Self-Consciousness Masakazu Shoji,2020-02-24 A summary of author Masakazu Shoji s previous works Self Consciousness Human Brain as Data Processor explains self consciousness by using a simple mechanical model of the human brain which reflects its past development of evolution by natural selection The model was built from the information acquired from the unbiased introspective observation of Shoji s own mind and other rational assumptions In this

study geared for those with a background in the research and science of psychology Shoji introduces a new approach based on systems and information science it relies on the synthetic method of study by designing the human brain's functional model It deals with the self-conscious directly without adding in subconsciousness or quantum mystery as has been done previously The model was designed realistically using hardware built with genetic instructions using neurons as the elements of digital and analog operations Shoji shares that versions of this model reveal how humans acquire and store memories of images of the outside objects sense the images internally execute necessary actions directed by the images feel an emotional state by facing life's events and develop intelligence by accumulated experiences The model also explains mysterious mental experiences such as seeing dreams daydreams phantoms ghosts and feeling premonitions

Optical Networks Debasish Datta, 2022-03-01 Following the emergence of lasers and optical fibers optical networking made its beginning in the 1970s with high speed LANs MANs In the 1980s when the bandwidth of intercity microwave links turned out to be inadequate for digital telephony the technology for single wavelength optical communications using SONET SDH arrived as a saviour to replace the microwave links However single wavelength links couldn't utilize the huge bandwidth 40 THz of optical fibers while the bandwidth demands kept soaring This necessitated the use of wavelength division multiplexing WDM for concurrent transmission over multiple wavelengths increasing the available bandwidth significantly Today optical networking has become an indispensable part of telecommunication networks at all hierarchical levels The book Optical Networks provides a graduate level presentation of optical networks capturing the past present and ensuing developments with a unique blend of breadth and depth The book is organized in four parts and three appendices Part I presents an overview and the enabling technologies in two chapters Part II presents the single wavelength optical networks in three chapters while Part III deals with the various forms of WDM optical networks in four chapters Finally Part IV presents some selected topics in six chapters dealing with a number of contemporary and emerging topics Optical Networks provides a comprehensive all in one text for beginning graduate as well as final year undergraduate students and also allows R D engineers to quickly refresh the basics and then move on to emerging topics

Railway Reading and Late-Victorian Literary Series Paul Raphael Rooney, 2018-05-11 The railway was one of the principal Victorian spaces of reading This book spotlights one of the leading audience demographics in this late Victorian market the newly empowered readers of the expanding middle class The transactions in which late Victorian readers acquired the books read whilst travelling are reconstructed by exploring the leading determinants of consumers purchasing choices at the railway station bookstalls selling books intended for reading in this zone This exploration concentrates on the impact of forces like the input of the staff running the bookstalls and the commercial environment in which consumers made their purchases At the center of this study is a leading and still relatively under examined genre of Victorian print culture circulating in this reading space the series

Rooney examines three leading examples of late Victorian series which sought to satisfy railway passengers need for literary reading matter Many of the period s principal authors and literary genres featured in their lists Each venture is representative of one of the three main pricing tiers of series publishing Employing an eclectic methodological framework combining cultural studies and book history approaches with concepts from the new humanities the reading experiences furnished by the light fiction of these series are reconstructed This study reflects the recent growth in scholarship on historical readership the expansion in the canon of Victorian popular literature and the broader material turn in nineteenth century studies
