Siegfried Kracauer An Introduction:

Siegfried Kracauer Gertrud Koch, 2000-03-27 Siegfried Kracauer has been misunderstood as a naive realist appreciated as an astute critic of early German film and noticed as the interesting exile who exchanged letters with Erwin Panofsky But he is most widely thought of as the odd uncle of famed Frankfurt School critical theorists Jürgen Habermas Theodor Adorno Walter Benjamin and Max Horkheimer Recently however scholars have rediscovered in Kracauer's writings a philosopher sociologist and film theorist important beyond his associations and perhaps one of the most significant cultural critics of the twentieth century Gertrud Koch advances this Kracauer renaissance with the first ever critical assessment of his entire body of work Koch's analysis which is concise without sacrificing thoroughness or sophistication covers both Kracauer's best known publications e.g. *From Caligari to Hitler* in which he gleams the roots of National Socialism in the films of the Weimar Republic and previously underexamined texts including two newly discovered autobiographical novels Because Kracauer's wide ranging works emerge from no rigidly unified approach instead always remaining open to unusual and highly individual perspectives Koch resists the temptation to force generalization She does however identify recurring tropes in Kracauer's lifetime effort to perceive the basic posture and composition of particular cultures through their visual surfaces Koch also finds in Kracauer a surprisingly contemporary cultural commentator whose ideas speak directly to current discussions on film urban modernity feminism cultural representation violence and other themes This book was long awaited in Germany as well as widely and well reviewed Now translated into English for the first time it will fuel already growing interest in the United States where Kracauer lived and wrote from 1941 until his death in 1966 It will attract the attention of students and scholars working in Film Studies German Studies Comparative Literature Critical Theory Cultural Studies Philosophy and History

The City Cultures Reader Malcolm Miles, Tim Hall, Iain Borden, 2004 Cities are products of culture and sites where culture is made By presenting the best of classic and contemporary writing on the culture of cities this reader provides an overview of the diverse material on the interface between cities and culture

Theory of Film Siegfried Kracauer, 1997 This study explores the distinctive qualities of the cinematic medium It includes an introduction which examines Theory of Film in the context of Kracauer's extensive film criticism from the 1920s and provides a framework for appreciating its significance in contemporary film theory

Reframing the Past Mia E. M. Treacey, 2016-02-26 Reframing the Past traces what historians have written about film and television from 1898 until the early 2000s Mia Treacey argues that historical engagement with film and television should be reconceptualised as Screened History an interdisciplinary international field of research to incorporate and replace what has been known as History and Film It draws from the fields of Film Television and Cultural Studies to critically analyse key works and connect past scholarship with contemporary research Reconsidered as Screened History the works of Pierre Sorlin Marc Ferro John O'Connor Robert Rosenstone and Robert Toplin are explored alongside lesser known but equally important contributions This book identifies a number of common themes and ideas that

have been explored by historians for decades the use of history on film and television as a way to teach the past the challenge of filmic and televisual history to more traditional historiography and an ongoing battle to find an appropriate historical way to engage with Film Studies and Theory Screened History offers an approach to exploring History Film and Television that allows room for future developments while connecting them to a rich and diverse body of past scholarship Combining a narrative of historical research on film and television over the past century with a reconceptualisation of the field as Screened History Reframing the Past is essential reading both for established scholars of History and Film Film History and other related disciplines and to students new to the field **The Mathematical Imagination** Matthew

