Scientific Methods and Cultural Heritage Gilberto Artioli, 2010-07-08 Scientific techniques developed in materials science offer invaluable information to archaeology art history and conservation A rapidly growing number of innovative methods as well as many established techniques are constantly being improved and optimised for the analysis of cultural heritage materials The result is that on the one hand more complex problems and questions can be confronted but on the other hand the required level of technical competence is widening the existing cultural gap between scientists and end users such as archaeologists museum curators art historians and many managers of cultural heritage who have a purely humanistic background The book is intended as an entry level introduction to the methods and rationales of scientific investigation of cultural heritage materials with emphasis placed on the analytical strategies modes of operation and resulting information rather than on technicalities The extensive and updated reference list should be a useful starting point for further reading Students and researchers from the humanities approaching scientific investigations should find it useful as well as scientists applying familiar techniques and methods to unfamiliar problems related to cultural heritage

Handbook of X-ray Imaging Paolo Russo, 2017-12-14 Containing chapter contributions from over 130 experts this unique publication is the first handbook dedicated to the physics and

technology of X ray imaging offering extensive coverage of the field This highly comprehensive work is edited by one of the world s leading experts in X ray imaging physics and technology and has been created with guidance from a Scientific Board containing respected and renowned scientists from around the world The book s scope includes 2D and 3D X ray imaging techniques from soft X ray to megavoltage energies including computed tomography fluoroscopy dental imaging and small animal imaging with several chapters dedicated to breast imaging techniques 2D and 3D industrial imaging is incorporated including imaging of artworks Specific attention is dedicated to techniques of phase contrast X ray imaging The approach undertaken is one that illustrates the theory as well as the techniques and the devices routinely used in the various fields Computational aspects are fully covered including 3D reconstruction algorithms hard software phantoms and computer aided diagnosis Theories of image quality are fully illustrated Historical radioprotection radiation dosimetry quality assurance and educational aspects are also covered This handbook will be suitable for a very broad audience including graduate students in medical physics and biomedical engineering medical physics residents radiographers physicists and engineers in the field of imaging and non destructive industrial testing using X rays and scientists interested in understanding and using X ray imaging techniques The handbook s editor Dr Paolo Russo has over 30 years experience in the academic teaching of medical physics and X ray imaging research He has authored several book chapters in the field of X ray imaging is Editor in Chief of an international scientific journal in medical physics and has responsibilities in the publication committees of international scientific organizations in medical physics Features Comprehensive coverage of the use of X rays both in medical radiology and industrial testing The first handbook published to be dedicated to the physics and technology of X rays Handbook edited by world authority with contributions from experts in each field

Forensic Document Examination in the 21st

Century Miriam Angel,Jan Seaman Kelly,2020-12-16 Forensic Document Examination in the 21st Century covers the latest technology and techniques providing a complete resource on contemporary issues and methods in forensic document examination Forensic document examiners provide their findings as expert testimony in court Due to rapid changes in technology including digital documents printing and photocopying capabilities and more there is a great need for this up to date reference The examination of documents can include comparison of handwriting or hand printing detection of alterations or photocopier and computer manipulation restoration or decipherment of erased and obliterated writing visualization of latent impressions the identification of printing processes and differentiation of inks Computer generated documents are prevalent and electronically captured signatures are becoming more widespread meaning the knowledge of advances in technology and adoption of new validated techniques and methods of document examination are crucial to the reliability of forensic opinions Forensic Document Examination in the 21st Century includes the latest research on the subject and with contributions from leading experts on their various areas of expertise The book will be a welcome addition to the literature and support the foundational basis for methods and procedures for use it expert testimony in court serving as a

resource for forensic document examiners trainees and those in the criminal and legal communities who use the services of expert document examiners and witnesses

The Explicit Material Hanna B. Hölling, Francesca G. Bewer, Katharina Ammann, 2019-05-20 The Explicit Material gathers varied perspectives from the discourses of conservation curation and humanities disciplines to focus on aspects of heritage transmission and material transitions The authors observe and explicate the myriad transformations that works of different kinds manuscripts archaeological artefacts video art installations performances film and built heritage may undergo changing contexts changing matter changing interpretations and display Focusing on the vibrant materiality of artworks and artefacts The Explicit Material puts an emphasis on objects as complex constructs of material relations By so doing it announces a shift in sensibilities and understandings of the significance of objects and the materials they are made of and on the increasingly blurred boundaries between the practices of conservation and curation

Physical Techniques in the Study of Art, Archaeology and Cultural Heritage, 2006-05-02 The first of its kind this series is devoted to the use of physical principles in the study and scientific conservation of objects with cultural heritage significance It begins with a review of the modern museum which discusses new techniques employed in the conservation of museum artifacts such as X ray tomography and other techniques used to study Egyptian mummies bones and mineralization of bones in the archaeological context and the degradation of parchment All of these topics and techniques are essential for the preservation of our history This includes finding ways to preserve parchment documents and letters which much of our written heritage is documented on so that it can be used and understood for generations to come This book is a must have for any museum as well as any university that teaches or employs the techniques discussed Written in a style that is readily understandable by conservation scientists archaeologists museum curators and students Provides an introduction to the advanced fields of synchrotron radiation science neutron science and computed tomography Outstanding review of the use of modern technology to study museum and archaeological artifacts Offers solutions through advanced scientific techniques to a wide range of problems facing museum staff

