**The Senses and the English Reformation** Matthew Milner,2016-03-03 It is a commonly held belief that medieval Catholics were focussed on the bells and whistles of religious practices the smoke images sights and sounds that dazzled pre modern churchgoers Protestantism in contrast has been cast as Catholicism s austere intellectual and less sensual rival sibling With iis white washed walls lack of incense and often music Protestantism worship emphasised preaching and scripture making the new religion a drab and disengaged sensual experience In order to challenge such entrenched assumptions this book examines Tudor views on the senses to create a new lens through which to explore the English Reformation Divided into two sections the book begins with an examination of pre Reformation beliefs and practices establishing intellectual views on the senses in fifteenth century England and situating them within their contemporary philosophical and cultural tensions Having established the parameters for the role of sense before the

Reformation the second half of the book mirrors these concerns in the post 1520 world looking at how and to what degree the relationship between religious practices and sensation changed as a result of the Reformation By taking this long term binary approach the study is able to tackle fundamental questions regarding the role of the senses in late medieval and early modern English Christianity By looking at what English men and women thought about sight hearing smell taste and touch the stereotype that Protestantism was not sensual and that Catholicism was overly sensualised is wholly undermined Through this examination of how worship was transformed in its textual and liturgical forms the book illustrates how English religion sought to reflect changing ideas surrounding the senses and their place in religious life Worship had to be sensible and following how reformers and their opponents built liturgy around experience of the sacred through the physical allows us to tease out the tensions and pressures which shaped religious reform

The 19th century was a time of new sensory experiences and modes of perception The raucous mechanical intensity of the train and the factory vied for attention with the dazzling splendour of department stores and world fairs Colonization and trade carried European sensations and sensibilities to the world and in turn flooded the West with exotic sights and savours Urban stench became a matter of urgent public concern Photography created a compelling alternate reality accessible only to the eye At the turn of the 20th century the telephone

and the radio isolated and extended the sense of hearing and electrical networks spread their webs throughout cities These novel experiences were reflected in contemporary art and literature which strove for new ways to express modern sensibilities A Cultural History of the Senses in the Age of Empire brings together a group of eminent historians to explore the aesthetic cultural and political formation of the senses during a period of momentous change A Cultural History of the Senses in the Age of Empire presents essays on the following topics the social life of the senses urban sensations the senses in the marketplace the senses in religion the senses in philosophy and science medicine and the senses the senses in literature art and the senses and sensory media
