Reflection Rosalie Pockett, Ros Giles, 2008 Educating students for professional practice is both complex and challenging Striking the right balance between theory and practice and thinking and doing remains a cornerstone of effective teaching and learning In the last two decades social work education has drawn from critical perspectives based on understandings of power imbalances that perpetuate inequalities in social structures and relationships These perspectives go to the heart of social work practice in the contemporary context where critical reflection is recognized as a useful meaningful approach used by practitioners to examine aspects of their practice and redevelop practice theory Giving a voice to the student experience this edited collection fills a gap in the literature about the student experience of critical reflection as a tool for learning and practice The papers have been written by final year social work students and demonstrate the application of a critical framework to incidents selected from their field education placements This has resulted in knowledge building and personalized meaning for students in transition to becoming new graduate social workers The collection has relevance to social work students educators and other human service professions where critical thinking is a fundamental part of education for practice *Qualitative Research in Social Work* Ian Shaw, Nick Gould, 2001-10-04 A really fine book an

necessary background information and setting the context for the six application chapters and of highlighting and discussing the issues raised in those chapters The editors are respected scholars well versed in the theory and practice of qualitative research Similarly the contributing authors represent both considerable experience in this field and a diversity of interests This combination makes *Qualitative Research in Social Work* an excellent text for students practitioners and researchers alike It is a benchmark for social work progress in this area and points the way for the continued development of qualitative inquiry Professor Stanley L Witkin Department of Social Work University of Vermont There is a clear need for a book which treats qualitative research as a substantive theme within social work setting epistemological and methodological issues in a context whereby the agenda is set by and is relevant to social work *Qualitative Research in Social Work* is just such a book and will be immensely useful for students practitioners and researchers interested in and undertaking social work research In the introductory chapters the co authors set qualitative research within a context of social work developments and problems The central section provides additional topicality and directness through specially commissioned chapters from leading figures in this field each covering key qualitative methods and relating them to social work settings and the final section which reviews qualitative research in social work and aims to exemplify ways in which social work thought and practice can be advanced through research
