Richardson, Chang Woon Nam, 2014-03-14

This book examines a rapidly emerging new topic in urban settlement patterns the role of shrinking cities Much coverage is given to declining fertility rates ageing populations and economic restructuring as the factors behind shrinking cities but there is also reference to resource depletion the demise of single company towns and the micro location of environmental hazards The contributions show that shrinkage can occur at any scale from neighbourhood to macro region and they consider whether shrinkage of metropolitan areas as a whole may be a future trend Also addressed in this volume is the question of

whether urban shrinkage policies are necessary or effective The book comprises four parts world or regional issues with reference to the European Union and Latin America national case studies the United States India China Korea Taiwan Germany Romania and Estonia city case studies Detroit Buffalo Cleveland Naples Belfast and Halle and broad issues such as the environmental consequences of shrinking cities This book will be of interest to scholars and practitioners working in the fields of urban studies economic geography and public policy

**Parallel Patterns of Shrinking Cities and Urban Growth** Rocky Piro, 2016-05-06 Focussing particularly on urban fringe and rural areas this book addresses the parallel phenomena of growth and decline In doing so it not only broadens a debate which generally concentrates on urban municipalities especially inner city areas but also covers new ground by starting to build a new theoretical framework for the spatial planning related assessment of these phenomena Bringing together contributions from internationally renowned authors such as Sir Peter Hall Steve Ward and Johann Jessen the book compares international case studies and highlights their relationships with one another It concludes by emphasizing common themes that are addressed as well as showing applicability to other urban and rural regions Overall the book provides a timely and comprehensive analysis of the spatial consequences and related spatial planning concepts in theory and practice which aim to further sustainable development of city regions urban fringe and rural areas experiencing growth and decline

Quietly Shrinking Cities Maxwell Hartt, 2021-04-01 At 5 percent Canada's population growth was the highest of all G7 countries when the most recent census was taken But only a handful of large cities drove that growth attracting human and monetary capital from across the country and leaving myriad social economic and environmental challenges behind Quietly Shrinking Cities investigates a trend that has been largely overlooked over 20 percent of Canadian cities shrank between 2011 and 2016 and twice that proportion grew more slowly than the national average Yet continuous ubiquitous growth is considered normal and policy and planning professionals have had little success in managing the practical challenges associated with population loss Declining birth rates and an aging population only compound the phenomenon This meticulous work demonstrates that shrinking cities need to rethink their planning and development strategies in response to a new demographic reality questioning whether population loss and prosperity are indeed mutually exclusive

**A Research Agenda for Shrinking Cities** Justin Hollander, 2018-01-26 This prescient book presents the intellectual terrain of shrinking cities while exploring the key research questions in each of the field's sub domains and reviewing the range of methodologies within these topics

**Governance and Leadership in Shrinking Cities** Stanisław Mazur, 2023-08-24 The aim of this publication is to look in depth at depopulation a trend that is affecting an increasing number of cities worldwide It has recently become a critical issue with a range of detrimental social economic spatial and financial consequences However attempts by central and local governments to combat depopulation have yet to yield satisfactory results Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions mobilizing resources and

creating networks to address the problem has been underestimated Moreover according to the authors of this monograph there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation it is impossible to pursue effective public policies in this regard This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives Further the book provides a new interpretation of the processes associated with these trends The magnitude of the phenomenon in question the negative spatial economic and social consequences as well as the relatively low effectiveness of policies aimed at its mitigation will make this book an invaluable guide for researchers and students from a wide range of disciplines including urban studies economics public management leadership studies local government climate change and energy transition and urban movements The audience will also comprise of policymakers and urban experts such as sociologists planners social geographers economists and architects

*Shrinking Cities in Reunified East Germany* Agim

Kërçuku,2022-10-03 The book explores the relationship between the shrinking process and architecture and urban design practices Starting from a journey in former East Germany six different scenes are explored in which plans projects and policies have dealt with shrinkage since the 1990s The book is a sequence of scenes that reveals the main characteristics dynamics narratives reasons and ambiguities of the shrinking cities transformations in the face of a long transition The first scene concerns the demolition and transformation of social mass housing in Leinefelde Worbis The second scene deals with the temporary appropriation of abandoned buildings in Halle Neustadt The third scene observed in Leipzig shows the results of green space projects in urban voids The scene of the fourth situation observes the extraordinary efforts to renaturise a mining territory in the Lausitz region The fifth scene takes us to Hoyerswerda where emigration and ageing process required a reduction and demolition in housing stock and social infrastructures The border city of Grlitz the sixth and last scene deals with the repopulation policies that aim to attract retirees from the West

**Many Urbanisms** Martin J. Murray,2022-02-15

Winner 2023 Choice Outstanding Academic Title Now for the first time in history the majority of the world's population lives in cities But urbanization is accelerating in some places and slowing down in others The sprawling megacities of Asia and Africa as well as many other smaller and medium sized cities throughout the Global South are expected to continue growing At the same time older industrial cities in wealthier countries are experiencing protracted socioeconomic decline Nonetheless mainstream urban studies continues to treat a handful of superstar cities in Europe and North America as the exemplars of world urbanism even though current global growth and development represent a dramatic break with past patterns Martin J Murray offers a groundbreaking guide to the multiplicity heterogeneity and complexity of contemporary

global urbanism He identifies and traces four distinct pathways that characterize cities today tourist entertainment cities with world class aspirations struggling postindustrial cities megacities experiencing hypergrowth and instant cities or master planned cities built from scratch Murray shows how these different types of cities respond to different pressures and logics rather than progressing through the stages of a predetermined linear path He highlights new spatial patterns of urbanization that have undermined conventional understandings of the city exploring the emergence of polycentric fragmented haphazard and unbounded metropolises Such cities he argues should not be seen as deviations from a norm but rather as alternatives within a constellation of urban possibility Innovative and wide ranging Many Urbanisms offers ways to understand the disparate forms of global cities today on their own terms
