*Short Straw* Bernard W. Peterson, 1996      **Combined Arms Warfare in the Twentieth Century** Jonathan Mallory House, 2001 For centuries the world has witnessed the development and use of increasingly complex and powerful military systems and technologies In the process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history of twentieth century warfare Originally published as an essential in house study for U S Army officers during the 1980s this much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come      *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004      **Forthcoming Books** Rose Army, 1996-06

Life Henry R. Luce, 1951      **First Love** Mostly True, 2008-07 Even as a young boy Hank Koenig dreamed of piloting his own airplane He first fell in love with flying when he and his mother watched a large group of barnstormers and airplanes flying above the airport of their small Illinois town Ever since that day he went to the airport whenever possible and began taking lessons soon after Koenig earned his pilot s license at the age of sixteen and landed a job as a commercial pilot taking people for observation rides at the Starved Rock National Park Soon he had enough to buy his own airplane and continued his flying ventures through high school and college But it was during the Korean War that Koenig had his chance to become a true fighter pilot Since he was disqualified for medical reasons to serve in the U S military he went to Canada and enlisted with the Royal Canadian Air Force He went to Korea in 1953 and flew mainly P51 Mustangs and F86 jets Koenig found

himself in several dog fights and faced death more than once Following his stint in Korea Koenig came back to the United States and continued his love of flying Honest and candid this heartfelt autobiography tells the story of one man s love affair with flying     *Silver Wings, Golden Valor* Richard P. Hallion,2007-10 Edited by Richard P Hallion Silver Wings Golden Valor contains proceedings from a symposium on the Korean War held at the U S Congress on June 7 2000 This symposium attempted to explain that Korea eas an absolutely vital victory in the 40 year long history of the Cold War The contributors discuss lessons learned from the Korean conflict and how to learn from the past and make appropriate changes in today s practices     A MiG-15 to Freedom No Kum-Sok,J. Roger Osterholm,2007-04-25 On September 21 1953 U S airmen at Kimpo Air Base near Seoul Korea were startled to see landing a MiG 15 the most advanced Soviet built fighter plane of the era piloted by Senior Lieutenant No Kum Sok a 21 year old North Korean Air Force officer Once he landed Lieutenant No found that his mother had escaped to the South two years earlier and they were soon reunited At his request No came to the United States and became a U S citizen His story provides a unique insight into how North Korea conducted the Korean War and how he came to the decision to leave his homeland     **Scrappy** Howard C. “Scrappy” Johnson,Ian A. O’Connor,2014-10-01 From World War II to high above the Earth to Vietnam this memoir tells the story of fighter pilot Howard C Scrappy Johnson Beginning with his early years in Knoxville Tennessee the book follows Johnson through his career at the University of Louisville and his enlistment as an Air Force cadet at the onset of World War II After World War II Johnson served a tour of duty in the skies over Korea and in 1958 broke the world s altitude record by over 14 000 feet soaring at 91 249 feet in his F 104A Starfighter For this remarkable feat he was awarded the Collier Trophy aviation s highest honor In Vietnam he was director of operations for the 388th Tactical Fighter Wing and was instrumental in founding the Red River Valley Fighter Pilots a group dedicated to the remembrance of fallen and captured airmen Written with panache this work records the bigger than life adventures of one of America s finest     **MiG Alley to Mu Ghia Pass** Cecil G. Foster,2001-07-25 Cecil G Foster was born in Midland County Michigan on August 30 1925 He endured economic and emotional hardship during his youth living in a poor environment losing his mother before he was six and being separated from his brothers sisters and father He joined the Army Air Force in 1943 as a private at the height of the World War II buildup and retired in 1975 as a lieutenant colonel During his 32 years with the Air Force Foster served in several different capacities pilot celestial navigator radar navigator bombardier intercept director and squadron commander A major focus of this work is Foster s Air Force career in the Korean War where he was one of the highest scoring aces of the air war His record of nine MiGs destroyed places him twelfth on a list of 38 aces Every one of the aircraft he destroyed was shot down in the area known as MiG Alley a small section of airspace along the Yalu River which separated North Korea from China     *Korea* Robert C. Mathis,2006 The drop off the cliff was only about 5 or 6 feet but I hit with a thud and lay momentarily on the ground My mind was spinning over what had happened in the past few minutes I had been shooting rather wildly in the dark trying to stop the onslaught

