Man Into Wolf An Anthropological Interpretation Of Sadism Masochism And Lycanthropy:

Man into Wolf Robert Eisler, 2023-03-08 First published in 1951 *Man into Wolf* attempts to suggest the possibility of historical or rather prehistorical evolutionist derivation of all crimes of violence from the individual attack on life known as murder or manslaughter to the collective organized killing which we call war The author has tried to show that the evidence from prehistory can be made intelligible on the theory of Jung's archetypes surviving in the collective conscience and revealing themselves all over the world in legends myths and rites He discusses in the notes on the lecture every possible aspect of the subject ranging from the perverseness of the Marquis de Sade to the Grecian Bacchantes and from the Green Men and the agricultural ceremonies to a case study of John George Haigh This book will be of interest to students of anthropology gender studies and psychology

Bartholomew, 2010-11-02 Thinking is an innate ability that most people take for granted But like writing well or speaking effectively before the public thinking well is a skill that can be learned and improved with practice In this unique introduction to critical thinking Robert Bartholomew and Benjamin Radford first lay out the principles of critical thinking and then invite readers to put these principles to the test by examining a series of unusual and challenging case studies Assembling a wide range of bizarre but actual incidents from many cultures and various time periods they demonstrate how the tools of critical thinking can help to unravel alleged paranormal events and seemingly mysterious behavior What factors led to the Martian panic of 1938 Why did many people conclude that an alien spaceship crashed in Roswell New Mexico in 1947 How do we explain the panic expressed by otherwise normal Southeast Asian men who came to believe that a contagious disease was causing their genitals to shrink or the frenzied dance manias that captivated thousands of Europeans during the Middle Ages Bartholomew and Radford show that reality is very much a social construction that cultural assumptions play a large part in our judgments about what is normal and what is deviant and that the use of critical reasoning is our best means of ensuring an objective perspective **The Life Fantastic** Noa Menhaim, 2022-07-12 Explore the sprawling network of culture to

Men, Meowing Nuns and Head-Hunting Panics Robert E. Bartholomew, 2001-06-06 For a two week period in 1956 residents in the vicinity of Taipei Taiwan lived in fear that they would be the next victims of a crazed villain who was prowling the streets and slashing people at random with a razor or similar weapon At least 21 victims were reported during this period mostly women and children of low income and education A thorough investigation revealed however that five slashings were innocent false reports seven were self inflicted cuts eight were due to cuts rather than razors and one was complete fantasy This is one example of many cases of what has traditionally been called mass hysteria that are examined in this

comprehensive study of human beings fear of the unknown Beginning with a concise history of mass hysteria and social delusions the author differentiates between the two and investigates mass hysteria in closed settings such as work and school and mass hysteria in communities with incidents such as gassings Pokemon illnesses in Japan and medieval dance crazes Also examined are collective delusions with information on five major types immediate threat symbolic scare mass wish fulfillment urban legends and mass panics The book ends with a discussion of major issues in the area of mass hysteria and a look toward the future of this intriguing subject **From vanitas to veritas** Audrey Taschini,2018-04-10T00:00:00+02:00

,2018-01-17 A shocking case of unbridled sex sadism prostitution date rape drugs abduction bondage torture sexploitation perverted fetishes serial killing and dismemberment of the depraved New York notorious Ripper Historian and International Bestselling Author Peter Vronsky describes his brief encounter with serial killer Cottingham in a seedy New York hotel in 1979 that later inspired him to write his bestseller history Serial Killers The Method and Madness of Monsters In Times Square Torso Ripper Vronsky explores the history of the notorious Forty Deuce strip on 42nd Street near Times Square and how it spawned the sadistic monster Richard Cottingham in an era before the term serial killer had been coined in popular culture Renowned serial homicide expert Dr Robert D Keppel said of Richard Cottingham I kept asking myself what it was

