Sidelights on Tranmere J. E. Allison, 1958 **Welfare's Forgotten Past** Lorie Charlesworth, 2009-12-16 That poor law was law is a fact that has slipped from the consciousness of historians of welfare in England and Wales and in North America Welfare's Forgotten Past remedies this situation by tracing the history of the legal right of the settled poor to relief when destitute Poor law was not simply local custom but consisted of legal rights duties and obligations that went beyond social altruism This legal truth is however still ignored or rejected by some historians and thus lost to social welfare policy makers This forgetting or minimising of a legal enforceable right to relief has not only led to a misunderstanding of welfare's past it has also contributed to the stigmatisation of poverty and the emergence and persistence of the idea that its relief is a gift from the state Documenting the history and the effects of this forgetting whilst also providing a legal history of welfare Lorie Charlesworth argues that it is timely for social policy makers and reformists in Britain the United States and elsewhere to reconsider an alternative welfare model based on the more positive legal aspects of welfare's 400 year legal history

Networks of Influence and Power Robert Lee, 2023-12-01 During the nineteenth century Liverpool became the heart of an international maritime network As the second city of Empire its merchants and shipowners operated within a transnational commercial and financial system while its trading connections stimulated the development of new markets and their integration within an increasingly global economy This ground breaking volume brings together ten original contributions that reflect upon the development of the city's business community from the early nineteenth century to the outbreak of the First World War with an emphasis on the period from 1851 to 1912 It offers the first detailed analysis of Liverpool's merchant community within a conceptual and historiographical framework which focuses on the economic social and cultural role of business elites in the nineteenth century It explores the extent to which business success was predicated on the maintenance of networks of trust analyses the importance of business culture in structuring commercial operations and discusses the role of ethics trust and reputation within the changing framework of the business environment

Particular attention is paid to the role of women and the important contribution of the family to commercial success and the maintenance of social networks. Changes in business practice and social networks are also examined within a spatial context in order to assess the impact of the development of a distinct commercial centre and the clustering of commercial activity on interaction, reputation and trust while particular attention is paid to the effect of suburbanization on existing associational networks, the social cohesiveness of business culture and the cultural identity of the merchant community as a whole.
