Nevadas south to Kings Canyon National Park and the entire Big Sur region along the coast south to Silver Peak Wilderness. It also provides significant geographic diversity; hikes are spread out across the entire region. No matter where you are in northern California, you can find a hike in the book within a short drive. The guide is unique in the amount of natural history information it provides, especially the geologic stories of the featured destinations. It provides not just the essential directions for completing a hike; it enhances the experience by telling the story of how the landscape came to be the way it is.

Surface Water Supply of Hawaii Geological Survey (U.S.), 1930 **In the Memory of the Map** Christopher Norment, 2012-03-15. Throughout his life, maps have been a source of imagination and wonder for Christopher Norment. Mesmerized by them since the age of eight or nine, he found himself courted and seduced by maps which served functional and allegorical roles in showing him worlds that he might come to know and helping him understand worlds that he had already explored. Maps may have been the stuff of his dreams, but they sometimes drew him away from places where he should have remained firmly rooted. *In the Memory of the Map* explores the complex relationship among maps, memory, and experience, what might be called a cartographical psychology or cartographical history. Interweaving a personal narrative structured around a variety of maps with stories about maps as told by scholars, poets, and fiction writers, this book provides a dazzlingly rich personal and intellectual account of what many of us take for granted. A dialog between desire and the maps of his life, an exploration of the pleasures, utilitarian purposes, benefits, and character of maps, this rich and powerful personal narrative is the matrix in which Norment embeds an exploration of how maps function in all our lives. Page by page, readers will confront the aesthetics, mystery, function, power, and shortcomings of maps, causing them to reconsider the role that maps play in their lives.