that ultimately intrigued me about the Cottingham case Partly it was the level of sadistic torture that Cottingham acted out on his victims He didn't kill them and desecrate their bodies he forced them to experience pain and humiliation before he killed them Then he desecrated their bodies Includes 50 photos Character in the Short Prose of Ivan Sergeevič Turgenev Sander Brouwer, 2023-07-10 In this book the problem of literary character is investigated in a series of detailed analyses of short stories by I S Turgenev *Bezhin Lea Mumu A Journey into Poles The Dog and Punin and Baburin* Up until roughly the 1920s in Russia before Formalism the approach to character in literary criticism was based on the implicit assumption that literary character somehow reflected characters in real life who were thought to have a fixed inner essence psychological and or ideological In post formalist structuralist studies on the other hand character as it were dissolved into the textual fabric of the work In this book the basic viewpoint of structuralist theory of character namely its exclusively textual nature is retained But in that case how is the structure of character in texts of the pre modernist era to be described in which the belief in the existence of an inner essence in actual as well as in fictional characters had hardly yet been shaken In order to tackle this problem the author turns to Roman Jakobson's idea taken up and developed by W Schmid and A Hansen Lve that the meaning of a work of literature is generated by the interaction of paradigmatic and syntagmatic mechanisms The image of character in Turgenev's stories is the result of devices characteristic of narrative as well as of verbal art It is partly created with the help of leitmotifs that form sequences of equivalences and of intertextual references Thus social representation is supplemented by lyrical and philosophical overtones Comparable observations have been made by V M Markovic 1982 on Turgenev's novels as well as on those by Pu kin Gogol and Lermontov For the assessment of intra and intertextual equivalences it has been found of great importance to pay more attention than is usually done to folkloric connotations of details in Turgenev's fictional world Thus new layers of meaning can be uncovered in stories that have been considered well studied and a first ever interpretation is given of *The Dog* a story traditionally regarded as incomprehensible

Jung's Studies in Astrology Liz Greene, 2019-09-04 Winner of the IAJIS award for best authored book of 2018 C G Jung had a profound interest in and involvement with astrology which he made clear in virtually every volume of the *Collected Works* as well as in many of his letters This ancient symbolic system was of primary importance in his understanding of the nature of time the archetypes synchronicity and human fate Jung's *Studies in Astrology* is an historical survey of his astrological work from the time he began to study the subject It is based not only on his published writings but also on the correspondence and documents found in his private archives many of which have never previously seen the light of day Liz Greene addresses with thoroughness and detailed scholarship the nature of Jung's involvement with astrology the ancient medieval and modern sources he drew on the individuals from whom he learned his ideas about how and why it worked its religious and philosophical implications and its applications in the treatment of his patients as well as in his own self understanding Greene clearly demonstrates that any serious effort to understand the development of Jung's psychological

theories as well as the nature of his world view needs to involve a thorough exploration of his astrological work This thorough investigation of a central theme in Jung's work will appeal to analytical psychologists and Jungian psychotherapists students and academics of Jungian and post Jungian theory the history of psychology archetypal thought mythology and folklore the history of New Age movements esotericism and psychological astrology

The Ecogothic Werewolf in Literature Kaja Franck, 2025-08-21 Using an Ecogothic lens this book offers a new conceptual framework for the werewolf in literature recasting the lycanthrope as an emblem for society's fear of untamed wilderness Tracing lycanthropy from a place of liminality to hybridity and to myriad and complex subjectivities The Ecogothic Werewolf in Literature reassesses the Gothic werewolf to show how the relationship between humans and wolves has influenced its representation in literature Starting with Dracula and tracing lycanthropic imaginings through natural histories folk and fairy tales to contemporary iterations in the works of Maggie Stiefvater Whitley Strieber and Glen Duncan Kaja Franck reconsiders the trope of the beast within in the werewolf canon From early conservationist Aldo Leopold's awakening regarding the death of wolves to George Monbiot's call to rewild tensions around humanity's responsibility to the natural world have emerged in lycanthropic literature A challenge to previous anthropocentric analysis of Gothic horror's stock monster Franck considers the changing attitude towards wolves alongside the growing environmentalism movement and reclaims the wolf from the figure of the werewolf

The Lycanthropy Reader

Charlotte F. Otten, 2024-07-01 Our understanding of lycanthropy is limited by our association of it with contemporary portrayals of werewolves in horror films and gothic fiction No rational person today believes that a human being can literally be metamorphosed into a wolf therefore in the absence of an historical context the study of werewolves can appear to be a wayward pursuit of the perversely irrational and the sensational This Reader provides the historical context Drawing on primary sources it is a comprehensive survey of all aspects of lycanthropy with a focus on the medieval and Renaissance periods Lycanthropes were on trial in the courtrooms of Europe and on examination in medical offices and mental hospitals they were the objects of communal fear and pity and the subjects of sermons and philosophical treatises In the Introduction to the Reader Charlotte Otten shows that the study of lycanthropy uncovers basic issues in human life the significance of

violence and criminality the role of the demonic in aberrant behavior and ultimately the nature of good and evil The implications for modern life are immediately apparent The Reader is divided into six sections I Medical Cases Diagnoses Descriptions 2 Trial Records Historical Accounts Sightings 3 Philosophical and Theological Approaches to Metamorphosis 4 Critical Essays on Lycanthropy Anthropology History and Medicine 5 Myths and Legends and 6 Allegory Each section has an introduction that summarizes and interprets the materials
