Warren Wagar, 1968-06-18 *Men of Science, Men of God* Henry Morris, 1988-07-01 One of the most serious fallacies today is the belief that genuine scientists cannot believe the Bible BUT THE TRUTH IS that many of the major scientific contributions were made by scientists who were dedicated men of God In *Men of Science Men of God* Dr Henry Morris presents 101 biographies and Christian testimonies of scientists who believed in the Bible and in a personal Creator God scientists who were pioneers and founding fathers of modern scientific disciplines Knowledge, Science, Religion Mara Borda, 2006 The Relations Between Religion and Science Frederick

Temple, 1884 *The God/man/world Triangle* Robert George Crawford, 1997 Why is there a world Does it reflect the presence of God in any way Did the world spontaneously come into existence or is there a creator How will it end Does God exist Do religions give a coherent view of his existence and nature Can we enter into relation with him Robert Crawford tries to answer these and other questions by arguing that religion and science complement one another and while they use different sources and methods insights can be gleaned from both concerning our nature the world and God Major attention is given to Christianity because modern science arose in that context but the discussion includes the teachings of five other religions in the hope that we can also learn from them Back cover **Science, Religion, and the Protestant Tradition**

James C. Ungureanu, 2019-10-03 The story of the conflict thesis between science and religion the notion of perennial conflict or warfare between the two is part of our modern self understanding As the story goes John William Draper 1811 1882 and Andrew Dickson White 1832 1918 constructed dramatic narratives in the nineteenth century that cast religion as the relentless enemy of scientific progress And yet despite its resilience in popular culture historians today have largely

debunked the conflict thesis Unravelling its origins James Ungureanu argues that Draper and White actually hoped their narratives would preserve religious belief For them science was ultimately a scapegoat for a much larger and more important argument dating back to the Protestant Reformation where one theological tradition was pitted against another a more progressive liberal and diffusive Christianity against a more traditional conservative and orthodox Christianity By the mid nineteenth century narratives of conflict between science and religion were largely deployed between contending theological schools of thought However these narratives were later appropriated by secularists freethinkers and atheists as weapons against all religion By revisiting its origins development and popularization Ungureanu ultimately reveals that the conflict thesis was just one of the many unintended consequences of the Protestant Reformation
