Namibia enters into uncharted scholarly territory of illegal diamond smuggling at the largest diamond mining company in colonial Namibia De Beers Consolidated Diamond Mines of South West Africa CDM It details the underground activities of the natives migrant workers employed by the CDM and how these illicit activities accounted for rapid development in Owamboland Beyond this account the book takes on the deterministic natural resource curse theory that equates natural resource endowments to a curse resulting in underdevelopment and sometimes conflict It is argued and proven herein from a

decolonial standpoint that such an approach is an oversimplification of the political economy of natural resources in Africa in general and Namibia in particular The text also provides a contextual account of the contract labour system and details the symbiotic relationship between CDM and the colonial state before highlighting the remaining unanswered questions and areas of further research

The Cambridge Illustrated History of the Islamic World Francis Robinson, 1996 Islamic peoples account for one fifth of the world's population and yet there is widespread misunderstanding in the West of what Islam really is Francis Robinson and his team set out to address this revealing the complex and sometimes contrary nature of Muslim culture As well as taking on the issues uppermost in everyone's minds such as the role of religious and political fundamentalism they demonstrate the importance of commerce literacy and learning Islamic art the effects of immigration exodus and conquest and the roots of current crises in the Middle East Bosnia and the Gulf Throughout emphasis is placed on the interaction between Islam and the West from the first Latin translations of the Quran to the fatwa on Salman Rushdie This elegant book deliberately sets out to dismantle the Western impression of Islam as a monolithic world and replace it with a balanced view from current issues of fundamentalism to its dynamic culture and art Francis Robinson is the editor of two outstanding reference works *Atlas of the Islamic World Since 1500* Cambridge 1982 and *The Cambridge Encyclopedia of Islam* 1990

HMS London Iain Ballantyne, 2002-06-06 A fascinating and lively account of the lives of British warships named London looking at history from the perspective of the men who were there There is no current warship in the Royal Navy called HMS London but vessels carrying the name have featured in some of the most controversial episodes of British naval history For example the wooden wall battleship HMS London of the late 18th century could be called the ship that lost America while the heavy cruiser of WW2 was command vessel for the escort force that failed to safeguard the controversial convoy PQ17 Examining the stories of HMS Londons all the way from the

English Civil War through the Battle of Copenhagen in 1801 where Nelson famously ignored signals to break off the action displayed by HMS London we also learn of the pre dreadnought London's participation in the ill fated Dardanelles campaign of WW1 Among the people Iain Ballantyne interviewed for this book were veterans of the Arctic convoys of WW2 the Yangtze Incident and warriors of the Cold War and 1991 Gulf War It all adds up to a thoroughly researched and exciting narrative of naval history Adding to the authenticity of the tale Iain even sailed to Russia in the last HMS London a Type 22 guided missile frigate in August 1991 During a WW2 convoy re enactment the ship was almost hit by a practice torpedo launched from a Soviet submarine and had to take evasive action

Suitable Heresies Graham Rabey, 2009 The theory suggests that there is a structural similarity between certain basic brain forms and certain basic mind forms and that the former provide a credible explanation for the latter It does not suggest that the causative link has been proved thereby What is claimed is that in the jungle of brain mind research where fundamental physical evidence for speculation is often in short supply the theory provides a scientifically and philosophically arguable clearing and thus a hypothesis worthy of investigation by anyone interested in the mysteries of human thought One implication of the theory amounts to a central heresy namely that on the accumulating evidence our traditional and much cherished one truth thinking conventions will need to be replaced by two truth thinking conventions Another implication of the theory is that it now seems entirely possible that the emergence and nature of philosophy itself have been crucially dependent on our long human struggle to extract single responses from thinking equipment that appears necessarily i.e. anatomically double and circular the double cycles being mutually inverted

Philip's Atlas of World History , 2001 Mathematical Enculturation Alan Bishop, 2012-12-06 Mathematics is in the unenviable position of being simultaneously one of the most important school subjects for today's children to study and one of the least well understood Its reputation is awe inspiring Everybody knows how important it is and everybody knows that they have to study it But few people feel comfortable with it so much so that it is socially quite acceptable in many countries to confess ignorance about it to brag about one's incompetence at doing it and even to claim that one is mathophobic So are teachers around the world being apparently legal sadists by inflicting mental pain on their charges Or is it that their pupils are all masochists enjoying the thrill of self inflicted mental torture More seriously do we really know what the reasons are for the mathematical activity which goes on in schools Do we really have confidence in our criteria for judging what's important and what isn't Do we really know what we should be doing These basic questions become even more important when considered in the context of two growing problem areas The first is a concern felt in many countries about the direction which mathematics education should take in the face of the increasing presence of computers and calculator related technology in society

Firearms: An Illustrated History DK, 2014-03-17 This fascinating visual account of firearms shows everything from the earliest cannons to modern weapons of war It also highlights how gun technology and military tactics developed in tandem over time Centuries ago the Chinese discovered that if they put gunpowder and a projectile into a metal

Rose Arny,2002-02 Studies in Islamic Civilization Ahmed Essa,Othman Ali,Othman Ali ,2010-01-01 Studies in Islamic Civilization draws upon the works of Western scholars to make the case that without the tremendous contribution of the Muslim world there would have been no Renaissance in Europe For almost a thousand years Islam was arguably one of the leading civilizations of the world spanning a geographic area greater than any other It eliminated social distinctions between classes and races made clear that people should enjoy the bounties of the earth provided they did not ignore morals and ethics and rescued knowledge that would have been lost if not forever then at least for centuries The genius of its scholars triggered the intellectual tradition of Europe and for over seven hundred years its language Arabic was the international language of science Strange then that its legacy lies largely ignored and buried in time In the words of Aldous Huxley Great is truth but still greater from a practical point of view is silence about truth By simply not mentioning certain subjects propagandists have influenced opinion much more effectively than they could have by the most eloquent denunciations Studies in Islamic Civilization is a compelling attempt to redress this wrong and restore the historical truths of a golden age that ushered in the Islamic renaissance and as a by product that of the West In doing so it gives a bird s eye view of the achievements of a culture that at its height was considered the model of human progress and development American yachts and yachting, with illustr. by F.S. Crane,1887 **Irish English** Raymond Hickey,2007-11-08 English has been spoken in Ireland for over 800 years making Irish English the oldest variety of the language outside Britain This 2007 book traces the development of English in Ireland both north and south from the late Middle Ages to the present day Drawing on authentic data ranging from medieval literature to authentic contemporary examples it reveals how Irish English arose how it has developed and how it continues to change A variety of central issues are considered in detail such as the nature of language contact and the shift from Irish to English the sociolinguistically motivated changes in present day Dublin English the special features of Ulster Scots and the transportation of Irish English to overseas locations as diverse as Canada the United States and Australia Presenting a comprehensive survey of Irish English at all levels of linguistics this book will be invaluable to historical linguists
