From pragmatic beginnings to private sector involvement, state regulation and nationalization, each era reflects policy changes. Beyond factual accuracy, the book delves into the influence of public policy on railways. Authors navigate complexities of policy choices and socio-economic impact, offering multi-dimensional insights into Argentina's history. Paddy Farrell's translation ensures resonance in English. The authors invite readers to uncover Argentina's rail story, bridging language and culture to connect with global history.

The Light Railways of Britain & Ireland Anthony Burton, John Scott-Morgan, 2015-11-30. First published in 1985 by Moorland Press. The *Light Railways of Britain & Ireland* has remained unavailable for more than twenty-five years until now. Re-released by Pen Sword, this is a thorough and engaging book that covers in depth the fascinating story of Britain's last railway development: the rural light railways constructed as a result of the Light Railways Act 1896. Rigorously detailed, it charts the overall history of the last great railway boom in Britain: the light railway boom from 1896 to the beginning of the Great War in 1914. During this period, a large number of narrow and standard gauge lines were constructed in both Britain and Ireland in order to serve and open up areas in both countries that at the time lacked adequate transport links. This book tells the story of how these lines were constructed and why, in most cases, they eventually failed due to post-First World War road competition. Authored by two highly acclaimed writers of transport history, this is a true testament to and a timely reminder of Britain's last railway development.
