Einstein's famous $E=mc^2$ theory is true if the universe was really created from a big bang or about the nature of black holes then you'll want to read this book. Kok Fah Chong explores the latest discoveries in astronomy and physics including how the spinning gravitational effects of a star suggest that the universe contains many exoplanets and he also reveals why that is significant. He examines topics such as how photons can travel across intergalactic distances, why more black holes emerge as the universe expands, why all galaxies will eventually slow down, and how the light of the past universe is catching up with us. He also reveals why all celestial bodies will eventually implode toward the center of the universe, which will result in a scene beyond our imagination. Celebrate the wonders of our universe and stay up to date on some of science's latest most interesting discoveries with *The Unification Theory* U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973 United States. Bioremediation and Phytoremediation for Sustainable Soil Management Junaid Ahmad Malik, 2022-01-31 This edited volume deals with the understanding of the issues concerned with the pollution caused by toxic elements and heavy metals and their impacts on the different agro ecosystems as well as the techniques involved in sustainable remediation and amelioration of polluted soils. Furthermore, the book is a detailed comprehensive account for the treatment technologies from unsustainable to sustainable, which includes chapters prepared by professionals with expertise in environmental microbiology, biotechnology, bioremediation, and environmental engineering. It focuses on the characterization, reclamation, bioremediation, and phytoremediation of polluted soils. The research presented also highlights some of the significantly important plant and microbial species involved in remediation, the physiology, biochemistry, and the mechanisms of remediation by various plants and microbes, and suggestions for future improvement of bioremediation technology. It offers insights into the current focus and recent advances in bioremediation and green technology applications for sustainable soil management. *Science Foundations: Physics* Bryan Milner, 2019-01-15 This title was first published in 2001. The new edition of *Science Foundations* provides comprehensive coverage of single and double award GCSE science. It is fully revised and updated to match the new GCSE specifications for teaching from September 2001. It contains all the material required for the foundation and higher tiers, with clear progression and explicit differentiation. Higher tier only material is clearly marked in separate spreads. The language level is carefully controlled, with illustrations and layout specifically designed to make the concepts accessible. There are frequent opportunities for students to confirm their understanding of each key idea as it is introduced via short questions and summary passages on each spread. The books include guidance for students on how to prepare for and answer their GCSE examinations and a glossary of key words for ease of reference.
