Goldman,2020-05-28 This innovative book finally takes seriously the need for anthropologists to produce in depth ethnographies of children s play In examining the subject from a cross cultural perspective the author argues that our understanding of the way children transform their environment to create make believe is enhanced by viewing their creations as oral poetry The result is a richly detailed thick description of how pretence is socially mediated and linguistically constructed how children make sense of their own play how play relates to other imaginative genres in Huli life and the relationship between play and cosmology Informed by theoretical approaches in the anthropology of play developmental and child psychology philosophy and phenomenology and drawing on ethnographic data from Melanesia the book analyzes the sources for imitation the kinds of identities and roles emulated and the structure of collaborative make believe talk to reveal the complex way in which children invoke their experiences of the world and re invent them as types of virtual reality Particular importance is placed on how the figures of the ogre and trickster are articulated The author demonstrates that while the concept of imagination has been the cornerstone of Western intellectual traditions from Plato to Postmodernism models of child fantasy play have always intruded into such theorizing because of children s unique capacity to throw into relief our understanding of the relationship between representation and reality
