**Community and Climate Resilience in the Semi-Arid Tropics** S. P. Wani,K. V. Raju,2020-01-22 This book focuses on developing an integrated holistic approach for harnessing the potential of rain fed agriculture In this approach rainwater management through harvesting and recharging the groundwater is used as an entry point activity for increasing the productivity for farmers through enhanced water use efficiency To provide the holistic and integrated solutions the approach of consortium through building partnerships with different stakeholders eg different research institutions State National and International development departments eg Department of Agriculture Department of Animal Husbandry etc Non Government Organizations NGOs Farmers Organizations Community based Organizations CBOs along with market linkages through private companies      **Agriculture in Dry Lands** I. Arnon,2012-12-02 Throughout history man has by over use consistently reduced the productive capacity of dry lands This degradation of one third of the land area of the globe is unfortunately increasing In recent years world interest has turned to the problems of pollution of the environment and the impending food shortage as world population grows explosively Thus the attention of international and other agricultural bodies has turned to the need for preserving and developing more effectively the agricultural potential of these areas This book provides a comprehensive review of present knowledge of the agriculture of dry lands with special emphasis on measures for conserving their natural resources Management practices are described which aim at optimizing productivity of rainfed and irrigated agriculture without adverse effects on sustainability Land use in the dry regions and its evolution throughout history is described and analysed and the lessons to be learnt from destructive technologies are stressed In particular current proposals for an alternative agriculture are discussed and their justification is questioned This is a generalist work which

specialists can also find interesting not only in their own discipline but as a concise way of acquainting themselves with the state of the art in associated fields Increasing specialisation with each discipline using its own vocabulary leads inevitably to communication problems and the need for multi disciplinary teams makes inter discipline communication indispensable

**Advances in Soil Science** ,2012-12-06 The world population in 1950 was 2.5 billion and is more than 5 billion today The agriculture community however has responded remarkably well to meeting the increased need for food and fiber While the population growth during this period averaged almost 2% annually the production of grain increased at an even faster rate From 1950 to 1973 grain production increased 3.1% annually but slowed to about 2% from 1973 to 1984 There fore as a whole the world has more grain per capita available today than ever before Several countries that were food importers just a few years ago are food exporters today The world carry over stocks today are the highest in years While the major concern just a few years ago was whether the world could produce adequate food the problem for many countries today is how to export their surpluses Although the world as a whole has surplus food supplies there are millions of people without adequate food to exist and there are additional millions who have a bare subsistence diet at best The average daily calorie supply for the developed countries is more than 3 300 per person while the average for the developing countries is only about 2 200 The major global food production problems have shifted from Asia to Africa where malnutrition poverty and starvation are attracting world attention

**Conservation Agriculture: A Sustainable Approach for Soil Health and Food Security** Somasundaram Jayaraman,Ram C. Dalal,Ashok K. Patra,Suresh K.

Chaudhari,2021-08-20 Feeding the increasing global population which is projected to reach 10 billion by 2050 there has been increasing demands for more improved sustainable agricultural management practices that can be followed by farmers to improve productivity without jeopardizing the environment and ecosystem Indeed about 95% of our food directly or indirectly comes from soil It is a precious resource and sustainable soil management is a critical socio economic and environmental issue Maintaining the environmental sustainability while the world is facing resource degradation increasing climate change and population explosion is the current challenge of every food production sectors Thus there is an urgent need to evolve a holistic approach such as conservation agriculture to sustain higher crop productivity in the country without deteriorating

soil health Conservation Agriculture CA is a sustainable approach to manage agro ecosystems in order to improve productivity increase farm profitability and food security and also enhance the resource base and environment Worldwide it has been reported various benefits and prospects in adopting CA technologies in different agro climatic conditions Yet CA in arid and semi arid regions of India and parts of south Asia raises uncertainties due to its extreme climates large scale residue burning soil erosion and other constraints such as low water holding capacity high potential evapotranspiration etc Thus the proposed book has 30 chapters addressing all issues relevant to conservation agriculture no till farming system The book also gives further strengthening existing knowledge in relation to soil physical chemical and biological processes and health within close proximity of CA as well as machinery requirements Moreover the information on carbon C sequestration C credits greenhouse gas GHG emission mitigation of climate change effects and socio economic view on CA under diverse ecologies namely rainfed irrigated and hill eco region is also deliberated For large scale adoption of CA practices in South Asian region especially in India and other countries need dissemination of best bet CA technologies for dominant soil types cropping systems through participatory mode strong linkages and institutional mechanism and public private policy support We hope this book gives a comprehensive and clear picture about conservation agriculture no till farming and its associated problem challenges prospects and benefits This book shall be highly useful reference material to researchers scientists students farmers and land managers for efficient and sustainable management of natural resources

#### **Soil and Fertilizers**

Rattan Lal, 2020-05-06 Soil and Fertilizers Managing the Environmental Footprint presents strategies to improve soil health by reducing the rate of fertilizer input while maintaining high agronomic yields It is estimated that fertilizer use supported nearly half of global births in 2008 In a context of potential food insecurity exacerbated by population growth and climate change the importance of fertilizers in sustaining the agronomic production is clear However excessive use of chemical fertilizers poses serious risks both to the environment and to human health Highlighting a tenfold increase in global fertilizer consumption between 2002 and 2016 the book explains the effects on the quality of soil water air and biota from overuse of chemical fertilizers Written by an interdisciplinary author team this book presents methods for enhancing the efficiency of fertilizer use and outlines agricultural practices that can reduce the environmental footprint Features Includes a thorough literature review on the agronomic and environmental impact of fertilizer from degradation of ecosystems to the eutrophication of drinking water Devotes specific chapters to enhancing the use efficiency and effectiveness of the fertilizers through improved formulations time and mode of application and the use of precision farming technology Reveals geographic variation in fertilizer consumption volume by presenting case studies for specific countries and regions including India and Africa Discusses the pros and cons of organic vs chemical fertilizers innovative technologies including nuclear energy and the U N s Sustainable Development Goals Part of the Advances in Soil Sciences series this solutions focused volume will appeal to soil scientists environmental scientists and agricultural engineers
