SBIR at the Department of Defense National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program--Phase II, 2014-09-30 Created in 1982 through the Small Business Innovation Development Act the Small Business Innovation Research SBIR program remains the nation's single largest innovation program for small business The SBIR program offers competitive awards to support the development and commercialization of innovative technologies by small private sector businesses At the same time the program provides government agencies with technical and scientific solutions that address their different missions SBIR at the Department of Defense considers ways that the Department of Defense SBIR program could work better in addressing the congressional objectives for the SBIR program to stimulate technological innovation use small businesses to meet federal research and development R D needs foster and encourage the participation of socially and economically disadvantaged small businesses and increase the private sector commercialization of innovations derived from federal R D An earlier report An Assessment of the Small Business Innovation Research Program at the Department of Defense studied how the SBIR

program has stimulated technological innovation and used small businesses to meet federal research and development needs This report builds on the previous one with a revised survey of SBIR companies SBIR at the Department of Defense revisits some case studies from the 2009 study and develops new ones and interviews agency managers and other stakeholders to provide a second snapshot of the program s progress toward achieving its legislative goals Controlling Cost Growth of NASA Earth and Space Science Missions National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Cost Growth in NASA Earth and Space Science Missions,2010-10-21 Cost and schedule growth is a problem experienced by many types of projects in many fields of endeavor Based on prior studies of cost growth in NASA and Department of Defense projects this book identifies specific causes of cost growth associated with NASA Earth and space science missions and provides guidance on how NASA can overcome these specific problems The recommendations in this book focus on changes in NASA policies that would directly reduce or eliminate the cost growth of Earth and space science missions Large cost growth is a concern for Earth and space science missions and it can be a concern for other missions as well If the cost growth is large enough it can create liquidity problems for NASA s Science Mission Directorate that in turn cause cost profile changes and development delays that amplify the overall cost growth for other concurrent and or pending missions Addressing cost growth through the allocation of artificially high reserves is an inefficient use of resources because it unnecessarily diminishes the portfolio of planned flights The most efficient use of resources is to establish realistic budgets and reserves and effective management processes that maximize the likelihood that mission costs will not exceed reserves NASA is already taking action to reduce cost growth additional steps as recommended herein will help improve NASA s mission planning process and achieve the goal of ensuring frequent mission opportunities for NASA Earth and space science

Proceedings of the 12th Reinventing Space Conference Scott Hatton,2016-12-25 The proceedings of the 2014 Reinventing Space conference present a number of questions in the context of a constantly innovating space industry from addressing the future of global cooperation investigating the impact of cuts in US government spending on the private space sector and probing the overall future of the commercial launch sector Space tourism and new technology promise the revival of interest in space development the Apollo Era was the first period of intense space activity and growth The need to create dramatically lower cost responsive and reliable launch systems and spacecraft has never been more vital Advances in technology are allowing smaller and cheaper satellites to be orbited from cubesats to nanosatellites to femtosatellites Thanks to more efficient new launch possibilities low cost access to space is becoming ever more achievable Commercial companies and countries are targeting the industry with new funding Organised by the British Interplanetary Society the presentations at this conference thoroughly address these challenges and opportunities **Space Program Management** Marcello Spagnulo,Rick Fleeter,Mauro Balduccini,Federico Nasini,2012-08-11 Beginning with the basic elements that differentiate space programs from other management challenges Space Program Management explains through theory and example of

real programs from around the world the philosophical and technical tools needed to successfully manage large technically complex space programs both in the government and commercial environment Chapters address both systems and configuration management the management of risk estimation measurement and control of both funding and the program schedule and the structure of the aerospace industry worldwide **The Vice Chairman's Doctrine** Ian

Domowitz,2022-03-28 There are books about product and companies but no books about a company as a product The Vice Chair arrives from orbit around a corporation with a doctrine of leadership without authority for business warriors who reject control live in a world of influencers and aspire to become one Process and culture converge as competitive advantage by refashioning priorities for Industry 4 0 through unorthodox lenses in a no holds barred treatment of influence and leverage complete with coaching mantras and essential tales of leadership Competitive action is focused through design thinking and transformation within a social system A greater metamorphosis combines personal development with management of a company as though it were a product leading to culture branding and innovation in the form of actionable values *Orbital Mechanics* Tom Logsdon,1997-10-24 A lively study of orbital mechanics by the writer responsible for the computer simulations and systems analysis for the Saturn V moon rocket Project Skylab and many others Provides thorough coverage of all background theories including unusual concepts and paradoxes that will enhance appreciation of this field Includes discussion of rocket propulsion and optimization of techniques for maximizing payload and minimizing fuel consumption plus complete coverage of the interaction of space vehicles and space bodies
