementary social interactions His only continuing contacts with women were limited to his mother nieces and housekeepers He was a man who knew the power of money and desired it but refused to work for it preferring to live off the sweat of his family and long suffering friends whom he often insulted even as they paid his bills Excerpt from the book This then was Oliver Heaviside a pioneer of modern electrical theory Born into a low social class of Victorian England Heaviside made advances in mathematics by introducing the operational calculus in physics where he formulated the modern day expressions of Maxwell s Laws of electromagnetism and in electrical engineering through his duplex equations With a new preface by the author this acclaimed biography will appeal to historians of technology and science as well as to scientists and engineers who wish to learn more about this remarkable man **Communications Lawyer** ,1992 **Patently Contestable** Stathis Arapostathis,Graeme Gooday,2013 An examination of the fierce disputes that arose in Britain in the decades around 1900 concerning patents for electrical power and telecommunications Late nineteenth century Britain saw an extraordinary surge in patent disputes over the new technologies of electrical power lighting telephony and radio These battles played out in the twin tribunals of the courtroom and the press In *Patently Contestable* Stathis Arapostathis and Graeme Gooday examine how Britain s patent laws and associated cultures changed from the 1870s to the 1920s They consider how patent rights came to be so widely disputed and how the identification of apparently solo heroic inventors was the contingent outcome of patent litigation Furthermore they point out potential parallels between the British experience of allegedly patentee friendly legislation introduced in 1883 and a similar potentially empowering shift in American patent policy in 2011 After explaining the trajectory of an invention from laboratory to Patent Office to the court and the key role of patent agents Arapostathis and Gooday offer four case studies of patent centered disputes in Britain These include the mostly unsuccessful claims against the UK alliance of Alexander Graham Bell and Thomas Edison in telephony publicly disputed patents for technologies for the generation and distribution of electric power challenges to Marconi s patenting of wireless telegraphy as an appropriation of public knowledge and the emergence of patent pools to control the market in incandescent light bulbs *The Intimate Screen* Jason Jacobs,2000 This book explores the formative period of British television drama concentrating on the years 1936-55 It examines the continuities and changes of early television drama and the impact this had upon the subsequent golden age In particular it questions the caricature of early television drama as photographed stage plays and argues that early television pioneers in fact produced a diverse range of innovative drama productions using a wide range of techniques It also explores the often competing definitions about the form and aesthetics of early television drama both inside and outside the BBC Given the absence of an audio visual record of early television drama the book uses written archive material in order to reconstruct how early television drama looked and how it was considered by producers and critics whilst also offering a critical examination of surviving dramas such as Rudolph Cartier s *Nineteen Eighty Four* **British Patents of**
