Reforming Health Sectors:

Implementing Health Sector Reform in Central Asia Zuzana Feachem, Martin Hensher, Laura Rose, 1999 It is easy for reformers and their overseas advisers to develop conceptually strong plans for health sector reform that appeal to governments donors and academics Transforming these plans into successful action has proved to be extremely difficult Toward the goal of improving assistance to this sector the Economic Development Institute EDI of the World Bank held a seminar in Ashgabat Turkmenistan in June 1996 This publication provides a summary of the proceedings and papers presented at that seminar It was attended by delegations from five countries in Central Asia and from Azerbaijan and Mongolia The content of this volume emphasizes topics central to the restructuring of health sector financing and health care delivery systems at a time of transition to market economies and to democracy Maintaining and improving the health status of the population while preventing rapid escalation of health care expenditure were the recurrent themes throughout the seminar

Reforming Health Care in the United States, Germany, and South Africa Susan Giaimo, 2016-04-29 As countries confront new health care challenges in the 21st century their health care systems reflect the problems and political settlements of an earlier age Meeting these new challenges requires reform of existing health care system arrangements while reconciling the goals of equitable access to quality care at an affordable price This book compares health care reforms in industrialized nations and the Global South to uncover the similarities and differences in their problems and solutions It examines the struggle over the Affordable Care Act and its alternatives in the United States major health care reforms in Germany in the new century and South Africa's efforts to combat AIDS and construct a comprehensive health care system for all These particular reforms reflect the underlying configuration of politics in each country

Reforming Health Sectors Anne Mills, 2000 The 1990s have seen a fundamental questioning of the nature form and content of health systems Evidence has accumulated that in terms of efficiency and equity no country can be satisfied with the performance of its health system Concerns include the extent to which health systems are responsive to health needs as opposed to professional preferences the need to ration access to care and how best to do it how to make services more responsive to users and how to ensure that the needs of the poorest and most disadvantaged are met Countries across the world whether rich or poor are attempting to change how health systems are financed organized and managed Proposed reforms are often radical progress in implementing reforms is often slow consensus is notably absent These papers by leading academics and practitioners shed light on reform ideologies strategies and experiences

Terms of Employment and Working Conditions in Health Sector Reforms, 1998 Reviews the impact of health sector reforms on health workers and the implication of changes in employment pay labour relations working conditions and terms of employment on the general performance of health systems in the light of the links between health policy human health and the economy

Health Sector Reforms in Orissa Subrata Kundu, 2010-07-12 In analysing the phenomenon of health sector reforms this book proposes a new conceptual framework of

analysis and ethnography as a methodological tool which could be used effectively in various country contexts compared to what the existing theoretical frameworks do. Thus apart from generating new knowledge in health sector this study has significance for policy makers across the world. When the states themselves accept the fact that increasing private participation in health care in the form of health sector reforms is happening because of deliberate state policy they will be better positioned to take decisions which ensure effective private sector regulation and universal access to quality health care within a democratic or participatory framework of governance. Increasing privatisation of health care has also led toward citizens losing their democratic spaces with regard to decisions on universal access to quality health care. This has wider implications not only for improved health status in general but also about how we live in a modern society with our values of liberty equality and justice intact. The book would be a useful guide for policy makers researchers students and layman across the world.

Reforming the State János Kornai, Stephan Haggard, Robert R. Kaufman, 2001-01-15. The essays in this volume first published in 2001 examine fiscal policy making and providing for social welfare in post socialist countries.

Healthcare Reform, Quality and Safety Jeffrey Braithwaite, Yukihiro Matsuyama, Julie Johnson, 2017-03-02. This book offers a global perspective on healthcare reform and its relationship with efforts to improve quality and safety. It looks at the ways reforms have developed in 30 countries and specifically the impact national reform initiatives have had on the quality and safety of care. It explores how reforms drive quality and safety improvement and equally how they act to negate such goals. Every country included in this book is involved in a reform and improvement process but each takes place in a particular social cultural economic and developmental context leading to differing emphases and varied progress. Methods for tackling common problems financing efficiencies effectiveness evidence based practice institutional reforms quality improvement and patient safety initiatives also differ. Representatives from each nation provide a chapter to convey their own situation. The editors draw a conclusion from these numerous contributions and synthesize the themes emerging into a coherent lessons learned summary that delivers value to the numerous stakeholders. Healthcare Reform Quality and Safety forms a compendium of the current state of the art in global healthcare reform. This is the first book of its type and offers a unique opportunity for cross fertilization of ideas to the mutual benefit of countries involved in the project. The content will be of interest to governments policymakers managers and leaders clinicians teaching academics researchers and students.
