*Rain Forests* Hai Song Harvey, 2002 Rain forests contain the greatest variety of animal and plant life on earth and they are being destroyed more rapidly than any other type of wild habitat Many environmentalists and scientists believe that almost all the rain forests will be eliminated in less than thirty years Others continue to believe that the threat of their destruction is exaggerated This anthology debates the threats to the rain forests and measures designed to ensure their continued existence

*Governing the Rainforest* Eve Z. Bratman, 2019-09-24 Sustainable development is often thought of as a product that can be obtained by following a prescribed course of interventions Rather than conceptualizing it as a sweet spot of economic ecological and social balance sustainable development is an ongoing process of embroilments requiring constant negotiation of often competing aims Sustainable development politics yield highly uneven results among different members of society and different geographic areas As this book argues such imbalances mean that sustainable development processes often prioritize economic over environmental goals perpetuating and reinforcing economic and political inequalities Governing the Rainforest looks at development and conservation efforts in the Brazilian Amazon where the government and corporate interests bump up against those of environmentalists and local populations This book asks why sustainable development continues to be such a powerful and influential idea in the region and what impact it has had on various political and economic interests and geographic areas In other words as Eve Z Bratman argues sustainable development is a political practice in itself This book offers detailed case

study analysis including of the creation of vast conservation corridors the construction of one of the largest hydroelectric plants in the world and new forms of land settlement projects Based on a decade of Bratman s ethnographic fieldwork throughout Brazil and particularly along the Trans Amazonian Highway Governing the Rainforest offers a fresh take on sustainable development within a multi level analysis of actors discourses and practices

Merenlender, 2012-02-13 Corridor Ecology presents guidelines that combine conservation science and practical experience for maintaining enhancing and creating connectivity between natural areas with an overarching goal of conserving biodiversity It offers an objective carefully interpreted review of the issues and is a one of a kind resource for scientists landscape architects planners land managers decision makers and all those working to protect and restore landscapes and species diversity

Amazonian Rain Forests Carl F. Jordan, 2012-12-06 DEVELOPMENT AND DISTURBANCE IN AMAZON FORESTS Contrasting Impressions 6 2 The rain forests of the Amazon Basin cover approximately 5 8 x 10 km Salati and Vose 1984 Flying over even just part of this basin one gazes hour after hour upon this seemingly infinite blanket of green The impression of immensity is similar when viewed from the Amazon River itself or from its tributaries From a hammock on the shaded deck of a riverboat the immensity of the forest presents an incredible monotony as one view of the shoreline blends unnoticeably into another From both perspectives the overwhelming reaction to the sea of trees that stretches from horizon to horizon is a sense of the vastness of the rain forest In September 1985 I got a different impression of the rain forest Several students and I journeyed in a self propelled car along the single track railroad that stretches almost 1000 km from the Carajas iron ore mine in the rain forest of Para State Brazil all the way to Sao Luis on the coast Fig 1 1

[Rainforest](#) Susan K. Stevenson, Harold M. Armleder, André Arsenault, Darwyn Coxson, S. Craig DeLong, Michael Jull, 2011-07-01. The vast temperate rainforests of coastal British Columbia are world renowned but much less is known about the other rainforest located 500 kilometres inland along the western slopes of the interior mountains. The unique integration of continentality and humidity in this region favours the development of lush rainforest communities that incorporate both coastal and boreal elements. This book brings together for the first time a broad spectrum of information about the ecology, management, and conservation of this distinctive ecosystem. Accessibly written and generously illustrated, the chapters examine the physical, social, economic, and ecological dimensions of the rainforest. They also look at how the delicate balance of this ecosystem has been threatened by human use and climate change. In the past, governments encouraged the forest industry to clearcut the decadent old stands and replace them with rapidly growing young trees of other species. More recently, out of concern for the ecological consequences of such practices, researchers have begun to examine alternative management strategies. This book offers a vision that combines various strategies in order to balance the conservation of the inland rainforest as a fully functioning ecosystem with human use of its diverse resources. [Monkeys Are Made of](#)

[Chocolate](#) Jack Ewing, 2011-11-19. Discover the mysterious and fascinating ways in which animals and plants and people interact with one another in the rainforests of Costa Rica. Author and naturalist Jack Ewing shares a wealth of observations and experiences gathered from more than three decades of living in southwestern Costa Rica, home to some of the most prolific and diverse ecosystems on Earth. More than just a simple collection of essays, *Monkeys Are Made of Chocolate* is a testament to the wonder of life in all its countless guises as seen through the eyes of a man with a gift for subtle discernment and a natural flair for storytelling. **Rainforest Cities** John O. Browder, Brian J. Godfrey, 1997. *Rainforest Cities* represents a valuable contribution to our current knowledge of regional development and environmental studies and will be of interest to urban planners, geographers, Amazon regional specialists, and interdisciplinary students of international development.

**Biodiversity and Environmental Change** Emma Burns, David Lindenmayer, Andrew Lowe, Nicole Thurgate, 2014-02-06. Annotation: Long-term ecological data are critical for informing long-term trends in biodiversity and trends in environmental change. The Terrestrial Ecosystem Research Network (TERN) is a major initiative of the Australian Government and one of its key areas of investment is to provide funding for a network of long-term ecological research plots around Australia. LTERN

This book highlights some of the temporal changes in the environment and or in biodiversity that have occurred in different ecosystems ranging from tropical rainforests wet eucalypt forests and alpine regions through to rangelands and deserts. Many important trends and changes are documented and they often provide new insights that were previously poorly understood or unknown. These data are precisely the kinds of data so desperately needed to better quantify the temporal trajectories in the environment and biodiversity in Australia. Rainforest Corridors Nigel J. H. Smith, 2024-03-29. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact. Drawing on a backlist dating to 1893, Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology. This title was originally published in 1982.

**Controlling Tropical Deforestation** Alan Grainger, 2013-11-05. Tropical rain forest is being cleared so rapidly and on such a scale that it is a major global environmental problem threatening the survival of half of the world's plant and animal species and contributing to global climate change through the greenhouse effect. But despite widespread concern for over twenty years only limited progress has been made in controlling deforestation and improving forest management in the humid tropics. In this book Alan Grainger offers a fresh analysis of the causes of deforestation and presents an integrated strategy for controlling it. His strategy embraces agriculture forestry and conservation and stresses the need for changes in government policies if land use is to be made more sustainable and the underlying causes of the problem are to be addressed. *Controlling Tropical Deforestation* is essential reading for policy makers agronomists foresters conservationists and development professionals. To general readers and students on introductory courses at schools and universities it also offers the first concise but comprehensive overview of the causes scale and consequences of deforestation. Alan Grainger is a lecturer in geography at the University of Leeds. He is author of *The Threatening Desert*. *Controlling Desertification* also published by Earthscan. Originally published in 1992.
