Refashioning Nature:

Refashioning Nature David Goodman, Michael Redclift, 2014-11-10 We live in a society as dominated by food preference as by sexual preference as obsessed with eating too much as with eating too little In this accessible cross disciplinary text David Goodman and Michael Redclift look at the development of the modern food system integrating different bodies of knowledge and debate concerning food agriculture the environment and the household They link changes in our diet and concern with the environment to many of the problems afflicting developing countries food shortages poor nutrition and wholesale environmental destruction

Sociology on the Menu Alan Beardsworth, Teresa Keil, 2002-09-11 Sociology on the Menu is an accessible introduction to the sociology of food Highlighting the social and cultural dimensions of the human food system from production to consumption it encourages us to consider new ways of thinking about the apparently mundane everyday act of eating The main areas covered include The origins of human subsistence and the development of the modern food system Food the family and eating out Diet health and the body image The meanings of meat and vegetarianism Sociology on the Menu provides a comprehensive overview of the literature particularly helpful in this interdisciplinary field It focuses on key texts and studies to help students identify major concerns and themes for further study It urges us to re appraise the taken for granted and familiar experiences of selecting preparing and sharing food and to see our own habits and choices preferences and aversions in their broader cultural context

Towards the Conceptualisation of Maritime Delimitation Nuno Marques Antunes, 2022-05-16 This new monograph on maritime delimitation by Dr Nuno Antunes is based on a thesis submitted for the degree of Doctor of Philosophy at the University of Durham The work is one of legal political and technical analysis of an aspect of the law of the sea that is of current interest in all regions of the world

Nature's Perfect Food E. Melanie Dupuis, 2002-02 The story of how Americans came to drink milk For over a century America's nutrition authorities have heralded milk as nature's perfect food as indispensable and the most complete food These milk boosters have ranged from consumer activists to government nutritionists to the American Dairy Council and its ubiquitous milk moustache ads The image of milk as wholesome and body building has a long history but is it accurate Recently within the newest social movements around food milk has lost favor Vegan anti milk rhetoric portrays the dairy industry as cruel to animals and milk as bad for humans Recently books with titles like *Milk The Deadly Poison* and *Don't Drink Your Milk* have portrayed milk as toxic and unhealthy Controversies over genetically engineered cows and questions about antibiotic residue have also prompted consumers to question whether the milk they drink each day is truly good for them In *Nature's Perfect Food* Melanie Dupuis illuminates these questions by telling the story of how Americans came to drink milk We learn how cow's milk which was associated with bacteria and disease became a staple of the American diet Along the way we encounter 19th century evangelists who were convinced that cow's milk was the perfect food with divine properties brewers whose tainted cow feed poisoned the milk supply and informal wetnursing networks that

were destroyed with the onset of urbanization and industrialization Informative and entertaining Nature's Perfect Food will be the standard work on the history of milk

Predictability and Flexibility in the Law of Maritime Delimitation Yoshifumi Tanaka, 2019-11-14 This fully revised new edition offers a comprehensive picture of the law of maritime delimitation incorporating all new cases and State practice in this field As with all types of law the law of maritime delimitation should possess a degree of predictability On the other hand as maritime delimitation cases differ flexible considerations of geographical and non geographical factors are also required in order to achieve equitable results How then is it possible to ensure predictability while taking into account a number of diverse factors in order to achieve an equitable result This is the question at the heart of the law of maritime delimitation This book explores a well balanced legal framework that reconciles predictability and flexibility in the law of maritime delimitation by looking at three aspects of the question first it reviews the evolution of the law of maritime delimitation second it undertakes a comparative study of the case law and State practice and third it critically assesses the law of maritime delimitation in its current form

Landmark Cases in International Law Eric Heinze, Malgosia Fitzmaurice, 2023-07-03 This book contains excerpts in extenso from leading cases in general international law and seeks to provide a greater volume of case law than that currently available on the market It contains no editorial commentary and no secondary literature as these are widely available in other works It can serve either as a principal text or as a supplement to other standard books It is thoroughly up to date including recent ICJ judgments on the Bosnia case the Gabcikovo-Nagymaros Project the Advisory Opinion on Nuclear Weapons and the Lockerbie case It will be of inestimable value to all libraries of international law large and small institutional and private No student or practitioner in the field should be without it
