Desert Meteorology Thomas T. Warner, 2009-01-18 Aridity prevails over more than one third of the land area of the Earth and over a significant fraction of the oceans as well Yet to date there has been no comprehensive reference volume or textbook dealing with the weather processes that define the character of desert areas Desert Meteorology fills this gap by treating all aspects of desert weather such as large scale and local scale causes of aridity precipitation characteristics in deserts dust storms floods climate change in deserts precipitation processes desertification land surface physics of deserts numerical modelling of desert atmospheres and the effect of desert weather on humans A summary is provided of the climates and surface properties of the desert areas of the world The book is written with the assumption that the reader has only a basic knowledge of meteorology physics and calculus making it useful to those in a wide range of disciplines It includes review questions and problems for the student This comprehensive volume will satisfy all who need to know more about the weather and climate of arid lands It will appeal especially to advanced students and researchers in environmental science meteorology physical geography hydrology and engineering

The California Deserts Bruce M Pavlik, 2008-07-02 This highly readable spectacularly illustrated compendium is an ecological journey into a wondrous land of extremes The California Deserts explores the remarkable diversity of life in this harsh yet fragile quarter of the Golden State In a rich narrative it illuminates how that diversity created by drought and heat has evolved with climate change since the Ice Ages Along the way we find there is much to learn from each desert species whether it is a cactus pupfish tortoise or bighorn sheep about adaptation to a warming arid world The book tells of human adaptation as well and is underscored by a deep appreciation for the intimate knowledge acquired by native people during their 12 000 year desert experience In this sense the book is a journey of rediscovery as it reflects on the ways that knowledge has been reclaimed and amplified by new discoveries The book also takes the measure of the ecological condition of these deserts today presenting issues of conservation management and restoration With its many sidebars photographs and featured topics The California Deserts provides a unique introduction to places of remarkable and often unexpected beauty

Encyclopedia of Deserts Michael A. Mares, 2017-01-19 Encyclopedia of Deserts represents a milestone it is the first comprehensive reference to the first comprehensive reference to deserts and semideserts of the world Approximately seven hundred entries treat subjects ranging from desert survival to the way deserts are formed Topics include biology birds mammals reptiles amphibians fishes invertebrates plants bacteria physiology evolution geography climatology geology hydrology anthropology and history The thirty seven contributors including volume editor Michael A Mares have had extensive careers in deserts research encompassing all of the world s arid and semiarid regions The Encyclopedia opens with a subject list by topic an organizational guide that helps the reader grasp interrelationships and complexities in desert systems Each entry concludes

with cross references to other entries in the volume inviting the reader to embark on a personal expedition into fascinating previously unknown terrain In addition a list of important readings facilitates in depth study of each topic An exhaustive index permits quick access to places topics and taxonomic listings of all plants and animals discussed More than one hundred photographs drawings and maps enhance our appreciation of the remarkable life landforms history and challenges of the world s arid land

U.S. Geological Survey Professional Paper ,1984 Ecosystems of California Harold Mooney,Erika Zavaleta,2016-01-19 This long anticipated reference and sourcebook for California s remarkable ecological abundance provides an integrated assessment of each major ecosystem type its distribution structure function and management A comprehensive synthesis of our knowledge about this biologically diverse state Ecosystems of California covers the state from oceans to mountaintops using multiple lenses past and present flora and fauna aquatic and terrestrial natural and managed Each chapter evaluates natural processes for a specific ecosystem describes drivers of change and discusses how that ecosystem may be altered in the future This book also explores the drivers of California s ecological patterns and the history of the state s various ecosystems outlining how the challenges of climate change and invasive species and opportunities for regulation and stewardship could potentially affect the state s ecosystems The text explicitly incorporates both human impacts and conservation and restoration efforts and shows how ecosystems support human well being Edited by two esteemed ecosystem ecologists and with overviews by leading experts on each ecosystem this definitive work will be indispensable for natural resource management and conservation professionals as well as for undergraduate or graduate students of California s environment and curious naturalists

Desert Biomes Joyce A. Quinn,2008-12-30 This volume in the Greenwood Guides to Biomes of the World focuses on deserts the seemingly desolate but actually quite lively regions that are home to some of the most interesting and beautiful flora and fauna in the world Desert Biomes examines three different types of biomes warm hot deserts such as the Mojave and Sahara deserts cold deserts such as Patagonia in South America and the West Coast Fog Desert biomes which occur on certain regions of the western edge of major continents The volumes examines how these biomes are unique in terms of their vegetation geographical distribution soil challenges posed by the environment adaptation of the plants and animals to the environment and conservation efforts Maps photos diagrams drawings and tables accompany the text as do sidebars that highlight habitats species and ecological relationships The volume includes a bibliography of accessible resources for further research

Atlas of the World's Deserts Nathaniel Harris,2003 Maps and information about the deserts of the world and their life

Great Warm Deserts of the World Andrew Goudie,2002 This is the first ever regional study of the geomorphology of the world s deserts demonstrating why different deserts have special landscape features and land forming processes It explains the climatic and tectonic history of deserts showing how the histories of the deserts have been long and complex and how they have responded to global changes in climate particularly over the course of the last few millions of years Each of the major warm deserts of the world is treated in detail and the book

is extensively illustrated with numerous plates and figures A large and comprehensive bibliography provides a guide to the international literature *Yuma Proving Ground Multipurpose Installation, Diversification of Mission and Changes to Land Use Draft Range Wide EIS* ,2001
