### **Reducing the Cost of Ethanol Production Through the Use of a Continuous Membrane Bioreactor** Munir

Cheryan,1998-04-01 Focuses on the 3rd step the stillage treatment part of the 4th step in the production of fuel ethanol from corn fermentation of glucose to ethanol downstream processing i e separation of ethanol from the fermentation broth The objective was to develop a continuous high rate process for the conversion of corn starch hydrolyzate into ethanol The goal was to reduce fermentation time but equally important was the production of a clarified fermentation broth which would improve subsequent stripping distillation operations reduce or perhaps eliminate stillage handling This was to be accomplished using the Continuous Membrane Bioreactor Illustrated

### **Advancing Desalination** Robert Y.

Ning,2012-09-14 This book is a companion volume to two published in 2011 by INTECH titled Desalination Trends and Technologies and Expanding Issues in Desalination The term desalination used in this series is in the broadest sense of the removal of dissolved suspended visible and invisible impurities in seawater brackish water and wastewater The purpose of desalination is to make water drinkable or pure enough for industrial applications like in the processes for the production of steam power pharmaceuticals and microelectronics or simply for attaining acceptable qualities for discharge back into the environment This volume touches on Membranes and Systems Solar Desalination Reverse Osmosis Process Chemistry and Control Drinking Water Quality and Selective Waste Product Removal The value of these volumes on the vast topic of desalination is to present the landscape to students teachers and practitioners with key concepts and keywords useful in gathering publications through internet search engines The technologies of desalination of water are advancing as rapidly as the cry of human kind for more availability of quality water supply while minimizing environmental pollution Contributions to the knowledge base of desalination are expected to continue to grow exponentially in the coming years
