Literature and Identity in Italian Baroque Travel Writing

Nathalie Hester, 2016-12-05 This first full length study in English on seventeenth century Italian travel writing enriches our understanding of an unusually fertile period for Italian contributions to the genre The intrinsic qualities of this literature can now be grasped in terms of the larger question of cultural identity in Italy For Hester the specifically literary characteristics of Italian travel writing including its humanism or Petrarchism highlight the classic eminence throughout Europe of a prestigious tradition inherent to Italy one compensating then for the peninsula's lack of a national political identity Appeals to the cultural authority of that tradition represent a means of addressing and overcoming anxieties about the Italian subject's diasporic status during the Golden Age of European global colonial expansion Self funded travelers Francesco Carletti Pietro Della Valle Francesco Belli Francesco Negri and Giovanni Francesco Gemelli Careri are the major authors studied who journeyed through Europe the Middle East Asia and America

Panacea's Daughters Alisha Rankin, 2013-03-19 Panacea's Daughters provides the first book length study of noblewomen's healing activities in early modern Europe Drawing on rich archival sources Alisha Rankin demonstrates that numerous German noblewomen were deeply involved in making medicines and recommending them to patients and many gained widespread fame for their remedies Turning a common historical argument on its head Rankin maintains that noblewomen's pharmacy came to prominence not in spite of their gender but because of it Rankin demonstrates the ways in which noblewomen's pharmacy was bound up in notions of charity class religion and household roles as well as in expanding networks of knowledge and early forms of scientific experimentation The opening chapters place noblewomen's healing within the context of cultural exchange experiential knowledge and the widespread search for medicinal recipes in early modern Europe Case studies of renowned healers Dorothea of Mansfeld and Anna of Saxony then demonstrate the value their pharmacy held in their respective roles as elderly widow and royal consort while a study of the long suffering Duchess Elisabeth of Rochlitz emphasizes the importance of experiential knowledge and medicinal remedies to the patient's experience of illness

Smith reevaluates significant aspects of the Arcadian reform aesthetic and establishes a historically informed method of opera criticism for modern scholars and interpreters Unfolding in a narrative fashion the text explores facets of the philosophical and literary background and concludes with close readings of text and music using visual symbolism to create readings of gender and character in two operas Alessandro Scarlatti's *La Statira* Rome 1690 and Carlo Francesco Pollaro's *La forza della virt* Venice 1693 Smith's interdisciplinary approach enhances our modern perception of this rich and underexplored repertory and will appeal to students and scholars not only of opera but also of literature philosophy and visual and intellectual cultures **Reader's Guide to the History of Science** Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **History of Universities: Volume XXXIV/2** Mordechai Feingold, 2021 This book covers a mix of learned articles and book reviews which discusses academic moral philosophy and noble virtues It includes topics about Rodrigo de Arriaga in Prague Nicolaus Andreae Granius and academic writing in early modern ethics It also discusses Johann Bartold Niemeier the Nicomachean ethics and the teaching of rhetoric at the Akademia Zamojska and emblematic pedagogy and Nuremberg civic culture The book captures the richness and diversity of teachings on ethics in early modern universities by clearly illustrating the workings of the teaching of ethics from the late fifteenth to the late seventeenth century from Spain to Prague It describes the Protestant universities in the German territories and the regions of central Europe in the Polish Lithuanian Commonwealth **Medicine and Religion in Enlightenment Europe** Andrew Cunningham, 2017-03-02 The Enlightenment period here understood as covering the years 1650 to 1789 is usually considered to be a period when religion was obliged to give way to rationality With respect to medicine this means that the religious elements in the treatment and interpretation of diseases to all intents and purposes disappeared However there are growing indications in recent scholarship that this may well be an overstatement Indeed it appears that religion retained many of its customary relations with medicine This volume explores how far and the ways in which this was still the case It looks at this multi faceted relationship with respect to among others medical care and death in hospitals religious vocation and nursing chemical medicine and religion the clergy and medicine the continued significance of popular medicine faith healing dissection and religion and religious dissent and medical innovation Within these significant areas the volume provides a
