Subcommittee on Capital Markets, Insurance, and Government Sponsored Enterprises, 2005 Reforming Money and Finance Robert Guttman, 1997 A new edition of the nontechnical undergraduate text analyzing current issues relating to monetary reform and financial restructuring Using interviews with economists and a selection of essays with supporting commentary the volume links money creation to credit financing and financial instability providing a broad treatment of money and banking systems and regulations the most recent debates in monetary policy and their impact on financial instability and detailing the globalization of finance with an emphasis on the emergence of a new monetary regime Includes tables and graphs Paper edition 771 2 28 95 Annotation copyrighted by Book News Inc Portland OR **Bank Politics** David Howarth, Scott James, 2022-11-03 The problem of banks being too big to fail was the defining regulatory issue of the global financial crisis However attempts to tackle the problem by

separating retail banking from higher risk trading activities known as structural reform proved to be highly divisive and contributed to significant regulatory divergence In this book David Howarth and Scott James explain this variation by examining the politics of bank structural reform across six key jurisdictions the United States the European Union the United Kingdom France Germany and the Netherlands Integrating political economy and public policy approaches they develop a novel comparative financial power framework to analyse how financial industry influence is mediated by two factors first whether bank lobbying is unified and centralized cooperative financial power or divided and fragmented competitive financial power and second policy makers use of venue shifting to depoliticize contentious policy issues The book explains that the US and UK governments implemented major reforms because the banking industry was divided and faced significant opposition However venue shifting to an independent committee led to durable reform in the UK while political polarization in the US contributed to contested reform By contrast the French and German governments balanced unified bank lobbying and political pressures to act by pursuing limited symbolic reforms the Dutch government deflected the issue through delegation to multiple commissions no reform while political stalemate at the EU level resulted from early venue shifting and concerted pan European bank lobbying The book makes a major contribution to scholarship on the political economy of finance and business power
