Railways In The Victorian Economy Studies In Finance And Economic Growth:

Railways in the Victorian Economy M. C. Reed,1968 *British Economic and Social History* R. C. Richardson,William Henry Chaloner,1996 **The World's First Railway System** Mark Casson,2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography **The Origins of Railway Enterprise** Maurice W. Kirby,M. W. Kirby,2002-07-04 This book argues for the significance of the Stockton and Darlington Railway in Britain's industrialisation **The Civil Engineering of Canals and Railways before 1850** Michael M. Chrimes,2017-09-08 Between 1750 and 1850 the British landscape was transformed by a transport revolution which involved engineering works on a scale not seen in Europe since Roman times While the economic background of the canal and railway ages are relatively well known and many histories have been written about the locomotives which ran on the railways relatively little has been published on how the engineering works themselves were made possible This book brings together a series of papers which seek to answer the questions of how canals and railways were built how the engineers responsible organised the works how they were designed and what the role of the contractors was in the process *Shareholder Democracies?* Mark Freeman,Robin Pearson,James Taylor,2012 And as they became more prevalent the issue of internal governance became more pressing [The Global Economic System](#) I. Wallace,2002-09-26 The author provides a treatment of world economic geography as a whole He sets out the historical context of the modern world along with the principal philosophies that have shaped our study of it and identifies the importance of the biophysical environment as well as cultural and political settings for economic activity *Capital, Entrepreneurs and Profits* Richard Davenport-Hines,2012-11-12 First Published in 1990

This volume starts with an introduction to the first works on business history since 1924 looking at the work of Francis Hyde in Liverpool and Harvard This is a collection of articles reprinted from the first 25 year of the journal Business History which was bi annually available until in 1981 when it increased to three issues The contributions demonstrate that the interpretation of business history has been very wide falling into the area of economic history

The Origins of Modern Financial Crime Sarah Wilson,2014-06-05 The recent global financial crisis has been characterised as a turning point in the way we respond to financial crime Focusing on this change and crime in the commercial sphere this text considers the legal and economic dimensions of financial crime and its significance in societal consciousness in twenty first century Britain Considering how strongly criminal enforcement specifically features in identifying the post crisis years as a turning point it argues that nineteenth century encounters with financial crime were transformative for contemporary British societal perceptions of crime and its perpetrators and have lasting resonance for legal responses and societal reactions today The analysis in this text focuses primarily on how Victorian society perceived and responded to crime and its perpetrators with its reactions to financial crime specifically couched within this It is proposed that examining how financial misconduct became recognised as crime during Victorian times makes this an important contribution to nineteenth century history Beyond this the analysis underlines that a historical perspective is essential for comprehending current issues raised by the fight against financial crime represented and analysed in law and criminology as matters of enormous intellectual and practical significance even helping to illuminate the benefits and potential pitfalls which can be encountered in current moves for extending the reach of criminal liability for financial misconduct Sarah Wilson s text on this highly topical issue will be essential reading for criminologists legal scholars and historians alike It will also be of great interest to the general reader

The Origins of Modern Financial Crime was short listed for the Wadsworth Prize 2015

Law and Legal Process Matthew Dyson,David Ibbetson,2013-07-25 This collection of papers from the Twentieth British Legal History Conference explores the relationship between substantive law and the way in which it actually worked Instead of looking at what the courts said they were doing it is concerned more with the reality of what was happening To that end the authors use a wide range of sources from court records to merchants diaries and lawyers letters The way in which the sources are used reflects the possibilities of legal historical research which are opening up in the twenty first century as large databases and digitised images and even online auction sites make it a practical possibility to do work at a level which was almost unthinkable only a short time ago

Industrial Clusters and Regional Business Networks in England, 1750-1970 John Wilson,Andrew Popp,2017-07-05 Although economists have long recognised industrial districts as one of the key features of an economy only recently has attention focused on the region as an effective means of generating accurate insights into the larger picture of economic performance Using a copious range of research material examining several British regions Industrial Clusters and Regional Business Networks in England 1750 1970 poses a series of fundamental questions about the nature of industrial clusters and

networks Particular attention is paid to identifying the basic characteristics of a network outlining how they evolved in key industrial clusters and assessing their impact on industrial performance both regionally and nationally The durability of such networks is another key thread that runs through the essays prompting comparison with industrial clusters in Britain and abroad These issues also stimulate discussion on disciplines of business economic and social history *Searching for a path out of distance fares* Norman Kellermann,2018-08-29 This work reconstructs the history of fare policy in the European passenger railway industry and integrates behavioural pricing theory into an agent based simulation model for railway revenue management The model is employed to conduct artificial experiments on fare innovations It represents supply and demand on a transport market including car traffic and is calibrated with empirical data of an incumbent European railway The model uses a combination of marketing concepts dynamics in time and social interaction of consumers to analyse revenue effects of different pricing options This book provides insights for readers interested in the commercial aspects of transportation history Furthermore it is directed at researchers interested in pricing theory and the simulation method It is also a rich source of information for practitioners in the revenue management branches of transport enterprises

