Bardon,2008-07 The Knowledge Drive is an optimistic book that demonstrates how new more accurate information conveys survival value and inevitably supplants our dysfunctional mythological beliefs Before there was time for the accumulation of knowledge early man created legends and religious myths to understand the world and ease the paralyzing awareness of his own mortality and the fear of natural forces beyond his control We are increasingly aware of how these magical beliefs can lead to divisive religious practices violence and mans continuing inhumanity to fellow man Change is clearly needed Now rapid advances in many fields are giving us the techniques to modify our evolution and curtail our virulence We can establish a more universal equitable morality based on more accurate intelligence about our origins and place in the universe Nevertheless it is up to us as a species to choose our own future directions We are thus in charge of our own destiny a threatening thought to many No prayers or appeals to magical forces will help Dr Bardon analyzes how our quest for knowledge is a basic human drive similar to the sex and nourishment drives It arises from our survival instinct and is not based on moral or altruistic factors Along with establishing knowledge as a source of power the author discusses the Knowledge Drive from many other perspectives its

various motivations the fact that it can be used for many purposes even destructive ones how it learns from adversity how it often exacerbates inequality and how it does not solve social problems unless given the necessary direction Dr Bardon looks at the multiple forces aligned against our efforts to obtain more reliable information He shows how the Knowledge Drive not only triumphs over but also learns from these negative elements Warnings about the fragility of our search for knowledge are misguided it is rather the people mired in mythology who are vulnerable and need our compassion *Exposing Privatization* Pat Armstrong,Carol Amaratunga,Jocelyne Bernier,2001-01-01 This book begins with the international context for health care reform and then moves from coast to coast setting out what is known about the reforms in health care privatization that are underway and about their impact on women *Women, Medicine, Ethics and the Law* Susan Sherwin,Barbara Parish,2020-09-10 This title was first published in 2002 A collection of articles focused on women within a general study of medicine ethics and the law Topics covered include areas where the institutions of medicine ethics and the law intersect in women s reproductive and sexual lives the impact of legal policies and dominant ethical beliefs on many aspects of women s health and the health practices and policies of bioethics and health law The editors recognise that it is important not to lose sight of social differences other than gender such as race ethnicity class age sexuality religion level of physical and mental ability and family relationships In their approach they seek to consider the lives and experiences of women as primary Hence they focus on the question of how women s encounters with the health care system are structured by gender and other socially significant dimensions of their lives rather than the question of how women differ from the male norm

Researching Health Mike Saks,Judy Allsop,2007-04-06 Researching Health covers the background to conducting health research qualitative and quantitative methods employed in researching health contemporary issues such as research ethics comparative research and the use of mixed methods and how to disseminate health research Just Care Leah R. Thomas,2019-12-03 What does it mean to engage in ethical anti racist pastoral care with women with mental illness particularly if these women are residents of an inpatient psychiatric hospital This book draws on interviews with eighteen chaplains in three psychiatric facilities to examine psychiatric chaplaincy with women in the context of a state psychiatric hospital It combines the voices of the chaplains with the disciplines of Christian social ethics and feminist womanist and intercultural pastoral care to create Just Care an approach to pastoral care that accounts for both personal and societal systemic factors in its practice of ministry Just Care proposes that pastoral care that addresses the entirety of the person necessitates a commitment to justice and an attention to cultural dynamics as foundational for ethical pastoral care It argues that psychiatric pastoral care must honor the communal and individual nature of care both the particularity of the caregiver and care seeker as well as intersections of culture gender race and class Women, Science, and Myth Sue V. Rosser,2008-06-23 This encyclopedia surveys the scientific research on gender throughout the ages the people experiments and impact of both legitimate and illegitimate findings on the scientific community women scientists and society at large

Women Science and Myth Gender Beliefs from Antiquity to the Present examines the ways scientists have researched gender throughout history the ways those results have affected society and the impact they have had on the scientific community and on women women scientists and women s rights movements In chronologically organized entries Women Science and Myth explores the people and experiments that exemplify the problematic relationship between science and gender throughout the centuries with particular emphasis on the 20th century The encyclopedia offers a section on focused cross period themes such as myths of gender in different scientific disciplines and the influence of cultural norms on specific eras of gender research It is a timely and revealing resource that celebrates science s legitimate accomplishments in understanding gender while unmasking the sources of a number of debilitating biases concerning women s intelligence and physical attributes

Smoking and Pregnancy Laury Oaks,2001 Examines smoking as a public health concern focusing on harm to the fetus and fetal personhood and also challenges moral policing of smoking women who are pregnant

*Toxic Exposures* Phil Brown,2007-06-29 The increase in environmentally induced diseases and the loosening of regulation and safety measures have inspired a massive challenge to established ways of looking at health and the environment Communities with disease clusters women facing a growing breast cancer incidence rate and people of color concerned about the asthma epidemic have become critical of biomedical models that emphasize the role of genetic makeup and individual lifestyle practices Likewise scientists have lost patience with their colleagues and government s failure to adequately address environmental health issues and to safeguard research from corporate manipulation Focusing specifically on breast cancer asthma and Gulf War related health conditions contested illnesses that have generated intense debate in the medical and political communities Phil Brown shows how these concerns have launched an environmental health movement that has revolutionized scientific thinking and policy Before the last three decades of widespread activism regarding toxic exposures people had little opportunity to get information Few sympathetic professionals were available the scientific knowledge base was weak government agencies were largely unprepared laypeople were not considered bearers of useful knowledge and ordinary people lacked their own resources for discovery and action Brown argues that organized social movements are crucial in recognizing and acting to combat environmental diseases His book draws on environmental and medical sociology environmental justice environmental health science and social movement studies to show how citizen science alliances have fought to overturn dominant epidemiological paradigms His probing look at the ways scientific findings are made available to the public and the changing nature of policy offers a new perspective on health and the environment and the relationship among people knowledge power and authority
