Scott, 1958 **Siemens Brothers, 1858-1958** John Dick Scott, 1958 *Siemens Brothers, 1858-1958; an Essay in the History of Industry. With a Foreword by Viscount Chandos* John Dick Scott, 1958 Siemens Brothers & Co. Limited 1858-1958 J. N. Aldington, 1958 Carl Friedrich von Siemens 1872-1941 Johannes Bähr, 2023-10-04 Entrepreneur in an Age of Upheaval Carl Friedrich von Siemens was one of the significant business figures in an era filled with crises and turmoil He became Head of the House of Siemens after World War I and managed the company throughout the German Great Inflation and the Great Depression as well as during the Third Reich and into the early years of World War II This biography provides the first comprehensive portrait of the personality and diverse accomplishments of a man who reorganized the Siemens companies headed the Reichsbahn national railroad for ten years and served politically as a delegate from a democracy supporting party The study shows how he increasingly turned away from party politics and how his position evolved yet again during the Third Reich from compliance with the regime to a growing personal alienation **How Britain Shaped the Manufacturing World, 1851-1951** Philip Hamlyn Williams, 2022-07-28 The peoples of the British Isles gave to the world the foundations on which modern manufacturing economies are built This is quite an assertion but history shows that in the late eighteenth century a remarkable combination of factors and circumstances combined to give birth to Britain as the first manufacturing nation Further factors allowed it to remain top manufacturing dog well into the twentieth century while other countries were busy playing catch up Through two world wars and the surrounding years British manufacturing remained strong albeit while ceding the lead to the United States This book seeks to tell the remarkable story of British manufacturing using the Great Exhibition of 1851 as a prism Prince Albert and Sir Henry Cole had conceived an idea of bringing together exhibits from manufacturers across the world to show to its many millions of visitors the pre eminence of the British 1851 was not the start but rather a pause for a bask in glory This book traces back from the exhibits in Hyde Park s Crystal Palace to identify the factors that gave rise to this pre eminence then follows developments up until the Festival of Britain exactly one century later Steam power and communication by electric telegraph both British inventions predated the Exhibition After it came the sewing machine and bicycle motor car and aeroplane but also electrical power radio and the chemical and pharmaceutical industries where Britain played a leading part **British Labour Management & Industrial Welfare** Robert Fitzgerald, 2024-09-18

Originally published in 1988 this book examines company provision of welfare in the century preceding the Second World War a period of enormous change in the structure and organisation of British industry and management The creation of large scale corporate companies increased the need for settled experienced company workforces and for adequate levels of industrial welfare The paternalistic frequently ad hoc methods associated with smaller firms were replaced with systematic schemes This process is illustrated and discussed in 5 detailed case studies with supportive evidence from many other industries Moreover the political aspects of industrial welfare are not ignored The role of employers in influencing the final form of social legislation for the benefit of their own company schemes is crucial to understanding the development of industrial welfare Region and Strategy in Britain and Japan Takeshi Abe, Douglas A. Farnie, David J. Jeremy, Tetuso Nakaoka, John F. Wilson, 2005-07-20 Highlighting the importance of regional and national differences in industrial

development this book is a pioneering long term comparison of the two regions of Lancashire and Kansai **The Struggle for Control of Global Communication** Jill Hills, 2010-10-01 Tracing the development of communication markets and the regulation of international communications from the 1840s through World War I Jill Hills examines the political technological and economic forces at work during the formative century of global communication Hills analyzes power relations within the arena of global communications from the inception of the telegraph through the successive technologies of submarine telegraph cables ship to shore wireless broadcast radio shortwave wireless the telephone and movies with sound As she shows global communication began to overtake transportation as an economic political and social force after the inception of the telegraph which shifted communications from national to international From that point on information was a commodity and ownership of the communications infrastructure became valuable as the means of distributing information The struggle for control of that infrastructure occurred in part because British control of communications hindered the growing economic power of the United States Hills outlines the technological advancements and regulations that allowed the United States to challenge British hegemony and enter the global communications market She demonstrates that control of global communication was part of a complex web of relations between and within the government and corporations of Britain and the United States Detailing the interplay between American federal regulation and economic power Hills shows how these forces shaped communications technologies and illuminates the contemporary systems of power in global communications

Labour's Lost Leader Paul Tyler, 2007-06-29 The life story of Will Crooks has a Dickensian resonance As a working class child born into abject poverty he experienced the rigours of Poplar Workhouse and Poor Law school Nearly forty years later Crooks became Chairman of the Poplar Board of Guardians the very board that had given him shelter during his challenging early years Crooks was a member of the Coopers Union for fifty five years and a leading pioneer of the trade union and Labour movement for over thirty This significant and sometimes controversial figure has been overlooked by modern historians Here Paul Tyler presents a pioneering political biography of a significant Labour figure at both a local and national

level and an important reinterpretation of the early trade union and labour movement from the 1880s to the 1920s **People and Industries** W.H. Chaloner,2018-01-10 Dr Chaloner considers economic history to be a branch of what the French call the historical sciences and believes that it is impossible to treat usefully of the rise decline and metamorphosis of industries and economics without some consideration of the part played by the efforts of individual men and women in these processes In this collection of essays first published in 1963 he provides biographies of certain entrepreneurs inventors and engineers together with historical surveys of some vital industries **Edison** Ronald Clark,2012-12-17 It is almost a century since Thomas Alva Edison the world s greatest inventor gave the world electric light and exactly one hundred years since he built the first successful phonograph forerunner of the gramophone The man who declared that genius is 1 per cent inspiration and 99 per cent perspiration and who on average lodged a patent every two weeks of his adult life was the most famous American of his day Only now however is it possible to present him clearly against the background of his times and to assess fairly his achievements and his often controversial business and working methods In **Edison The Man Who Made The Future** first published in 1977 Ronald Clark describes the inventor's early untutored upbringing his struggles in the industrial jungle which grew up in the aftermath of the American Civil War and his vital contributions to what became the motion picture industry A prolific inventor in his own right he was also a developer of other men s ideas A pacifist he became President of the U S Naval Consulting Board in the First World War Thrusting enquiring and determined to leave his mark on history he was perhaps the archetypal American of his era **The Power to Manage** Eric L. Wigham,1973-06-18 **The Rise of the Technocrats** W.H.G. Armytage,2013-10-28 First published in 2006 The ambitious role cast for scientists in public affairs has been matched by an equal coyness on the part of scientists to play it Yet in spite of themselves they have been virtually dragged on to the political stage because of their collectivities groups formed over the last four centuries often more fugitive than institutional which have helped modify the human environment thereby enabling men to emancipate themselves from the tyranny of the present and plan for the future The byproducts of such plans from the great botanical gardens to the seed beds of physical scientists like the Ecole Polytechnique have also incubated further ideas about the relation of science and society that are ecumenical in scope Indeed the positivist overtones of the Polytechnique herald the transition from plutocracy to technocracy for the technical intelligentsia trained its German Russian and American counterparts have effected a quasi religious synthesis of physics and politics In this planning was the central theme The social history of such planning with the concomitant views on the social organisation of science is the subject of the book **Pressurising** it is the conviction that we can identify a particular thing only by pointing to the various things it successively was before it became that particular thing that it will presently cease to be and the story which begins four hundred years ago and ends in 1964 **An Economic History of London 1800-1914** Professor Michael Ball,David T Sunderland,2001-04-26 This is the first comprehensive survey of the economic development of the world s first great industrial metropolis Modern theories of urban
