Rails To The Tableland:

Rails to the Tableland Ray F. Ellis, 1976 **Tablelands of North Queensland** Queensland Government Intelligence and Tourist Bureau, Government intelligence & tourist bureau, 1918 **Shared Landscapes** Rodney Harrison, 2004 The heritage of the pastoral industry stands as an integral symbol of identity for rural communities both black and white in New South Wales Modern changes in pastoral land management infrastructure and technology combined with broader land use changes and increased community interest in the conservation and rehabilitation of former grazing lands has meant that many former pastoral properties have been abandoned or acquired for other uses Tracking the history of these land use changes Shared Landscapes presents new ways of understanding historic heritage in settler societies through cross disciplinary case studies that examine the heritage of the pastoral industry in two national parks Assessing its current state of interpretation and management in New South Wales Rodney Harrison shows that pastoral heritage is more than just woolsheds and homesteads the showpieces of white male settler colonial economies Pastoral heritage is the product of the mutual histories of Aboriginal and settler Australians It is a form of heritage that is both in and a part of the landscape His archaeological approach to the heritage of the pastoral industry involves both recording sites and revealing attachments to community heritage demonstrating that writing shared histories and celebrating shared heritage has the creative power to reconcile Aboriginal and settler Australians in powerful and positive ways Hard Road West Keith Heyer Meldahl, 2012-01-11 The dramatic journeys of the 19th century Gold Rush come to life in this geologist's tour of the American West and the events that shaped the land In 1848 news of the discovery of gold in California triggered an enormous wave of emigration toward the Pacific The dramatic terrain these settlers crossed is so familiar to us now that it is hard to imagine how frightening even godforsaken its sheer rock faces and barren deserts once seemed to them Hard Road West brings their perspective vividly to life weaving together the epic overland journey of the covered wagon trains and the compelling story of the landscape they encountered Taking readers along the 2 000 mile California Trail Keith Meldahl uses settler's diaries and letters as well as his own experiences on the trail to reveal how the geology and geography of the West shaped our nation's westward expansion He guides us through a landscape of sawtooth mountains following the meager streams that served as lifelines through an arid land all the way to California itself where colliding tectonic plates created breathtaking scenery and planted the gold that lured travelers west in the first place Alternates seamlessly between vivid accounts of the 19th century journey and lucid explanations of the geological events that shaped the landscape traveled Library Journal **Rough-Hewn Land** Keith Heyer Meldahl, 2013-05 Rough Hewn Land tells the geologic story of the American West the story of its rocks rivers mountains earthquakes and mineral wealth including gold It tells it by taking you on a 1000 mile long field trip across the rough side of the continent from the California coast to the Rocky Mountains This book puts you on the outcrop geologic hammer in hand to explore the evidence for how the spectacular rough hewn lands of the West came to be When North

America broke free from Eurasia and Africa some 200 million years ago it triggered a cascade of violent geologic events that shaped the West we see today As the west moving continent crunched across the seabed of the ancient Pacific islands and assorted pieces of ocean floor collected against its prow to build California and plant gold there too Meanwhile mountains squeezed upward from California to Colorado and vast quantities of molten rock seeded the crust with precious metals while spewing volcanic fire across the land Later the land stretched like an accordion to form the washboard like Basin and Range province and Great Basin within it while California began to crackle along the San Andreas fault Throughout the West today a near constant drumroll of earthquakes testifies to a world still reshaping itself in response to the ceaseless movements of the Earth s tectonic plates Rough Hewn Land weaves these stories into the human history of the West As we follow the adventures of John C Fr mont Mark Twain the Donner party and other historic characters we see how geologic forces have shaped human experience just as they direct the fate of the West today **Queensland Agricultural Journal** ,1924

Labour History ,1997 Joint Volumes of Papers Presented to the Legislative Council and Legislative Assembly New South Wales. Parliament,1910 Includes various departmental reports and reports of commissions Cf Gregory Serial publications of foreign governments 1815 1931 **Handbook for New South Wales** British Association for the Advancement of Science,1914 Pp 464 485 The Aborigines of New South Wales by W W Thorpe **Rails** Barry Taylor,2010-08-30 This is a guide to rails a relatively homogeneous family of birds spread throughout the world Barry Taylor and Ber van Perlo have described and illustrated 145 species of rails including two that are newly described and also ten that are recently extinct and two that are almost certainly extinct The book based on up to date references and on new observations is the first to give comprehensive information on field identification including voice covering all species and races for which details are known It is also the first to provide descriptions of the immature and juvenile plumages of many species The authors provide a detailed summary of current knowledge of all aspects of rail biology and their often complex behaviour social structure and family life They explain how such apparently poorly flying birds can undertake intercontinental migrations and are such widespread and successful colonists of remote oceanic islands They also discuss the remarkable ease and speed with which species on such islands have evolved into flightless forms in the absence of predators a fact that has led to the rapid extinction of numerous island taxa following the arrival of man Rail habitats are fast disappearing say the authors and many rails become endangered before enough is known about them to plan effective conservation measures The book provides information on distribution status habitat requirements and current threats and it gives conservation priorities for threatened species USA by Rail John Pitt,2008 Fully updated to take into account route and timetable changes this is the only book specifically designed for US train travel Rugged charm sets the train apart from more mundane means of transport and its low environmental impact is of particular current interest Pampered by helpful attendants you can travel from coast to coast explore the Rocky Mountains and ride directly alongside two oceans Less

expensive than flying and more comfortable than the bus the train keeps you relaxed and in touch with an ever changing landscape as the world becomes a framed but moving picture **New Zealand Railways Magazine** ,1929 **Queensland Mineral Index and Guide** Benjamin Dunstan,1913 **Iron Age** ,1914 Engineering ,1867 **Proceedings of the Parliament of South Australia** South Australia.