International Bibliography of Business History Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians *The Dynamics of Victorian Business* Roy Church,2013-11-05 First Published in 2005 This volume looks at the problems and perspectives of Victorian Business in the 1870s The purpose of this collection of essays is to explore further that part of the thesis tentatively advanced in interrogative mode in 1975 concerning the course of industrial development during the second and third quarters of the nineteenth century **Routledge Handbook of World-Systems Analysis** Salvatore Babones,Christopher Chase-Dunn,2012-05-31 World systems analysis has developed rapidly over the past thirty years Today s students and junior scholars come to world systems analysis as a well established approach spanning all of the social sciences The best world systems scholarship however is spread across multiple methodologies and more than half a dozen academic disciplines Aiming to crystallize forty years of progress and lay the groundwork for the continued development of the field the Handbook of World Systems Analysis is a comprehensive review of the state of the field of world systems analysis since its origins almost forty years ago The Handbook includes

contributions from a global interdisciplinary group of more than eighty world systems scholars The authors include founders of the field mid career scholars and newly emerging voices Each one presents a snapshot of an area of world systems analysis as it exists today and presents a vision for the future The clear style and broad scope of the Handbook will make it essential reading for students and scholars of anthropology archaeology geography political science history sociology and development economics

North East England, 1850-1914 Graeme J. Milne, 2006 The development of the coalfield and the riparian manufacturing districts moulded new industrial landscapes the growth of ports and conurbations demanded innovative approaches to government and administration and the business strategies of North East entrepreneurs challenged conventional boundaries The author concludes that riverside districts on the Tyne Tees and Wear represented more viable working horizons than any regional North East in this era and raises important questions about the study of the English regions in their historical context Jacket

A History of Auditing Derek Matthews, 2006-09-27 The rise of the British accountancy profession from the late nineteenth century to the present day and the world wide success of its accountancy firms were to a large extent based on the growth of the audit function This book explores the history of the audit process in Britain demonstrating that the characteristic features of the auditing industry are a diversity in practice based largely on the different types of clients the auditors serve The book examines the innovation that was brought about by the staggering developments in information technology which have been seen over the last few centuries This comprehensive history will be a useful reference tool for accounting business and economic historians and will also be an enlightening read for all those with an interest in auditing procedures

Women and Their Money 1700-1950 Anne Laurence, Josephine Maltby, Janette Rutterford, 2008-11-20 This book the first of its kind will be of interest across several disciplines including economics economic history business history British history and women gender history The fact that the essays reach beyond Britain and include work on Germany Australia Italy Canada Sweden and the West Indies will stimulate interest throughout and even beyond the English speaking world There is a growing interest in the study of women s economic activity which reflects the recognition that economics and economic business history are not gender neutral subjects

Reader's Guide to British History David Loades, 2020-12-17 The Reader sGuide to British History is the essential source to secondary material on British history This resource contains over 1 000 A Z entries on the history of Britain from ancient and Roman Britain to the present day Each entry lists 6 12 of the best known books on the subject then discusses those works in an essay of 800 to 1 000 words prepared by an expert in the field The essays provide advice on the range and depth of coverage as well as the emphasis and point of view espoused in each publication

Tort Law and the Legislature TT Arvind, Jenny Steele, 2012-12-21 The study of the law of tort is generally preoccupied by case law while the fundamental impact of legislation is often overlooked At a jurisprudential level there is an unspoken view that legislation is generally piecemeal and at best self contained and specific at worst dependent on the whim of political views at a particular time With a different

starting point this volume seeks to test such notions illustrating among other things the widespread and lasting influence of legislation on the shape and principles of the law of tort the variety of forms of legislation and the complex nature of political and policy concerns that may lie behind their enactment the sometimes unexpected consequences of statutory reform and the integration not only of statutory rules but also of legislative policy into the operation of tort law today The apparently sharp distinction between judicially created private law principles and democratically enacted legislative rules and policies is therefore questioned and it is argued that to describe the principles of the law of tort without referring to statute is potentially highly misleading This book shows that legislation is important not only because of the way it varies or replaces case law but because it also deeply influences the intrinsic character of that law providing some of its most familiar characteristics The book provides the first extended interpretation of legislative intervention in the law of tort Each of the chapters by leading tort scholars deals with an aspect of the influence of legislation on the law of tort While the nature sources and extent of legislative influence in personal injury law is an essential feature of the collection other significant areas of tort law are explored including tort in the context of commercial law labour law regulation and the welfare state Essays on the Compensation Act 2006 and Human Rights Act 1998 bring the current state of the interplay between tort politics and legislation to the forefront In all of these contexts contributors explore the deeper lessons that can be learned about the nature of the law of tort and its changing role and functions over time Cited with approval in the Singapore Court of Appeal by VK Rajah JA in *See Toh Siew Kee vs Ho Ah Lam Ferrocement Pte Ltd and others* 2013 SGCA 29