The Oxford Handbook of Archaeological Ceramic Analysis Alice M. W. Hunt, 2017 This volume draws together topics and methodologies essential for the socio cultural mineralogical and geochemical analysis of archaeological ceramic one of the most complex and ubiquitous archaeomaterials in the archaeological record It provides an invaluable resource for archaeologists anthropologists and archaeological materials scientists

X-rays for Archaeology M. Uda, G. Demortier, I. Nakai, 2005-12-27 The application of X rays to objects of archaeology and the attempt to gain insight into both construction and chemical composition in a non destructive manner date back to the days of the discovery of radiation Nowadays X ray techniques such as X ray fluorescence and diffraction are standard tools The book contains scientific data i e in situ measurement data taken with portable XRF and XRD and fine data taken with accelerating ion beams and synchrotron radiations and with their explanation Results obtained by traditional scientific methods are also reviewed The book contains experimental data taken both from monuments in the field and

exhibits in museums i e ancient Egyptian wall painting pigments ancient Egyptian wooden statues ancient Egyptian mummies ancient Greek funerary monuments Cypriot ceramics Medieval Lyubliana and Venetian glass Romanian ceramics ancient Near East clay old Japanese porcelain pre Hispanic items from ancient America ancient Chinese underglaze red blue and white porcelain Chinese celadon Phoenician cosmetics glazes ancient gold and silver coins gold jewelleryes gold alloys corroded metals gemstones ruby emerald and garnet painting pigments pottery bronze obsidian stucco turquoise and so on This discussion between natural scientists and archaeologists predicts the future direction of archaeology *Geomaterials in Cultural Heritage* Marino Maggetti, Bruno Messiga, 2006 Papers from a session of the 32nd International Geological Congress **Corrosion and Conservation of Cultural Heritage Metallic Artefacts** P Dillmann, D Watkinson, E Angelini, A Adriaens, 2013-07-31 The conservation of metallic archaeological and historic artefacts is a major challenge whether they are ancient bronzes or relics of our more recent industrial past Based on the work of Working Party 21 Corrosion of Archaeological and Historical Artefacts within the European Federation of Corrosion EFC this important book summarises key recent research on analytical techniques understanding corrosion processes and preventing the corrosion of cultural heritage metallic artefacts After an introductory part on some of the key issues in this area part two reviews the range of analytical techniques for measuring and analysing corrosion processes including time resolved spectroelectrochemistry voltammetry and laser induced breakdown spectroscopy Part three reviews different types of corrosion processes for a range of artefacts whilst part four discusses on site monitoring techniques The final part of the book summaries a range of conservation techniques and strategies to conserve cultural heritage metallic artefacts Corrosion and conservation of cultural heritage metallic artefacts is an important reference for all those involved in archaeology and conservation including governments museums as well as those undertaking research in archaeology and corrosion science Summarises key research on analytical techniques for measuring and analysing corrosion processes Provides detailed understanding of corrosion processes and corrosion prevention Discusses on site monitoring techniques *Corrosion and conservation of cultural heritage metallic artefacts* D.A. Scott, 2013-07-31 Metallographic investigations may be an essential component in the search for authenticity and fabrication technology Assessing how an artefact is made may involve metallographic examination usually entailing the removal of a small sample from the object concerned Examples of the use of metallography are discussed with reference to copper alloys high tin bronzes Chinese bronze mirrors copper plaques iron and steels and plated or coated metals such as depletion gilded surfaces or those covered with gold foil or other metals The different types of features which metallography can reveal concerning ancient metallic structures are briefly discussed with several colour photomicrographs which illustrate the features described in this chapter The importance of metallography as one component of the scientific tools to aid in the determination of authenticity of ancient metallic artefacts is stressed and an example given of old electrotypes from the Victoria and Albert Museum Important literature references are provided to

direct the reader to more detailed studies on the subject *In Situ Assessment of Structural Timber* Bohumil Kasal, Thomas Tannert, 2011-03-10 Wood is one of the most intriguing structural materials and the only one that is truly renewable Along with stone wood is the oldest structural material on the planet and has been extensively used throughout human history Due to its aesthetical value and positive environmental impact wood has experienced a renaissance in construction As a biodegradable hygroscopic non isotropic material wood presents special challenges for a professional and requires through knowledge ranging from biology to continuum mechanics This state of the art report reflects the current knowledge in the area of in situ assessment of the physical and mechanical properties of wood structures Nondestructive semi destructive and destructive methods are described in a systematic manner where technology equipment and limitations are discussed Some of the discussed methods are used in other materials such as masonry and concrete Most of the methods however are specific to wood and special qualifications are required to understand and apply these methods effectively Existing methods are constantly improved and new methods are being developed This report includes methods that are used in practice or have shown significant promise and have a body of knowledge that supports statements made in this report This is a useable tool for professionals researchers educators and students **Scientific Investigation of Copies, Fakes and Forgeries**

