**Reflections on Europe**

Hans-Åke Persson,2007 When Dutch and subsequently French voters rejected the Draft Treaty for a Constitution for Europe in Spring 2005 many voices called for a pause for reflection This book is in part a result of that moment of reflection We wanted to contribute to the debate about Europe but crucially we sought to do so by taking a step back from the problem formation and agenda setting of Brussels For the authors of this volume one key to establishing critical distance has been the reappraisal of the historical perspective Another has been the problematisation of Europe as a space as opposed to looking for a definition of borders The authors also seek critical distance through a focus on the tension between Europe as a culture as a polity and as an economy These tensions have often been neglected or even ignored and the relationships have been seen as more or less synonymous and harmonious The aim of this volume then is two fold It wants developing a critical distance to the present Europe to contribute to the vivid academic research and debate on Europe which too often either develops distance without commenting on the present state of affairs or comments on the present without critical distance

**Reflections on Progress**

Kemal Dervis,2016-08-30 Now more than ever the world needs growth oriented and socially inclusive policymaking Is the world giving up on the promise of ever greater prosperity for all on functioning democratic institutions and on long term peace Is the special set of circumstances that led to the recent rapid growth in emerging markets unlikely to be present in the future Will the second decade of the twenty first century end with secular stagnation Does the rise of authoritarianism populism and fanatic nihilism all experienced over the last few years threaten to unravel what has been built painstakingly since the catastrophe of World War II Kemal Dervis addresses these and similar questions in this thought provoking series of essays written for Project Syndicate from 2011 to 2015 The essays are organized in three sections global economic interdependence inequality and the political economy of reform and the specific challenge of Europe The common theme is the need for growth oriented and socially inclusive policymaking in an interdependent world These kinds of policies offer the potential for another wave of unprecedented human progress aided by breathtaking new technologies However a huge and destabilizing disruption is possible if policymaking is not globally cooperative and is not focused on inclusion and greater equity These essays synthesize the experience and analysis of a scholar and policymaker with national regional and international experience at the highest levels Dervis exhibits a passion for combining strongly held values with political feasibility

*Holocaust Escapees and Global Development* David Simon,2019-01-15 The thousands uprooted and displaced by the Holocaust had a profound cultural impact on the countries in which they sought refuge with numerous Holocaust escapees attaining prominence as scientists writers filmmakers and artists But what is less well known is the way in which this refugee diaspora shaped the scholarly culture of their new found homes and international policy In this unique work David Simon explores the

pioneering role played by mostly Jewish refugee scholars in the creation of development studies and practice following the Second World War and what we can learn about the discipline by examining the social and intellectual history of its early practitioners Through in depth interviews with key figures and their relatives Simon considers how the escapees experiences impacted their scholarship showing how they played a key role in shaping their belief that development really did hold the potential to make a better world free from the horrors of war genocide and discrimination they had experienced under Nazi rule In the process he casts valuable new light on the origins and evolution of development studies policy and practice from this formative postwar period to the present

**After the Crash** Sharyn O'Halloran, Thomas Groll, 2019-10-08 The 2008 crash was the worst financial crisis and the most severe economic downturn since the Great Depression It triggered a complete overhaul of the global regulatory environment ushering in a stream of new rules and laws to combat the perceived weakness of the financial system While the global economy came back from the brink the continuing effects of the crisis include increasing economic inequality and political polarization After the Crash is an innovative analysis of the crisis and its ongoing influence on the global regulatory financial and political landscape with timely discussions of the key issues for our economic future It brings together a range of experts and practitioners including Joseph Stiglitz a Nobel Prize winner former congressman Barney Frank former treasury secretary Jacob Lew Paul Tucker a former deputy governor of the Bank of England and Steve Cutler general counsel of JP Morgan Chase during the financial crisis Each poses crucial questions What were the origins of the crisis How effective were international and domestic regulatory responses Have we addressed the roots of the crisis through reform and regulation Are our financial systems and the global economy better able to withstand another crash After the Crash is vital reading as both a retrospective on the last crisis and an analysis of possible sources of the next one

*The General Data Dissemination System (GDDS)—A Reflection on its First 12 Years and Plans for Taking it Forward* Mr.Charles Enoch,Mr.Robin D. *Bodies as Sites of Cultural Reflection in Early Childhood Education* Rachael S. Burke,Judith Duncan,2014-10-30 Taking the body as a locus for discussion Rachael S Burke and Judith Duncan argue not only that implicit cultural practices shape most of the interactions taking place in early childhood curricula and pedagogy but that many of these practices often go unnoticed or unrecognized as being pedagogy Current scholars inspired by Foucault acknowledge that the body is socially and culturally produced and historically situated it is simultaneously a part of nature and society as well as a representation of the way that nature and society can be conceived Every natural symbol originating from the body contains and conveys a social meaning and every culture selects its own meaning from the myriad of potential body symbolisms Bodies as Sites of Cultural Reflection in Early Childhood Education uses empirical examples from qualitative fieldwork conducted in New Zealand and Japan to explore these theories and discuss the ways in which children s bodies represent a central focus in teachers pedagogical discussions and create contexts for the embodiment of children s
