**Rainforest** Don Kulick, 2019-06-18 Perhaps the finest and most profound account of ethnographic fieldwork and discovery that has ever entered the anthropological literature The Wall Street Journal If you want to experience a profoundly different culture without the exhausting travel to say nothing of the cost this is an excellent choice The Washington Post As a young anthropologist Don Kulick went to the tiny village of Gapun in New Guinea to document the death of the native language Tayap He arrived knowing that you can't study a language without understanding the daily lives of the people who speak it how they talk to their children how they argue how they gossip how they joke Over the course of thirty years he returned again and again to document Tayap before it disappeared entirely and he found himself inexorably drawn into their world and implicated in their destiny Kulick wanted to tell the story of Gapuners one that went beyond the particulars and uses of

their language that took full stock of their vanishing culture This book takes us inside the village as he came to know it revealing what it is like to live in a difficult to get to village of two hundred people carved out like a cleft in the middle of a tropical rainforest But A Death in the Rainforest is also an illuminating look at the impact of Western culture on the farthest reaches of the globe and the story of why this anthropologist realized finally that he had to give up his study of this language and this village An engaging deeply perceptive and brilliant interrogation of what it means to study a culture A Death in the Rainforest takes readers into a world that endures in the face of massive changes one that is on the verge of disappearing forever

**Rain Forest at Night** Ted O'Hare, 2004-08 Learn about the world's most deadly snakes **Stability of Tropical Rainforest Margins** Teja Tscharntke, Christoph Leuschner, Manfred Zeller, Edi Guhardja, Arifuddin Bidin, 2007-04-26 Tropical rainforests are disappearing at an alarming rate causing unprecedented losses in biodiversity and ecosystem services This book contributes to an improved understanding of the processes that have destabilizing effects on ecological and socio economic systems of tropical rain forest margins as well as striving to integrate environmental technological and socio economic issues in their solution **Rain Forest** Laurie Agopian, Illene Miller, 1995 In this study of rain forest students will learn about the interdependence of the plant and animal life that is so unique to this environment

Weller,Ibulaimu Kakoma,2012-12-02 This book is the first comprehensive treatment of Aotus the nocturnal New World owl monkeys often used in behavioral and biomedical studies Found in tropical forests from Nicaragua to Argentina owl monkeys have been used in laboratories as model organisms for studies of diseases like malaria and various forms of cancer as well as studies of reproductive physiology and neuroanatomical structure and function These and other recent studies of this fascinating primate are included in this new volume As the only book devoted exclusively to owl monkeys this volume is an invaluable addition to the library of anyone interested in primate biology evolution ecology and behavior Only book devoted entirely to owl monkeys Surveys issues that pertain to wild and captive populations

Represents the breadth of studies that model organisms can engender      *The Rainforests of West Africa*

MARTIN, 2013-11-11 Nowhere else in the world did industrialized countries leave such early marks in the rainforest as in West Africa. Past and present developments here are in one way or the other significant for rainforests on other continents as well. West Africa is a pioneer in both a good and a bad sense. This is reason enough to take a closer look at the history of moist tropical West Africa. Until recently no one really seemed to be interested in the rainforests except for a few specialists. The world's scientific community neglected to study the incalculable riches of tropical forests to make the public aware of them and their due importance. Although interdisciplinary research has been a popular topic for some decades now it was not applied to just the most complex habitat on earth. Scientists from all fields studied only that which was easiest to record, seemingly blind to a myriad of details awaiting closer examination. Botanists went about establishing their herbariums and paid much too little attention to the vegetation as a whole or to the significance of useful plants for local populations. Zoologists too busied themselves with collecting and describing species. Anthropologists on the other hand tended to overlook faunal details in their ignorance of the animal world they wrote of tigers and deer in Africa. And finally foresters saw neither the forest nor the trees for the timber and even confused rainforests with monocultures of fir trees.
