Sibling Species Of Titmice In The Parus Inornatus Complex:

Sibling Species of Titmice in the Parus Inornatus Complex (Aves Carla Cicero,1996-04-08 In a comprehensive investigation of macrogeographic variation in the Plain Titmouse *Parus inornatus* complex in western North America the author assessed population level patterns of differentiation in morphometric colorimetric allozymic mtDNA and vocal characters These suites of traits showed broad geographic concordance distinguishing Pacific slope from interior populations These two groups of populations are treated as sibling species Sibling Species of Titmice in the Parus Inornatus Complex

(Aves: Paridae) Carla Cicero,1993 Birds of the Sierra Nevada Ted Beedy,Ed Pandolfino,2013-06-17 This beautifully illustrated and user friendly book presents the most up to date information available about the natural histories of birds of the Sierra Nevada the origins of their names the habitats they prefer how they communicate and interact with one another their relative abundance and where they occur within the region Each species account features original illustrations by Keith Hansen In addition to characterizing individual species *Birds of the Sierra Nevada* also describes ecological zones and bird habitats recent trends in populations and ranges conservation efforts and more than 160 rare species It also includes a glossary of terms detailed maps and an extensive bibliography with over 500 citations *The Taxonomy, Systematics, and Zoogeography of Hypsibarbus, a New Genus of Large Barbs (Pisces, Cyprinidae) from the Rivers of Southeastern Asia* Walter J. Rainboth,1996-01-01 In this study the author describes *Hypsibarbus* a new genus of Asian cyprinid fishes with twelve species three of them new A complete set of 45 measurements and 17 counts was taken and analyzed for approximately 250 specimens including all type material of more than 1000 specimens encountered representing most of the major fish collections of the world The author fully redescribes and illustrates all species in the new genus and includes keys for their identification To provide a basis for understanding zoogeographic implications of the phylogeny obtained for *Hypsibarbus* the geography and history of the Southeast Asia river basins is discussed in detail **Ecology and Behavior of Chickadees and Titmice** Ken A. Otter,2007-02-01 Chickadees and titmice are among the most popular birds in North America due in large part to their readiness to use bird feeders to nest in urban gardens and even to be trained to take food from people's hands These attributes have also made them and their Eurasian tit counterparts perhaps the most intensively studied bird family in the world Long term research in Europe has yielded some of the most comprehensive data on the impact of global warming on the breeding ecology of birds Chickadees have amongst the best studied and most complex vocal behaviour of any bird species displaying one of the closest analogies to human sentence structure in the animal kingdom in their familiar chick a dee call The social dominance hierarchies commonly witnessed in the form of squabbling at winter feeders are some of most stable and closely studied and have huge impacts on controlling the lives of these small birds Their food storing behavior and the brain and physiological mechanisms controlling this has contributed significantly to our wider understanding of spatial orientation In recent years these birds have also been used as model species for investigating topics

as diverse as inter species hybridization the impacts of forest fragmentation and complex systems of communication In short chickadees and titmice have contributed enormously to our understanding of a myriad of topics in ecology behavior and psychology This book brings together a range of experts from across North America who utilise chickadees or titmice as study organisms Each chapter reviews the latest advances in evolution and behavioral research that have been accomplished through the study of North American Parids and compares and contrasts this literature with research on their Eurasian counterparts as well as other avian families This research level text is aimed at professional avian biologists and ornithologists as well as graduate students of avian behavioral ecology and evolution It will also appeal to a more general audience of behavioural ecologists neuroethologists and experimental psychologists Eagle Lake Field Office ,2007
