Lords of Things Maurizio Peleggi,2002-07-31 Lords of Things offers a fascinating interpretation of modernity in late nineteenth and early twentieth century Siam by focusing on the novel material possessions and social practices adopted by the royal elite to refashion its self and public image in the early stages of globalization It examines the westernized modes of consumption and self presentation the residential and representational architecture and the public spectacles appropriated by the Bangkok court not as byproducts of institutional reformation initiated by modernizing sovereigns but as practices and objects constitutive of the very identity of the royalty as a civilized and civilizing class Bringing a wealth of new source material into a theoretically informed discussion Lords of Things will be required reading for historians of Thailand and Southeast Asia scholars generally It represents a welcome change from previous studies of Siamese modernization that are almost exclusively concerned with the institutional and economic dimensions of the process or with foreign relations and will appeal greatly to those interested in transnational cultural flows the culture of colonialism the invention of tradition and the relationship between consumption and identity formation in the modern era **The Garland Encyclopedia of World**

**The Modern in Southeast Asian Art** T.K. Sabapathy,Patrick Flores,2023-05-12 Who spoke of the modern in Southeast Asia When and where was the modern written How was it written How was it received This collection brings together nearly 300 texts that were originally published between the late 19th to late 20th centuries selected by a group of scholars as responses to questions such as

these The texts were produced chiefly in various locations in the region by artists critics historians and curators in 11 languages many of which had never before been translated into the English language Years in the making this publication is the first to present such breadth and depth of art writing in the region of Southeast Asia and will be a valuable resource to students teachers scholars and those interested in Southeast Asian studies and art history Looking from inside the region the rich fecundity of art discourses becomes clear if for example we compare the 1843 text by Raden Saleh from what is now Indonesia with the 1946 text of S Sudjojono allowing a historical grasp of modernity from two of its original texts or across the region to the 1971 text on Malaysia by Piyadasa The tyranny of physical cultural and temporal separation are thus overcome It is to the great credit of the editors that they have enabled this for us and this work will be a basic art historical reference both inside and beyond the region for some time to come John Clark Emeritus Professor of Art History University of Sydney Needed now more than ever this collection opens up new worlds in the guise of a region called Southeast Asia Each carefully selected text offers a new point of access to thinking through across beyond and with the elusive idea of the modern A signal achievement this volume is both a rich introduction to the region as well as a vital resource for anyone genuinely committed to art histories that generate new spaces rather than settle for existing realms Joan Kee Professor History of Art University of Michigan
