Radioisotope Laboratory Techniques 2nd Edition:

Radioisotope Laboratory Techniques Ronald Arthur Faires, Bertram Hasloch Parks, 1958 *Radioisotope Experiments in High School Biology* Evelyn M. Hurlburt, 1966 Special Sources of Information on Isotopes F. E. McKinney, 1968 **Methods of Animal Experimentation** William I. Gay, 2013-09-12 *Methods of Animal Experimentation* Volume II provides information on the most common methods for using animals as tools in the search for new biological knowledge. The techniques described will facilitate the most efficient use of research animals and provide guidelines for their utmost comfort and welfare. The text is arranged according to specific research methods rather than to organ system or disease category. This approach gives the reader a broad view of the techniques involved in specific fields and describes the range of usefulness of these techniques. The chapters in the present volume deal with special techniques which have been demonstrated to be distinct useful methods for using laboratory animals as a basic biomedical research tool. The descriptions of both fundamental and well developed techniques of animal experimentation in various research fields should be useful to graduate students and experienced scientists who must consider variations in research approaches. The book is a source of information for the scientist administrator who is frequently confronted with different proposed approaches to biological research projects utilizing animals. Radioisotopes and Nuclear Techniques in the Pharmaceutical and Allied Industries John Edward Christian, William F. Bousquet, 1960 **TID.**, 1967 **Special Sources of Information on Isotopes** U.S. Atomic Energy Commission. Division of Isotopes Development, U.S. Atomic Energy Commission, 1962 *Nuclear and Radiochemistry* Karl Heinrich Lieser, 2008-09-26 This handbook gives a complete and concise description of the up to date knowledge of nuclear and radiochemistry and applications in the various fields of science. It is based on teaching courses and on research for over 40 years. The book is addressed to any researcher wishing sound knowledge about the properties of matter be it a chemist a physicist a medical doctor a mineralogist or a biologist. They will all find it a valuable source of information about the principles and applications of nuclear and radiochemistry. Research in radiochemistry includes Study of radioactive matter in nature investigation of radioactive transmutations by chemical methods chemistry of radioelements etc. Applications include Radionuclides in geo and cosmochemistry dating by nuclear methods radioanalysis Mossbauer spectroscopy and related methods behaviour of natural and man made radionuclides in the environment dosimetry and radiation protection. All subjects are presented clearly and comprehensibly and in logical sequence. Detailed derivations of equations are avoided and relevant information is compiled in tables. The recent edition of the multi coloured Karlsruhe Chart of the Nuclides is included. Clearly a standard work by an author with extensive experience in research and teaching.

Manganese in Soils and Plants R.D. Graham, R.J. Hannam, N.C. Uren, 2012-12-06 Sixty years ago at the Waite Agricultural Research Institute G Samuel a plant pathologist and C S Piper a chemist published their conclusion that the cause of roadside take all a disease of oats was manganese deficiency This report together with the concurrent and independent studies of W M Carne in Western Australia were the first records of manganese deficiency in Australia and came only six years after McHargue's paper which is generally accepted as the final proof of the essentiality of this element There must have been a few doubts for some people at the time however as the CAB publication *The Minor Elements of the Soil* 1940 expressed the view that further evidence to this effect was provided by Samuel and Piper Their historic contributions are recognised by the International Symposium on Manganese in Soils and Plants as it meets on the site of their early labours to celebrate the 60th anniversary This year Australians also acknowledge 200 years of European settlement in this country and so the Symposium is both a Bicentennial and a diamond jubilee event which recognises the impact of trace elements on agricultural development in

Australia In a broader sense a symposium such as this celebrates as it reviews the efforts of all who over the ages have contributed to our knowledge of manganese in soils and plants *Source Book of Educational Materials for Nuclear Medicine* ,1981 **Man-Made and Natural Radioactivity in Environmental Pollution and Radiochronology** Richard Tykva,Dieter Berg,2004-01-31 The goal of this book is to examine the complex state of radioactivity in the environment and to understand the interplay of its two principal sources man made and natural The text examines human contributions to release of radionuclides with an eye to future reductions and assesses natural occurrences in an evaluation of baseline radioactivity **Nuclear Science Abstracts** ,1975 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1982 *Nuclear and Radiochemistry, 2 Volume Set* Jens-Volker Kratz,Karl Heinrich Lieser,2013-12-04 The third edition of this classic in the field is completely updated and revised with approximately 30% new content so as to include the latest developments The handbook and ready reference comprehensively covers nuclear and radiochemistry in a well structured and readily accessible manner dealing with the theory and fundamentals in the first half followed by chapters devoted to such specific topics as nuclear energy and reactors radiotracers and radionuclides in the life sciences The result is a valuable resource for both newcomers as well as established scientists in the field *Radioecological Concentration Processes* Bertil Åberg, Frank P. Hungate,2013-10-22 Radioecological Concentration Processes present the overall model for problems of environmental contamination in terms of system analysis This book discusses the major investigational approaches to study of environmental contamination with radioactivity Organized into 90 chapters this book starts with an overview of the results of the experimental investigations into the distribution of strontium in soils and the uptake of this nuclide by plants This text then presents the comparison of the distribution character in different soil types which shows clearly that ploughed soils differ from virgin soils by a more uniform and similar character of radioisotope distribution in them Other chapters consider the migration of ⁹⁰Sr in the mostly podzolic and water logged soils of moderately northern latitudes of Russia The final chapter deals with the experiments with the shore crab *Carcinus maenas* which shows that the crab is able to regulate the zinc content of its body against changes in the zinc content of food or of surrounding water Biochemists will find this book useful **New Scientist** ,1969 *Quality Technology Handbook* R S Sharpe,J West,D S Dean,2017-03-28 Quality Technology Handbook Fourth Edition offers a wide discussion on technology and its related subtopics After giving some information on its background content and authors the book then informs the readers about the quality problem check list and enumerates the questions one has to ask to ensure that a problem will be solved This part is followed by a discussion on non destructive testing NDT and the several committees formed for it among which are the British National Committee and the Harwell NDT Center The book also includes information on two organizations that are closely related to the topic the Institute of Quality Assurance IQA and The Welding Institute TWI A directory of international organizations related to quality assurance and non destructive testing is provided in the latter part of the text The book

serves as valuable reference to undergraduates or postgraduates of courses that are related to science and technology
