B. Phillips, J. H. Smith, 2014-07-22 A volume dealing with the regional and local history of South East England this covers the landscape and society of the modern counties of Surrey Kent East and West Sussex and Greater London south of the Thames from late Anglo Saxon times to the present The authors have tried to show the diversity that can be found within the region as well as common characteristics which illustrate the local peculiarities of the area The works in the series offer a synthesis of both historical and archaeological work in local areas Each region is covered in two linked but independent volumes the first covering the period up to AD 1000 and necessarily relying on archaeological data and the second bringing the story up to modern times It aims to portray life as it was experienced by the majority of people of South Britain or England as it was to become The authors look at the major historical events which have an impact on the region wars plagues technological changes and socio cultural trends amongst them but they also stress the underlying continuity of rural and urban life

British Working Class women authors (born before 1962) a list Stefan Szczelkun ,2025-06-07 A collection of Wikipedia articles edited reformatted and with additions In chronological order References and sections on non literary activity are sometimes omitted hopefully not to the point of misrepresenting the author which might include feminist or political activism To my surprise the biographical material on Wikipedia was sometimes mesmerising although it was uneven Where there were gaps I have tried to fill them from other sources Refer back to the wikipedia articles for more context and references in some cases and if you have a verified source of information please update the Wikipedia article Wikipedia is published under a creative commons licence So this compilation also carries a creative commons licence

Introduction Looking through Sarah Richardson s *Writing on the Line* 1996 I was struck by how many of the working class women writers were from North America and how many more were poets Howard Slater had made a list of British working class male novelists and I selected British woman writers from *Writing on the Line* and found that most of them now have Wikipedia pages I first made a list of links Wanting to take this further I first looked to focus on novels and short story writers but this category started to break up as many writers wrote in many idioms producing fact fiction poetry plays screenwriting and journalism I decided on an arbitrary cut off point of writers born before 1962 When I first made the list I was thinking how few working class women novelists had been published in this period But then the lists of books by each author started to stack up and there s plenty to read and much that I missed even really hearing about Of course it focuses on the most successful others who produced a community published autobiography or self published novel did not get a Wikipedia page and they should really be included every life counts Others only published an autobiography perhaps in the last years of life but were extraordinary writers and people We could also discuss the genre snobbery in literary circles that puts crime young peoples literature romantic and fantasy fiction and perhaps historical based narratives in a lower category than the novel

Post-War British Women Novelists and the Canon Nick Turner, 2010-02-11 With the increasing number of books on contemporary fiction there is a need for a work that examines whom we value and why These questions lie at the heart of this book which by focusing on four novelists literary and popular interrogates the canon over the last fifty years The argument unfolds to demonstrate that academic trends increasingly control canonicity as do the demands of genre the increasing commercialisation of literature and the power of the literary prize Turner argues that literary excellence demonstrated by style and imaginative power is often missing in many works that have become modern classics and makes a case for the value of the universal in literature Written in a jargon free style with reference to many supporting writers the book raises a number of significant cultural questions about the arts fashions and literary reputations of interest to readers in contemporary literary studies