coming at us from the north Just as I started to get up someone kicked one of my feet I heard a very loud explosion very close to my ears and some dirt splattered on the side of my head There were a number of people around me speaking in what to me was completely unintelligible language I felt no pain so I guessed that I was unhurt I stayed still for a few moments as the people left the area I was in I was suddenly alone in a small Korean farmyard that I had seen a number of times in the past two days I tried to collect my thoughts since I needed to develop a plan if I were going to survive I was somewhat stunned My thoughts were a bit confused I knew that there were many many enemy soldiers all around me And I knew that they would be trying to kill me The war had become quite personal I was sure that my team of forward air controllers had all been killed as we were run over by the apparently thousands of enemy soldiers attacking our front lines My mind was now racing and I knew that I had to do something very soon or I would become a prisoner of war That was something I had always told myself would never happen I had never really been afraid of being shot I figured whatever pain came would quickly go away But captured I had read accounts of people who had been captured particularly by the North Koreans and it really wasn't fun And then there were those stories of friends who had been captured and then used for bayonet practice Stories about the Bataan Death March in the Philippines just a few years before had convinced me that being captured particularly by someone from an Asian culture was an invitation to slow torture I suppose that I was really not that brave I quickly decided that if I were to go down it would be fighting all the way I still had my carbine and still had ammunition Whatever came next I would either go out in a blaze of glory or I would get back to my own troops But where did this all start This book is about a year in the life of a lieutenant in Korea in 1950 1951 I had been trained as a fighter pilot and I did indeed fly a number of missions as such However some of the most interesting times came when I was on the ground and with the infantry I had been fairly well trained to do that as well It doesn't make much difference whether you are a soldier sailor airman or marine you are sometimes asked to fight and risk your life for your country This just happens to be my story as a lieutenant The Korean War is in a real sense the forgotten war It appears in the memory as a strange interlude sandwiched between World War II and Viet Nam For the great majority of Americans who did not experience the intense cold the indescribable misery of the Korean people north and south or the horror of the devastation beyond description the war remains a blank We should remain eternally thankful that we Americans have not experienced anything like the terrible reality of two great armies moving like devouring locusts back and forth across our country Our Civil War remains the only marker by which we could measure the hopelessness and suffering of the Korean War I recall Korea vividly While I had been in the Army West Point during World War II this was my first combat experience I could certainly put down the various statistics about the Korean War and try to impress upon you how bad it was This is not a story about statistics however I could tell you about what happened on that awesome very early morning of 25 June 1950 when the North Korean army leaped across the border between the North and South with artillery firing and tanks moving rapidly southward And some of that is ne      Bully Able Leader George Loving

USAF (Retd.),2011-08-18 Action packed memoir by an American pilot and squadron commander in the Korean War

**Officers in Flight Suits** John Darrell Sherwood,1998-11 The United States Air Force fought as a truly independent service for the first time during the Korean War As a result the fighter pilots reigned supreme In Korea American air power was challenged by the most advanced fighter of the time the Soviet MiG 15 and ruled the skies in many celebrated aerial battles In addition however they destroyed virtually every major town and city in North Korea demolished its entire crop irrigation system and killed close to one million civilians Korea then is the perfect laboratory for studying the culture of fighter pilots a culture based on self confidence and risk taking one which has promoted what John Darrell Sherwood calls flight suit attitude In *Officers in Flight Suits* Sherwood explores the flight suit officer s life drawing on memoirs diaries letters novels unit records and personal papers as well as interviews with over fifty veterans who served in the Air Force in Korea From their training to dramatic encounters during battle from their socio economic backgrounds to the flight suit culture they developed Sherwood investigates every dimension of these pilots lives The book provides an illuminating portrait of fighter pilot culture demonstrating how this culture affected their performance in battle and their attitudes toward others particularly women in their off duty activities Jacket flap [Pull the Chocks, I'm Launching](#) Major General (Ret.) selection as the University's Air Force ROTC Drill Team Commander and the program's Flight Indoctrination Program in which I received my Private Pilot License imbued me with the direction and confidence I needed to successfully complete Air Force pilot training which I did in South Georgia. My first assignment after pilot training was as a T-33 jet pilot training instructor in Texas. The T-33 was the trainer version of the Korean War vintage F-80. In meeting my need for speed I later converted as an instructor into the supersonic T-38 trainer. After four years of instructing basic flight training I was reassigned to Korea as a Forward Air Controller and became the Air Division's T-33 flight program manager. When I completed this overseas tour at the height of the Air War in Vietnam I resigned from the Air Force and joined the Oregon Air National Guard. This started a new chapter in my life.

*Once a Fighter Pilot* Warren A. Trest, 2012 We set up at 35,000 or so and there were high clouds around it was kind of hazy and the sun was off to our left. Of course the wingman's duty is to check six. You're defense. Your leader's supposed to be offense. I kept looking around and saying to myself there's no MiGs down here at the Chongchon and I look back and there's a MiG-15 in a 90 degree bank pulling into the firing position and too close for comfort. I called Red Lead we've got MiGs on our tail. Break left. I was on the right wing. We broke hard left and the MiG was just a second late. He started shooting and these red golf balls came whizzing past just under my tail pipe. I felt sure I was going to be hit. The F-86As which the wing flew at that time were lighter than the E and F models and with a very narrow stall margin between the time you first felt the buffet until the aircraft stalled you couldn't go very far into the buffet. He was in it pretty deep trying to get to the inside of the turn and the red golf balls were still coming and he pulled just a little bit more and the aircraft stalled. It just snapped out and went into a spin right there in the middle of combat. I was embarrassed. I was furious. I was saying to myself if you don't get out of this spin you will be a prisoner of war and you never even fired your guns in anger. I was able to get my thought processes together and went through the spin recovery procedure which is first controls with the spin and then stick full forward rudders neutral throttle at idle then full rudder against the spin and pray. Sure enough I pulled out of the spin and put the throttle back up. I thought I'm going home with my tail between my legs. As I started to gain speed and climb I didn't expect to see another airplane in the sky but as I looked further out I saw my lead. He had done exactly the same thing. We could see the humor in the situation when we got home. The joke at the bar that night was that all the Chinese pilots are shaking their heads and saying those crazy American pilots they verrry disciplined. We didn't know it at the time but the great majority of MiG pilots were Russians.
