Uno, 2005-12-08 In the

policy arena as well as in the academic world a new challenge is having to deal with the global community We are increasingly aware that the world is linked through economy energy environment interactions We are increasingly aware at the same time that the emergence of the global community does not imply an integrated harmonious world rather it is a community where countries regions of different interests and values face each other directly Global governance has to be achieved through actions of national governments under different motives and constraints We need to have an analytical tool that is capable of producing a global picture yet with detailed country resolution If the world is a better place now compared to 100 years ago in terms of per capita income this is due to the industrialization that continued throughout the 20th century We entered the 21st century knowing that the human aspiration that translates into ever increasing production may not be tenable in the long run Sustainability of the global community is at stake In contrast to incremental decision making through the market mechanism that should lead to some optimal state under some assumptions such as perfect knowledge smooth movement of resources no externalities and so forth we need to have an analytical tool to provide us with details of the future state of the world **Routledge Handbook of Macroeconomic Methodology** Jesper Jespersen, Victoria Chick, Bert

Tieben, 2023-06-20 The present macroeconomic crisis has demonstrated that a deeper understanding of the importance of relevant macroeconomic theories and methods is wanting Additionally lack of methodological awareness is behind much of the disagreement within macroeconomics which looked upon from outside often appears incomprehensible The Handbook gives a structured presentation of the study of principles and procedures by which macroeconomics is researched taught and communicated both within academia and to a wider audience and why specific theories research strategies and teaching are

preferred The principles of selecting theory relevant to real world problems are the core of methodology This book contains a broad range of arguments behind theory construction and appraisal and the consequences of these choices within the field of macroeconomics An international range of experts provide clear analysis of key concepts ideas and principles to give academics students and others a better understanding of the macroeconomics behind policy conclusions which are put forward at different levels

World Economic Primacy Charles Poor Kindleberger,1996 Examines why certain countries have achieved at some periods in their history economic superiority over all other countries

European Organised Crime Scenarios for 2015 Tom Vander Beken,2006 Policy makers no longer focus on repressive aspects of organised crime alone but want to be informed about coming challenges and threats to allow them to take appropriate preventive action and target their reactive response better For that reason there is a growing demand to change the traditional assessments into analyses that include more prospective elements about current and potential future organised crime situations to identify specific risks or threats to society The book outlines a methodology to perform analyses of long term threats of organised crime and scenario studies and applies this on four case studies at two different levels three studies at Member State level Belgium Slovenia and Sweden and one at the European Union level In a last chapter conclusions and recommendations about the method and its applications are presented The developed methodological tool and the scenarios are intended as a guide for action and consideration for all actors involved in the fight against organised crime

Economics and Utopia Geoffrey M Hodgson,2002-01-04 Since the fall of the Berlin Wall we have been told that no alternative to Western capitalism is possible or desirable This book challenges this view with two arguments First the above premise ignores the enormous variety within capitalism itself Second there are enormous forces of transformation within contemporary capitalisms associated with moves

towards a more knowledge intensive economy These forces challenge the traditional bases of contract and employment and could lead to a quite different socio economic system Without proposing a static blueprint this book explores this possible scenario The Evolution of Strategic Foresight Tuomo Kuosa,2016-03-16 Embracing the theory and practice of strategic foresight and illuminating how different schools of thought regard its role in policy making Tuomo Kuosa describes how something not traditionally considered an independent discipline is steadily becoming one In The Evolution of Strategic Foresight he explains how the practice of strategic foresight has long been closely associated with the military and politics Linking strategic thinking more broadly to futurology however it is quite new Since strategic foresight refers to the practice of generating analyses of alternative futures and strategies based on available intelligence and foreknowledge the practice can and should be applied to companies business sectors national and trans national agencies of all descriptions and to all aspects of public policy making The author explains its practice in terms of structure process and knowledge domains and examines its methodologies and systems along with how strategic foresight can be used to produce better knowledge and be more effectively linked to policy making Using examples from 30 different countries and with access to interviews and workshops involving key experts The Evolution of Strategic Foresight will be valuable to scholars educators students engaged in strategy and future studies long range public policy and urban planners analysts risk assessment experts and consultants managers and decision makers in many organisations public and private **Challenging Neighbours** CPB Netherlands Bureau for Economic Policy Analysis,2012-12-06 Challenging Neighbours provides wide coverage of the German and Dutch economies from an institutional point of view Pensions competition policy labour relations corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared The difficulties and successes the countries have in facing pressures from aging population developments in technology and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers **As Climate Changes** Kenneth M.