Paul Craddock, 2009-02-04 The faking and forgery of works of art and antiquities is probably now more extensive than ever before The frauds are aided by new technologies from ink jet printers to epoxy resins and driven by the astronomic prices realised on the global market This book aims to provide a comprehensive survey of the subject over a wide range of materials emphasising how the fakes and forgeries are produced and how they may be detected by technical and scientific examination The subject is exemplified by numerous case studies some turning out not to be as conclusive as is sometimes believed The book is aimed at those likely to have a serious interest in these investigations be they curator collector conservator or scientist Paul Craddock has recently retired from the Department of Conservation Documentation and Science at the British Museum where he was a materials scientist **Science for Cultural Heritage** Claudio Tuniz, 2010 The aim of the conference was to discuss the contribution of physics and other sciences in archaeological research and in the preservation of cultural heritage Considering that the mission of ECSAC is to promote the interaction among the diverse cultures of the peoples from the lands on the Adriatic and Ionian seas it is apt that the major themes were related to the rich history and pre history of this region from Greek Roman archaeology on the eastern Adriatic coasts to the palaeoanthropology of the Neanderthals of the Vindija caves in Croatia from the Roman city of Aquileia to the pleistocenic cave of Homo heidelbergensis in the Karst of Visogliano Trieste from the Roman ship Julia Felix of the Grado lagoon to the ancient bronze Apoxyomenos of the Veli Loscaron in waters A variety of scientific disciplines provide tools and methods that are crucial in reconstructing humanity's past and in preserving material remains that witness the evolution of human culture Geology reconstructs the history of terrestrial environments critical for the evolution and dispersal of humans Chemistry explains

reactions that modify materials left by human activities including the destructive effects of pollution Biology has a critical role in archaeology particularly with the recent advance in analysis of DNA in ancient organic materials

Non-destructive Micro Analysis of Cultural Heritage Materials K. Janssens,R. Van Grieken,2004-11-26 This book provides the scientific and technical background materials of non destructive methods of microscopic analysis that are suitable for analysing works of art museum pieces and archeological artefacts Written by experts in the field this multi author volume contains a number of case studies illustrating the value of these methods The book is suited to natural scientists and analysts looking to increase their knowledge of the various methods that are currently available for non destructive analysis It is also the perfect resource for museum curators archaeologists and art historians seeking to identify one or more suitable methods of analysis that could solve material related problems Chemical Analysis in Cultural Heritage Luigia Sabbatini,Inez Dorothé van der Werf,2020-02-24 Chemical Analysis provides non invasive and micro analytical techniques for the investigation of cultural heritage materials The tools and techniques discussed by experts in the field are of universal sensitive and multi component nature Paleoimaging Ronald G. Beckett,Gerald J. Conlogue,2009-09-21 Medical and industrial imaging methods have come to be recognized as powerful tools for documentation and data collection in many nontraditional settings In Paleoimaging Field Applications for Cultural Remains and Artifacts two of the most preeminent experts in the field provide an in depth examination of a range of imaging techniques and explain how these techniques can be applied to all aspects of forensic and archaeological analysis The first part of the book examines paleoimaging multimodalities highlighting the advantages and disadvantages of each imaging technique in different scenarios The authors explore photography conventional radiography endoscopy and various forms of computer based imaging Next they present methodological and procedural standards for the various imaging techniques They also demonstrate how multimodal imaging can assist nondestructive data collection of non biological cultural artefacts A final section addresses radiation safety and field safety concerns Case studies tables and templates of forms for documentation of findings enhance the text with practical information Filled with over 380 images this book is supplemented with an accompanying downloadable resource in which the authors draw from their global experience in the paleoimaging of cultural remains and artefacts offering a view of the diverse environments in which field paleoimaging is conducted The breadth of the authors expertise and the rich images contained in the book and downloadable resources make this resource an essential reference for those who seek to explore the mysteries of the past *Advanced Mechatronics Solutions* Ryszard Jabłoński,Tomas Brezina,2015-11-02 Focusing on the most rapidly changing areas of mechatronics this book discusses signals and system control mechatronic products metrology and nanometrology automatic control robotics biomedical engineering photonics design manufacturing and testing of MEMS It is reflected in the list of contributors including an international group of 302 leading researchers representing 12 countries The book is intended for use in academic

government and industry R D departments as an indispensable reference tool for the years to come This volume can serve a global community as the definitive reference source in Mechatronics The book comprises carefully selected 93 contributions presented at the 11th International Conference Mechatronics 2015 organized by Faculty of Mechatronics Warsaw University of Technology on September 21 23 in Warsaw Poland
