Case summary

The patient is a 38-year-old married female working in an administrative position. She reports experiencing weight fluctuations and struggles to eat motivated to do so, accompanied by fatigue and trouble sleeping. She reports symptoms include persistent anxiety, increased depression, possible ADHD, sleep disturbances, early morning and afternoon awakenings, and difficulty concentrating on tasks. She reports feeling overwhelmed by her personal and professional life. She is particularly concerned about how her anxiety might affect her children. Additionally, there is a desire to learn more about her struggles. The patient reports a family history with the mother and extended family members who used to be treated with anti-depressant medication, suggesting a genetic predisposition to mental health challenges. She reports feeling overwhelmed by her personal and professional life, which are significant sources of stress. She also reports symptoms include chronic stress, chronic pain, and persistent anxiety that makes it difficult to be with her family. The patient is also in therapy and struggles to improve her mental health. Additionally, a challenge is address the chronic symptoms impact by personal experiences and family history. She reports feeling overwhelmed at the time, as described her family life is complex and full of challenges, with motherhood being a significant source of stress. The patient is struggling, but she sometimes feels overwhelmed by her family, particularly her children. Although she has enough resources to meet her needs, financial concerns persist without adequate support. The patient reports a complex history of mental health challenges, family influences, and personal experiences for anxiety and fatigue.
