Anxiety in Middle-Class America Valérie de Courville Nicol, 2021-07-29 Showing how Americans have massively turned to a self help empowerment model to manage chronic feelings of insecurity Anxiety in Middle Class America explains why no group has ever been as anxious about anxiety and interested in tackling it as a moral and personal problem Anxiety is the focus of increasing preoccupation and intervention in middle class America and the late modern world It is reportedly the most common mental illness in the United States affecting almost a quarter of its adult population every year Views diverge on what this means This work is for readers who are intrigued by the exponential rise in reported rates of anxiety across the lifespan and by all the talk about anxiety dissatisfied with non sociological and symptom based accounts of mental health and open minded

From Cardano's Great Art to Lagrange's Reflections Jacqueline A. Stedall, 2011 This book is an exploration of a claim made by Lagrange in the autumn of 1771 as he embarked upon his lengthy *Reflexions sur la resolution algebrique des equations* that there had been few advances in the algebraic solution of equations since the time of Cardano in the mid sixteenth century That opinion has been shared by many later historians The present study attempts to redress that view and to examine the intertwined developments in the theory of equations from Cardano to Lagrange A similar historical exploration led Lagrange himself to insights that were to transform the entire nature and scope of algebra Progress was not confined to any one country at different times mathematicians in Italy France the Netherlands England Scotland Russia and Germany contributed to the discussion and to a gradual deepening of understanding In particular the national Academies of Berlin St Petersburg and Paris in the eighteenth century were crucial in supporting informed mathematical communities and encouraging the wider dissemination of key ideas This study therefore truly highlights the existence of a European mathematical heritage The book is written in three parts Part I offers an overview of the period from Cardano to Newton 1545 to 1707 and is arranged chronologically Part II covers the period from Newton to Lagrange 1707 to 1771 and treats the material according to key themes Part III is a brief account of the aftermath of the discoveries made in the 1770s The book attempts throughout to capture the reality of mathematical discovery by inviting the reader to follow in the footsteps of the authors themselves with as few changes as possible to the original notation and style of presentation

Heaven's Call to Earthy Spirituality George McClendon, 2008-10 We often live in conflict protecting ourselves from what we do not want Defined and fragmented by our fears we create a familiar predictable safe and painful story One day we may experience a spiritual crisis a turning point where holding on becomes more painful than letting go This is a dangerous opportunity hold on or let go We then face the question Who are we really As I tell my story I invite my readers to recall their own I write about my childhood years defined

as a monk discovery of an earthy spirituality and woman good bye to monastic life and life as a displaced person seeking sacred space in the world The new story is what we say after we say good bye to the old story My spiritual practice and the one I describe in Heaven s Call to Earthy Spirituality continues to be a thorough listening and life changing integration When I entered the monastery as a young man in 1953 the abbot renamed each novice after a saint to accompany him on his journey My patron saint was St George From that moment my name was no longer my baptismal name it was George St George slaying the dragon has served as a metaphor in my life and I use it as the framework of the book I was safe as long as I sat on my high horse and avoided contact with Lady Dragon Once I dismounted and met her in earthy environs there was no going back