Handelman,2019-03-05 This book offers an archeology of the undeveloped potential of mathematics for critical theory As Max Horkheimer and Theodor W Adorno first conceived of the critical project in the 1930s critical theory steadfastly opposed the mathematization of thought Mathematics flattened thought into a dangerous positivism that led reason to the barbarism of World War II The Mathematical Imagination challenges this narrative showing how for other German Jewish thinkers such as Gershom Scholem Franz Rosenzweig and Siegfried Kracauer mathematics offered metaphors to negotiate the crises of modernity during the Weimar Republic Influential theories of poetry messianism and cultural critique Handelman shows borrowed from the philosophy of mathematics infinitesimal calculus and geometry in order to refashion cultural and aesthetic discourse Drawn to the austerity and muteness of mathematics these friends and forerunners of the Frankfurt School found in mathematical approaches to negativity strategies to capture the marginalized experiences and perspectives of Jews in Germany Their vocabulary in which theory could be both mathematical and critical is missing from the intellectual history of critical theory whether in the work of second generation critical theorists such as Jürgen Habermas or in contemporary critiques of technology The Mathematical Imagination shows how Scholem Rosenzweig and Kracauer's engagement with mathematics uncovers a more capacious vision of the critical project one with tools that can help us intervene in our digital and increasingly mathematical present The Mathematical Imagination is available from the publisher on an open access basis

of literature art film and even politics Senelick argues that Offenbach's importance spread far beyond France and that his provocative and entertaining works often seen as being more style than substance influenced numerous key artists writers and thinkers and made a major contribution to the development of modern society **Weimar Cinema, Embodiment, and Historicity** Mason Kamana Allred, 2017-01-20 In its retrieval and re construction the past has become interwoven with the images and structure of cinema Not only have mass media especially film and television shaped the content of memories and histories but they have also shaped their very form Combining historicization with close readings of German director Ernst Lubitsch's historical films this book focuses on an early turning point in this development exploring how the medium of film shaped modern historical experience and understanding how it moved embodied audiences through moving images

Modernity and the Construction of Sacred Space Aaron French, Katharina Waldner, 2024-07-01 This volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces Not only language and ritual but space place and architecture play a significant role in constructing special or religious spaces However this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general This volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion space and architecture during the emergence of the modern period and up until contemporary times Revisiting the ways in which modern architects and artists have endeavored to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas especially those related to esotericism and to alternative religiosities have transformed the way sacred spaces are conceptualized today **Encyclopedia of the Documentary Film**

Lauer,2016-09-23 The history of American universities is punctuated by shifts in the terms on which the mission of higher education is defined and debated A dramatic moment with lasting effects came with the introduction of German speaking exile intellectuals in the Hitler era In Germany the academic culture of the early twentieth century was torn by the struggle between Wissenschaft and Bildung two symbolic German terms whose lack of precise English equivalents is a sign of the different configuration in America The studies in this book examine the achievements of numerous influential migrant intellectuals against the background of their mediation between the two cultural traditions in science and liberal studies In showing the richness of reciprocal influences the book challenges claims about the disruptive influence of exile culture on the American mind A Dictionary of Film Studies Annette Kuhn,Guy Westwell,2012-06-21 This volume covers all aspects of

and more recent poststructuralist thought K Michael Hays creates an entirely new method of reading architectural production Drawing both on the work of modern theorists like Georg Lukacs Walter Benjamin Theodor Adorno and Siegfried Kracauer and on more recent poststructuralist thought K Michael Hays creates an entirely new method of reading architectural production Challenging much of the traditional wisdom about modernism and the avant garde Hays argues that a rigorously articulated posthumanist position was actually developed in the modernist architecture of Hannes Meyer and Ludwig Hilberseimer He reinterprets their buildings projects and writings as constructions of this new category of subjectivity *Street Life and Morals* Lesley Chamberlain, 2021-12-15 With resonance for today this book explores a significant crisis of German philosophy and national identity in the decades around World War II German philosophy famed for its high minded Idealism was plunged into crisis when Germany became an urban and industrial society in the late nineteenth century The key figure of this shift was Immanuel Kant seen for a century as the philosophical father of the nation Kant seemed to lack crucial answers for violent and impersonal modern times This book shows that the social and intellectual crisis that overturned Germany's traditions a sense of profound spiritual confusion over where modern society was headed was the same crisis that allowed Hitler to come to power It also describes how German philosophers actively struggled to create a new kind of philosophy in an effort to understand social incoherence and technology's diminishing of the individual
